SEnuke 6.44 Cracked - No \$hitCash

I have not cracked this, I do not take ownership or credit for it being cracked. Just thought I would share it with you guys as I found it.

I put it in the monetizing section as the common use of the program is to generate alot of money.

What is SEnuke?

SEnuke SEO software is a desktop program that many advanced internet marketers use to increase their search engine rankings. I am not going into details, if you do not know what it is it is probably best you do not download it.

List of features:

1. Instantly create a lens/wiki/hub/article/blog with UNIQUE content at THIRTEEN HIGH PR, HIGH AUTHORITY websites. <- EFFORTLESS DOMINATION of the ENTIRE first page of Google, Yahoo and MSN!
2. To be added: instant video submission to the top 10-20 video websites on the Internet! <- EFFORTLESS DOMINATION of another ENTIRE page of Google, Yahoo and MSN!
3. To be added: instant social bookmarking at the top 10-20 social bookmarking websites on the Internet! <- EFFORTLESS DOMINATION of another half page of Google, Yahoo and MSN!
4. To be added: instant posting of auto-generated RSS feeds to the top 10-20 RSS aggregators on the Internet! <- EFFORTLESS DOMINATION of another ENTIRE page of Google, Yahoo and MSN!
5. 60-80 HIGH PR Backlinks from AUTHORITY websites with just a few clicks!
6. Instantly create hundreds of article variations from one article with the click of a button.
7. Built-in thesaurus to make the "spinning" process fun and effortless.
8. Ability to use one article to rank for several different keywords using the intuitive #keyword# placeholder.
9. Automatic linking of all lenses/wikis/hubs/articles/blogs with the click of a button (Optional).
10. Ability to spin article titles effortlessly so that the search engines can never know they are similiar!
11. Check how unique the produced articles will be with one click!
12. Load articles from a directory instead of using the spinner - 100% compatible with iContentRobot and other article generating programs.
13. Preview the completed article, complete with rendered HTML code with the click of a button!
14. Get your submissions indexed within 10 minutes: One-click pinging of all lenses/hubs/wikis/articles/blogs at the top 15 pinging destinations so the search engines come running!
15. Instant word count calculation!
16. Instant keyword density calculation!
17. Save and load unlimited password profiles at each of the websites!
18. Watch the magic as it happens! SEnuke shows you exactly what it is doing at all times!
19. New features and websites added REGULARLY!
20. The software stays current and updated at all times with built-in auto-update feature!
