PPI V2

Start Earning Big using PPI

What is PPI?

What is PPI? PPI stands for (Pay per Install) Which means you are basically spreading a program and earning money with it. PPI can be done worldwide and does not need any investment at all. I do prefer PPI over Cpa, PPD, PPC.

Why choose for PPI?

Well you are basically asking yourself why would i choose PPI over cpa, PPD etc well the answer is right in front of you. Are you going to do a survey for a niche? NO!! well that is the same for others people will download a installer a lot faster then doing a survey. So that's why i choose for PPI.

Which PPI network should i join?

Well you got different PPI networks but the most common ones are.

- Installaxy
- Media-Kings

Which one should you join? Well i use myself installaxy because its easy and has a nice dashboard has some awesome landing pages and does not require a lot work.

How do i apply?

Well Let me explain this to you all who try to get in the PPI network. Always use your real details they are not going to steal anything of you its safe i did the same and if you use fake details you got a chance they ban you from the network and then you cna never apply again so use your real details like name etc as then they will 9/10 times accept you keep that in mind.

Some methods to start with

I Grabbed some info out one of my PPI ebooks i wrote myself guys special for this tutorial.

Another Method

Go to Installaxy.com

And create a account you will see on the top of the site register.

Now you just fill in your legit details and wait till they accepted your application.

Next thing to do is to choose payment way i used paypal so i used my paypal with Installaxy.

One you are in you go to the dashboard it will look something like this.

Now you going to use 2 things out of the dashboard.

Bundle and Content Locking.

When you going to use Content locking?

When you use movie niches. or any other kind of niche related to movies.

When you going to use bundle?

When you use software niches (Example: KeyGens, upcoming games, etc)

Now create your bundle or content locker and head over to

Blogger.com Now you are on there you going to make a blog this is really simple you can watch many tutorials online about making them.

Make the blog with a nice layout and related to your niche this can be everything you have to think out of the box. once done save the blog adress and if you want to insert content locker in the blog hit that HTML edit button on there.

Second Download any free screen recorders

Like Hypercam or just buy camtasia.

Now you going to make a video about your blog best is with commentary as this will gain people their trust.

Now you have to make or use a existing youtube account and make it with a nice layout maybe photoshop some channel art and gain some subscribers and video likes so you have to get a eye catching title

for example if you have gta5 niche (GTA5 II Full game PC + Multiplayer III Start playing GTA5)
As you see i said GTA5 twice in the title as you got gta5 as niche.
Next you have to write the description. This is just some text including your niche and then link to your blog.

Now everything is setup you head over to addmefast.com
And download a addmefast bot i suggest the addmefast bot by OMGWTFISTHIS. i heard its a nice bot. gain some points and add 2 links 1 for subscribers and 1 for video links. You can also use hitleap to get traffic to your channel so it looks like people search for your channel often.

Now you have everything setup you just going to repeat this step uploading video's and making blogs and you will see money start rolling in.

I will update this later!!

Thanks i did my best :) haha trying to keep the MT section little active

OddestFuture - December 26, 2015, 2:47 pm

I'm very surprised nobody picked up on this, very HQ thread and tell you put time and effort into it. Thanks man, I appreciate it. Does this method still work? Does it need to be tweaked for today's use?

Yeaah still works mate :) PPI will probably never die

Gramatik - January 2, 2016, 3:41 pm

Thanks for your tutorial bro, it was very helpful for me. PPI is a good way to make money easily but we need to work a little bit

H00NiGAnn - January 2, 2016, 4:54 pm

Im new to hackforums aand ... what does niche mean ? Thanks ! :D
Post is really good too !

BITCOIN - January 2, 2016, 5:25 pm

Very helpful Tutorial :) Might look into this! Thanks for the share OP! :)

A business or market niche is a segment of market. Basically, if you sell footwear, your niche will be people who use shoes, sneakers, etc. It is always best to not pick over saturated niches (For example, you already have big competition with footwear, with brands like Nike, Converse, etc.) and pick one that has a profitable segment (People that have money, pretty much). At least I think it's sort of like that. Hope it helps.

Goatbeard - January 3, 2016, 2:05 am

Thanks for the tutorial, really helped me out since im totally new to this.

iBadGamer - February 24, 2016, 7:06 am

Is it really safe to use true personal informations ? This is illegal I think (installink malwares/adwares in order to make money)...

lo4dmedia796 - June 7, 2024, 7:54 pm

Hello how are you we have PPI bundle install Asia and WW please send me telegram ID

jw23081980 - October 4, 2024, 4:05 am

i am looking for installs , if any one interested plz pm me
