Thread: [\[Animated\]Circular Progress Bar](#)

Hex Hooves - December 2, 2014, 11:18 pm

I got bored today and decided to create an animated progress bar control.

my original inspiration came from this

<https://i.imgur.com/W4zGCBT.webm>

however, for my sanity I opted to not do it quite the same.

Here's a [shitty] webm preview

<http://webmup.com/yCEPm/>

The "Heath:" text isn't there by default, and you can change what text is displayed in the circle.

Source

<https://raw.githubusercontent.com/HexHooves/Custom-.Net-Controls/master/Circular%20Progress%20Bar.vb>

Warning, it is a tiny bit of a mess.

Suggestions/Improvements welcome.

EDIT

I would like to point out that this is my first fully custom control. I did make some fixes a while ago to the NetSeal theme, but this is the first control that I've completely custom created.

It is also pure GDI+

Kill?Muvz - December 3, 2014, 1:52 am

Looks really good for your first control, don't stop practicing!

SaketSaket - December 3, 2014, 8:48 am

Nice start with your first control, Keep coding GDI+ ;)

Naywyn - December 3, 2014, 9:19 am

That's really nice, keep up the good work !

SyyK - December 3, 2014, 9:41 am

Thanks for the share!

I may use this for further projects :)

Regards

Karnaugh - December 3, 2014, 12:27 pm

Wow, I must say it's a pretty cool Progress Bar (:

#Kat - December 3, 2014, 12:50 pm

pretty cool reminds me of titan fall :D keep it up

Thanks for the feedback everyone!

On a side note, adjusted the code slightly. It should now use less CPU by only running the Update Task when the control needs updating (animating)
