Thread: [GDI+ Theme Collection \[.dlls\]](#)

Astek - December 4, 2014, 1:45 pm

Hey, I compiled some of the VB.NET Themes from [this thread](#) into dlls and I thought I would share them here for people who want to use them in C#

Note: All credits go to the creators of these themes, their names are on the thread I linked above.

You have linked images not threads above ;)

I hope now c# users will use themes created in vb.net ;)

Can't you post the themes in pictures, so we can see how they look before downloading them?

Also how does it work? I'm new to C#

you want to see go look on there and just drag in onto your toolbox

Added another 10 themes and cleaned up the thread with some photos ?

Someone managed to import them ? I tried to import into the toolbox (Add tab -> Choose items), but I have an error (not compatible with toolbox)

You could provide a link to the image rather than an actual image.  
Some spacing would be nice too. :)

How do would  
we install this ?

Right click the toolbox -> "Choose items..." -> hit Browse -> select your DLL.

Good work mate, how did you made them ?

My favorites are: xVisual, Grey, LogIn.
