## MyLikes Tutorial v2.0

Shout out to [Spazie](#) for this technique. ?

This tutorial is not the same as my previous tutorial. If you don't know what MyLikes is or need to learn the basics you can see my previous tutorial here:

<https://hackforums.net/showthread.php?tid=4507870>

This tutorial is going to tell you about a couple of ways I have managed to increase my earnings and give you the chance to join my facebook group. I'll talk more about the group later in this guide and how it will benefit all of us.

## Joining FB Groups

I've never been a fan of joining groups but I recently found out how joining groups can seriously boost earnings. Search for groups that are active, check to make sure the most recent posts are from the same day or maybe 1 day old. Make sure the posts are getting lots of likes and comments. Making sure the posts get lots of likes and comments is important because this means people are actually seeing the post or clicking the content in the post. I decided to join a group to show you how quick you can earn.

(I actually picked a bad group because there's not many USA/UK people in this group but this is just so you get to understand the potential earnings)

As you can see, in under 30 mins I have had 16 people start following me and a bunch of likes and comments on my mylikes content.

\$0.47 made in less than 30 mins with no effort at all. The group I joined only has 5k +/- members and the posts before mine only got 50 to 60 likes so I class this as a very small group. Now, if I joined 10-20 similar groups and share your content in them all I would be looking at 10 - 20 times the profit, all in just 30 mins. It takes seconds to share the content to a group and i'll explain how to do this shortly.

I have also asked to join a group with 120k members and this group looks very active with the recent posts getting 2-3k+ likes and the posts are only a couple of hours old. I haven't been accepted yet so its unfortunate I couldn't use that group as my example.

How to find & join groups.

This is very simple and I assume people already know but since not everybody uses facebook daily I will explain.

In the left navigation look for "Groups" then in the groups navigation look for "Find New Groups"

When you click find new groups, its going to take you to the "Browse Groups" page.

(Large image)

Spoiler [\(Click to View\)](#)

As you can see, none of those groups are from the UK/USA so you'll be making much less per click but don't let that stop you. Look how many members those groups have! The second one has almost 3 million members, click join and hope you get accepted.

I've been looking for UK/USA groups only, since I live in the UK I just click "Local Groups" at the top of the page.

Ok, so now you are a member of a group. Simply go to mylikes, select the content you want to share and then select where you want to share it. In this case you want to share it to a group.

On the line under, start to type the group name and then select it when it shows. Type some text to go with it and share. It is now posted on the groups timeline. Now if its a huge group you expect your post to vanish from the top of the timeline very quickly right? Well, some tips and tricks to keep people seeing this is to like EVERY comment people make on your post and reply as much as you can. Active posts end up sitting at the top of users timeline. Even if they are not on the page timeline they will see "X PERSON posted on GROUP NAME" on their own time line. Popular posts go 'viral' (Obviously on a much smaller scale). Keep getting comments on your post and likes its going to be shown to more people. This is how facebook works. I hope you all start to benefit from this, you could even try making your own groups, when you are the admin your posts will be seen and you can even pin it to the top of the timeline. This leads me onto the group I spoke about earlier.

### My Facebook Group

I made a quick group just before I started this tutorial, I am the only member right now lol.

I made the group "Like Comment Share". Basically this group can be used for anything, here's the description:

"Like, Comment and Share Exchange!

This group can be used to promote your group, page and mylikes content. Do not advertise rival pages or you will be banned from the group."

It's a closed group right now because I am hoping we'll get a lot of HF users on board first so we can all share our content and view each others. After the group looks active I'll make it public and in theory we should get a wave of people joining and checking out our content. You can join the group here: <https://www.facebook.com/groups/731633140253186/> I can't tell who is who is who so i'll just be accepting everybody that joins. I'll also be looking for another admin or maybe a couple so we can stop users from spamming none stop with their content and not giving others a chance to get theirs seen.

I have no idea how big this group will become, I guess that's down to everybody, not just me. If its active people will join, if its dead then people will not. Lets just try to keep it active, check out each others content and like the posts. There is no reason why it can't become a 100k+ member page in a matter of weeks.

## End - Questions

Like always, I will give support to anybody who needs it and I am always happy to listen to others and work on idea's to boost earnings. MyLikes can be hugely profitable with users making \$5k+ per day and until I figure out how they are doing it or hit my own targets of \$200 per day, I'm not going to quit working on it and I am happy to share all my findings along the way to help the members of HF benefit from it also.

Sick tutorial dude, very appreciated!

+1

**Karnaugh** - December 3, 2014, 12:17 pm

Vouch!

Limited Edition's MyLikes guides are always useful!

**Limited Edition** - December 3, 2014, 12:20 pm

Thanks guys, I'll have us all earning \$100's per day one day. Its a slow process but I'm slowly increasing my earnings each day.

Update:

As you can tell I use a fake facebook "Beth" and I use some sexy ass girls pics, nobody's going to like my ugly mug's posts haha.

**albastru31** - December 3, 2014, 12:25 pm

Nice tutorial, looks good, also usefull method you used there ^^

**itayvardi** - December 3, 2014, 12:57 pm

Epic guild!

Hope you (or should I say "our") facebook group will get a lot of members and we all get some \$\$ :D

**Limited Edition** - December 3, 2014, 1:04 pm

- Last update for today since I'm too lazy to keep checking lol. As you can see it's just counting up at a nice speed and I've only shared it to a couple of small groups. I just did this so you get the idea of the earning potential mylikes has.

Yeah, I just accepted 1 person into the group. Feel free to invite people to the group, it doesn't matter if they use mylikes, post on hf or not, I guess we should just work on getting it as active as we can and we can all post content and earn. ?

**dioniii1** - December 3, 2014, 1:16 pm

Nice post mate!

thank you

**Rooter** - December 3, 2014, 1:24 pm

Using this along with using HootSuite to post in multiple groups actually got me banned from MyLikes... Great tutorial anyways!

I read somewhere that they don't like people spamming the content. (I'm too lazy to find this) So I am assuming when you post to lots of groups at the same time it's going to flag your account.

It was actually another guy who gave me this idea to post in groups and he's been doing it for months undetected by mylikes because he posts once per day in several groups and doesn't post all at the same time.

It's unlucky you got banned but this seems to be working great so far and has made the other guy nice amounts of money.

**albastru31** - December 3, 2014, 9:12 pm

Got a question: let's say you make a post now, and on the revenue page it says 'estimated'. 48 hours later it will become 'finalized'. After that you can't get revenue from that post?

**LynS** - December 4, 2014, 6:32 am

Thanks For The New Updated

Already Money Is Raining From this Little Trick ?

Yes, whatever it says on estimated is exactly how much you have made so far. It takes 2 days for it to be confirmed.

What I do is check total earnings on a Wednesday and if they are over \$20 then that's what will pay

out on friday.

I honestly could not remember your skype or HF username dude. I went through my skype checking previous messages but after I got to the 100th person I just gave up. ?

I'll edit the OP now. ?

haha, to be honest. I am finding it hard to find large groups that will approve my posts, I started my own adult content one about 30 mins ago, I have 50 members already although I did add them to the group. I'm trying to get the group noticed but its proving difficult lol.

You could try writing 'Big Groups On Facebook' on Google, maybe you could find something ')

**Limited Edition** - December 7, 2014, 3:26 pm

I have done that, most of the groups I join the admins check your message before allowing it to be posted. Even when my content is about the page niche they don't ever allow it, its kind of frustrating me lol.

Good stuff man, the group can be used to share anything, not just mylikes stuff. You can share your

pages, groups, websites anything.

**vaan** - December 7, 2014, 7:02 pm

Men, your tutorial should have a price, slowly but surely with little to no effort. Thanks mate

You need to sign up for Publisher..

Yes, as Snickerz said, sign up as a publisher. You'll also get the choice between using your own site and using a mylikes one. Everybody apart from 1 guy has chosen the mylikes one. I'm considering making a new account and making my own site to see if I could drive traffic to it that way.

I check it every few hours and accept everybody, let me know if you still haven't been accepted. You may need to request again because another guy had this problem because his request did not come through.

If you attempted to falsify traffic (ex Hitleap) then you'll get suspended. If you're spam posting randomly, like going on a post about science and then posting your MyLikes content about food, then you're going to get suspended.

**Seagulls** - January 29, 2015, 3:05 am

Daily earnings, lower than they use to be.

Sorry Limited Edition, I appreciate you are trying to help the community but spamming other peoples groups with your MyLikes links isn't the way to go. You need to own your own fanpage.

**gr3yhat** - January 29, 2015, 9:48 am

This is a great tutorial!!! I started mylikes a couple of weeks ago and actually had the idea of joining some groups to get more clicks and such. I tried it with ADHD groups posting ADHD content and went from making \$.10 a day to making about \$2.40 per day. I can vouch for this and tell y'all that it does work! I look forward to the fb group blowing up!

Nice earnings. You have your own fan page? I've been trying to build one, I get 100+ likes on pictures and a couple of shares but when ever I post mylikes content hardly anybody clicks on it. I get more comments than clicks lol.

**hexcore** - January 31, 2015, 2:34 pm
