step 2. And done . they can not open there whatsapp until they delete your conversation ,

tested on all versions of WhatsApp and also 2.11.431 , 2.11.432 , doesn't work on windows 8.1 and 2.11.468 , and i dnt have iphone so i dnt know about iOS.

Check Below For the App which will directly Kill the whatsapp without any copy and past

I didn't find this exploit, I dnt take any credit for this, but let me tell you something its a hell of a fun if you post this on any of whatsapp groups, Result : they all get crashed and they can not open that group until they all leave.

Thank you to view my thread , u can donate me ur fingers if u want .

Edit : Hello my Fresh Meats after 10 mins of coddng i just created a android application for this which will crash victims whatsapp easily u just have to click Boom .

This is Still a prototype but it works like a charm here is the Thread Link of the app :

and is not effective

Smexy - December 2, 2014, 11:23 am

It will crash your phone if you open your victim chat as you see , you just send a huge special
character packet to ur victim in result when ur victim will open ur chat his whatsapp will crash but
also as your whatsapp also can not take that much load in result your whatsapp will also crash if you
open ur victim chat , the only way to survive is to delete his conversation and u will be safe ,

best part about this is user have to delete there conversation entirely else they will always crash
whenever they open ur conversation

Smexy - December 2, 2014, 11:30 am

So they can still use whatsapp after it?
Then its pointless. you can hold onto the conversation and delete it.

that's the best part , if you have some chats with him which is embarrassing and you dnt want him
to show it to anyone u can just boom him down , he will get force to delete the conversation , and
believe me victims dnt even know they have to delete the conversation to patch there whatsapp
they will keep try to open the conversation and they will get crashed again and again .

axel - December 2, 2014, 11:42 am

I created an app for Android to speed things up. You need just to click "Download Android App" and install on your device.

I hope it's useful :)
