Thread: [What happened to Steam Stealers?](#)

nitrofun - December 3, 2014, 3:04 pm

I heard Omniscient said he'd be reviewing it, and that was like 10 days ago. I also see all the stealer threads closed, so i'm assuming he took action and shut them down.

Can someone link me to the announcement that talked about that? I've searched through but only found the thread in suggestions.

Thanks.

also, is discussion of them not allowed?

The great Omniscient has disallowed the speak of steam stealers.

I know that, I was just wondering where the thread he stated it is at? I understand they're not allowed anymore.

There wasn't any issue with stealers and selling accounts until Volvo went ape-ship, so I'm guessing he's doing this to protect the boat?
