So if I understand it right, I can convert my .exe into a .pdf that once u run it works like the original exe, and all of this on Windows 7/8?

If yes, I will definetly buy it

Skтчy - December 5, 2014, 3:54 pm

This is an edit to my original post applying for a vouch copy.

On 12/5/2014 roughly 7 PM EST I recieved a message from OP regarding a vouch copy. I was instructed to choose one of the two options.

I decided to choose .PDF as I personally could spread a .PDF a lot easier than a .DOC. Thinking ahead. However I did not and do not plan to spread my vouch copy, i'm only using it to test.

I want to make note that this is an exploit, not a crypt. Therefor the .EXE you provide must be FUD.

All i can say is he was very clean and tried to explain things the best way. In a way he taught an old dog a new trick and got me to understand. I'd recommend this to anyone looking for anything similar or to anyone that's trying to spread and is having a tough time as this opens many more doors for spreading.

The .PDF currently has a detection rate of 4.

Regarding the detection rate of 4 with the .PDF I was informed that this will be fixed in a few days but I was also told the .DOC had no detection's. I opted to try the .PDF exploit.

Dear, 3xp1r3.

I would happily purchase the bin or even the builder if you could take your time to build your own server so I could test it out and see how it works. Or if you could show me a live presentation of your exploit. I will prove that I have the required amount in bitcoins and I'm ready to send you 2.50\$ worth of BTC for your time to show me the exploit in action. If it is as described I will buy it.

Cheers, PM ME.

Just wanted to update. Sent a crypted file to have bound. The crypted file has since had detections
(this on me of course) However the DOC I got from him is still FUD. Very cool!!!

So still spreading successfully with this doc, and its not loosing slaves.

Solid work, and long lasting. Thank You!

jjcman - December 24, 2014, 1:29 am

what is the current detection rate ? i will need the builder too.

?SafranUSA - December 24, 2014, 1:32 am

Big vouch for 3xp1r3 my friend :)
You can trust this exploit specially the .doc one.

Animated - December 24, 2014, 2:51 am

What's the difference between a doc bin and a doc bin + builder?

Kinda noob when it comes to this :)

Pretty interested.

PM me back with reply please as it's easier for me, thanks.

?SafranUSA - December 24, 2014, 2:55 am

Doc bin + builder that mean you will get the builder and with it you will be able to make as many
build as you want.

And the simply doc bin that mean you will only get 1 doc bin.

I am interested and my only issue is on detection rate as if this is high it does not matter if it is .doc or not because nobody will open it. Can you shed light on this

yes you can send via facebook . skype . attach to email
and yes the extension will be .doc

well its not a fake extension its a original .doc file will be backdoored with your server
so you can send it to facebook chat . attach to email . send via skype or any other messenger
and it will show [example.doc]

I am interested to buy this but first, U must make a Clear Setup Tutorials on how to Use it. and it should be better with a Voice, explaining exactly what U are doing. because on your previous Videos U were writing and that was not clear exactly what U are trying to do. This will drastically enhances the understanding of U new customer as well as Improve much sells for you.

When I have my RAT injected into the the .doc/.pdf exploit, do I have to worry about crypting my RAT's stub before putting it in the .doc/.pdf or does it become FUD after the stub is put in the .doc? Also, can we edit the .doc so when the target opens it it will show anything we want? For example, I use the exploit on an essay. Thanks for the help.
