Feel free to report bugs (or fork me and fix them for me ?) or add new features.

Follow us on Twitter for updates on the site and new features: <https://twitter.com/omnichain>

SIM-2015410 - December 5, 2014, 3:04 pm

Great work Abe! The Pool is a great addition. Thank you for keeping everyone updated with progress ?

Aceman - December 6, 2014, 10:23 am

Can I request features for the website? Such as filter by input and filter by output?

Hire - December 6, 2014, 10:23 am

Are people still mining OMC?

Nice website btw! :)

Abraham Lincoln - December 6, 2014, 11:41 am

(Dec 6, 2014 11:23 AM)Aceman Wrote: [\[CITE\]](#) Can I request features for the website? Such as filter by input and filter by output?

What exactly do you mean by filter by input?

xXx. - December 6, 2014, 11:42 am

If I could figure out how to get the omc I sent to my downloaded wallet, I would surely transfer it to this.

Abraham Lincoln - December 6, 2014, 11:47 am

(Dec 6, 2014 11:23 AM)Present Wrote: [\[CITE\]](#) Are people still mining OMC?

Nice website btw! :)

Thanks I've had it for awhile, but never made an official thread.

And there's still people mining OMC.

Who Soup - December 6, 2014, 11:49 am

nice work Abe, always dishing out nice things for the OMC community.

cyberducky - December 6, 2014, 11:49 am

Nice site. Hopefully more people start using OMC.

Abraham Lincoln - December 6, 2014, 11:51 am

(Dec 6, 2014 12:42 PM)xXx? Wrote: [\[CITE\]](#) If I could figure out how to get the omc I sent to my downloaded wallet, I would surely transfer it to this.

Actually you can just import your desktop wallet into your online wallet. You don't need it to be synced. I'll PM you instructions.

Prince Gumball - December 6, 2014, 11:53 am

Very cool man. I might check this out later.

lawlHFlawl - December 6, 2014, 11:57 am

how do you get Omnicoin? i would like to get some

Abraham Lincoln - December 6, 2014, 11:59 am

(Dec 6, 2014 12:57 PM)lawlHFlawl Wrote: [\[CITE\]](#) how do you get Omnicoin? i would like to get some
Check out freeomnicoin.com . Every hour you click a button and get free omnicoin.

Aceman - December 6, 2014, 12:16 pm

<https://blockchain.info/address/1Go4RwK7bn7Bm3knP88Ce1uqzJVQ2cYfSw>

Look at the filter option on the right just below the QR code. I'd like to be able to filter based on sent and received.

Abraham Lincoln - December 6, 2014, 12:26 pm

Ah yes that will definitely be added. I've been meaning to move the entire block explorer over to an API and set it up with AJAX at which point sorting will be a breeze.

<https://github.com/Omnicoin-Project/omnicha.in/issues/22>

Legion. - December 6, 2014, 12:34 pm

Nice Job Abe! This is going to help Omnicoin!

Aceman - December 6, 2014, 1:15 pm

(Dec 6, 2014 01:26 PM)Abraham Lincoln Wrote: [\[CITE\]](#) Ah yes that will definitely be added. I've been meaning to move the entire block explorer over to an API and set it up with AJAX at which point sorting will be a breeze.

<https://github.com/Omnicoin-Project/omnicha.in/issues/22>Fantastic.

By any chance would you happen to be able to produce a chart of difficulties based on hash rate? I'd like to see a calculator which would allow me to enter the network hash rate and have the calc estimate what the difficulty would be. Now that I think about it though, that might actually be a waste of time depending on when the difficulty algorithm is going to be changed.

Sorry if it sometimes seems like I'm asking a lot. I feel as though I can't be the only one who would be interested in some of these things, especially as a miner.

Abraham Lincoln - December 6, 2014, 8:07 pm

O.o I'm surprised no one noticed the blatant error in the thread. It's fixed now.

(Dec 6, 2014 02:15 PM)Aceman Wrote: [\[CITE\]](#) Fantastic.

I'll take it under consideration. I'm not sure how I would implement it though. And as you said with Darkwave coming soon I would just have to recode it.

Raoul Duke - December 6, 2014, 11:53 pm

Very nice we can have now have a pool and a wallet on the same website. We need a BTC/OMC trading tool and it will be perfect :-D

Abraham Lincoln - December 6, 2014, 11:57 pm

(Dec 7, 2014 12:53 AM)P4dM4n Wrote: [\[CITE\]](#) Very nice we can have now have a pool and a wallet on the same website. We need a BTC/OMC trading tool and it will be perfect :-D

You mean a trading tool on the site?

Raoul Duke - December 7, 2014, 12:02 am

Yes that could be great to have everything on the same website

Abraham Lincoln - December 7, 2014, 12:12 am

(Dec 7, 2014 01:02 AM)P4dM4n Wrote: [\[CITE\]](#) Yes that could be great to have everything on the same website

I've thought about making a super basic way to convert between OMC / BTC. It would definitely make it easier for newer users and would promote more trading. It wouldn't be a full exchange like AllCrypt though.

I've added it to the todo list: <https://github.com/Omnicoins-Project/omnichain/issues/30>

SIM-2090815 - December 7, 2014, 5:29 pm

My opinion right here but why would you put %0 fees it makes all the other pools worthless as everyone is going to use this now, I feel you should have had %1 like the others.

Aceman - December 7, 2014, 5:38 pm

(Dec 7, 2014 06:29 PM)Dispaced Wrote: [\[CITE\]](#) My opinion right here but why would you put %0 fees it makes all the other pools worthless as everyone is going to use this now, I feel you should have had %1 like the others. All pools have had a 0% mining fee at one point, it isn't something new. Besides, I don't see anybody besides Abe or myself having mined on the pool.

Abraham Lincoln - December 7, 2014, 5:52 pm

The other pools only have 1% fees as Omni is paying for their hosting and requires that they have it. And even with a 1% fee the pool would make less 1K in fees a week. I don't need the fee for

anything so I don't see why I would have one.

Also since I'm the primary miner on the pool it doesn't make sense to take a fee from myself, just to give it back.

SIM-2090815 - December 8, 2014, 8:11 am

It dosent matter how much you need it or not its just a pool with 0% fee will more then likely stop people mining on another pool.

Abraham Lincoln - December 9, 2014, 5:41 am

(Dec 8, 2014 09:11 AM)Dispaced Wrote: [\[CITE\]](#) It dosent matter how much you need it or not its just a pool with 0% fee will more then likely stop people mining on another pool.

The idea of enforcing a fee was to try to even out the hashrate between the pools, but it hasn't made any difference at all.

IMO I think we should try to give Omnicoin miners the best profitability they can get. If that means everyone goes to a 0% pool instead of 1% so be it.

The idea of having multiple pools with equal hashrates at this small of a scale is kind of pointless. It defeats the purpose of a pool. If anything we should have 1 main pool that has all the hashrate and 1 failover pool. That would provide max efficiency to all miners.

Just pushed some updates to the pool and wallet:

I enabled forcing SSL when connecting to the pool for extra security. I also removed 2FA for account details update and withdrawals. That was getting pretty annoying.

I am now running 15 minute interval offsite backups on the wallet and pool databases. Even if the wallet or pool were hacked or server became completely corrupt you would STILL be able to recover your Omnicoin on both the wallet and pool with ease.

NiktoKan - December 10, 2014, 9:49 am

The are number of mining pool stop operating due to

1. Donation not enough to cover pool operation cost eg. Hosting
2. Always under DDOS Attack

So is glad you are the main miner for the pool, at least can cover the hosting cost.

Aceman - December 10, 2014, 12:51 pm

Abe already has a server which he can host the pool on so it's no additional cost to him. It only makes sense to incorporate a pool into a website such as his.

2. Not once have I known of any pools being under a DDoS attack. I've also not once seen somebody by your name mining on one of the pools, are you sure you know what you're talking about?

Doctor Blue - December 10, 2014, 2:26 pm

Omniscient doesn't take any of the fees anymore. He insisted I keep the fees over 0.5% to allow other pools to have some sort of income as well.

I stuck with 1% to see if it'd make people start another pool.

Like I wrote on the other pool thread it's really simple:

Both pools have the same fee = Everyone joins mine (the "official" one, and the one mentioned in most of the guides)

One pool has a lower fee than the other = Everyone joins the lowest fee pool

This is exactly what happened the three times I changed the fee.

.Matt - December 10, 2014, 11:42 pm

All the pools are hosted on OVH (which has decent protection) - I can speak for myself and the others that there have been next to no problems with ddos. Layer 7 Attacks have happened every once in a while but other than that the downtime due to ddos is probs 0.001%.

Doctor Blue - December 11, 2014, 3:47 pm

NOMP does a pretty good job at banning DoS miners, OVH takes care of the L3 attacks which leaves us with web attacks.

They can be mitigated, but honestly there's no reason to really care. Personally I'm shaping traffic and limiting off the webserver so even though the web service would be exhausted there would still be room for stratum and workers to function properly. There are snort filters for RUDY, ARME and similar attacks but I haven't been bothered to set it up, as I don't deem it necessary (It hasn't been a problem since the launch of OMCv2, really).

Moon Rock - December 12, 2014, 3:37 pm

I tried to check the charts out and the max you can view is 1day and the chart isn't even loading for me at all.

Abraham Lincoln - December 12, 2014, 7:09 pm

That's just the amount of time between data points. You can view months worth of data at a time.

I'm not sure why but the API was acting up. It's been fixed and is now working again.

Abraham Lincoln - December 17, 2014, 1:36 pm

The entire server (including stratum) went down for 1 hour 36 minutes last night. I rebooted and it's back up running again.

Apologies for any inconvenience.

Also since OMC-live has been down I've added in a mining calc to omnichain. Check it out at <https://omnicha.in/calc>

.Matt - December 17, 2014, 1:53 pm

Alright. I was planning on making all the other data the site had available on Omnichain as well, but since you are planning on fixing it I guess I won't.

Please go ahead with them. I'm sure you can make them way better anyways :)

ali?n - December 17, 2014, 6:10 pm

Im glad that there is an online Omnicoin wallet. I can't download the original omnicoin wallet. ?

Abraham Lincoln - December 22, 2014, 9:01 pm

I just added a Mining Profitability calculator to the [tools page](#).

Simply enter the price per GH per day (and optionally the difficulty and exchange rate) and it will calculate the profitability.

100% profitability = break even.

200% profitability = double money

Enjoy!

Aceman - December 23, 2014, 9:42 am

Fantastic! Thank you very much for adding this tool Abe. ?

DamienVC - December 25, 2014, 8:28 pm

Is there a way to recover our passwords? I forgot mine xD

Abraham Lincoln - December 25, 2014, 8:36 pm

(Dec 25, 2014 09:28 PM)DamienVC Wrote: [\[CITE\]](#) Is there a way to recover our passwords? I forgot mine xD

As of right now I don't have an automated system setup. I'll send ya a PM with some info on how to get it back.

EDIT: Issue resolved.

Shed - December 27, 2014, 8:24 am

Just signed up today.

Hope don't have any issues with this wallet!

Abraham Lincoln - December 28, 2014, 6:40 pm

Just pushed an update to the site.

There is now an account page on the wallet where you can change your password and link an email to your wallet. This will facilitate password recovery (which will be implemented soon).

On the backend I've started setting up a system that will facilitate 2FA via email or authy (which will be implemented soon). I've also added in a backend emailing system. Expect some new features to

appear (like notifications when you receive OMC) for wallets that have emails linked soon.

My Grandad Bombed Asia - December 30, 2014, 5:46 pm

Can't people just exploit this like they did the other online wallets?

Abraham Lincoln - December 30, 2014, 6:26 pm

(Dec 30, 2014 06:46 PM)TheSlipter Wrote: [\[CITE\]](#) Can't people just exploit this like they did the other online wallets?

No. The other online wallets used the account feature within the wallet for calculating balances and sending. All of the funds were shared. So when a private key got leaked the entire wallet could be emptied.

This wallet does not use the account feature for calculating balances and the funds are not shared. That means that private keys can be used like normal with zero risk.

Feel free to check out the source code to see how I accomplished it:

<https://github.com/Omnicoon-Project/omnichain/blob/master/theme/safe/pages/api.php#L173>

Abraham Lincoln - January 15, 2015, 12:12 pm

@omnichain is the official twitter account for Omnicha.in. I'll be posting updates about the site along with other information.

<https://twitter.com/omnichain>

Abraham Lincoln - February 4, 2015, 5:32 pm

The pool and wallet have been updated OmniCoin V2 0.9.0.0, making the site ready for the new DGW algorithm! Get your miners ready!

marcetin - February 6, 2015, 6:54 pm

Hello all,

First of all I need to ask is it ok to reuse source of omnicha.in?

I am trying to setup this block explorer to one other coin using source from github but I have difficulties as some of files are missing.

For now I have succeed to find db.php and wallet.php on github, so somehow I made up to run front end, but all data I get is just node list in footer. Obviously need database structure to setup and some files for main cron jobs which will fill databases.

Is there any chance I get some help?

Thank you in advance. :)

PS: Sorry if this is little off topic but I have not find any other way to ask this.

Abraham Lincoln - February 6, 2015, 8:16 pm

Although I never intended for it to be done, yes it could be done and is allowed. Because of this though I haven't documented any the server backend / setup.

It could be done, but it wouldn't be easy.

If you just want to get something up quickly, I recommend you check out project Rackle:

<https://github.com/DoctorBlue/Rackle>

It's good block explorer and includes setup instructions, although I doesn't have as many features.

marcetin - February 7, 2015, 7:34 pm

Thank you, this is for real more complicated than I though so :)

Abraham Lincoln - February 10, 2015, 1:11 pm

With all that is currently going on, I just wanted to let all users of the OmniChai.in wallet know that your accounts are safe.

The attack that was performed on AllCrypt cannot be performed on our wallet.

Abraham Lincoln - February 18, 2015, 11:37 am

Well, MPOS is having a fit over the rollback. I've disabled mining while I clean it up.

I'll get this resolved ASAP.

EDIT: Well, MPOS really hated that rollback. I was forced to truncate the DB. Everything except for users was deleted. Basically all stats are gone. All account balances have also been set to zero. I've updated them and they should all be correct. PM me if you think there are any errors.

Mining is resumed as usual though.

Just added a pretty cool feature, a wallet finder. Simply enter an addresses and you can find other addresses in the same wallet.

It's won't always find all other addresses, but if they have been used it most likely will.

Check it out at <https://omnichai.in/tools>

I found a few more transactions that made account balances incorrect. I've credited everyone now. If you believe your balance is incorrect, please let me know ASAP.

mti1993 - February 24, 2015, 2:49 pm

What's wrong with the pool ??

Also this

Abraham Lincoln - February 24, 2015, 5:04 pm

Same for me! Can confirm.

Underd?g - May 7, 2015, 6:07 am

Site is down.

Hopefully it's up and running again soon.

Abraham Lincoln - May 7, 2015, 7:51 am

I'm not sure what happened, but I rebooted the server and it's back up again.

It went down at 04:24:31 AM CST and I didn't have my phone with me to notify / wake me of the issue. Only had 5 hrs, 23 mins of downtime.

It's back up and appears to be running fine again.

Sorry for the inconvenience.

PedoOpa - May 7, 2015, 7:52 am

Ok everythings back to normal now THX!

Mining also works again!

severos - May 7, 2015, 1:27 pm

Do you have any estimates on when the stable version of API will be released??

Abraham Lincoln - May 7, 2015, 1:38 pm

(May 7, 2015 01:27 PM)severos Wrote: [\[CITE\]](#) Do you have any estimates on when the stable version of API will be released??

I plan to come out with an entirely new API for the site that will come out when the site overhaul is done. I've worked on it some but haven't gotten around to finishing everything. I might get it done sometime this summer, although it depends greatly on my workload.

If anyone wants updates when updates are made to the api, you can subscribe here: <https://omnicha.in/api/updatesub/>

severos - May 27, 2015, 1:27 pm

I'm having problems accessing the website without my browser, I'm using Ruby, tried both httparty and net/http to load the website but both are giving me errors when using https, using the api in http mode worked once, but I can't get it to work again (no idea why).

The error I'm getting: Code OpenSSL::SSL::SSLError: SSL_connect returned=1 errno=0 state=SSLv3 read server certificate B: certificate verify failedIs there something wrong with the SSL certificate or what???

Thanks for your time.

Abraham Lincoln - June 4, 2015, 9:18 am

Pool stats became "stuck" earlier this morning. I've refreshed them and the pool is running smoothly once again.

No hashrate or OMC was lost. It was just a frontend glitch.

opcodesu - June 4, 2015, 4:55 pm

where can found more information about this coin? i never heard about it before

severos - June 4, 2015, 9:30 pm

You can find pretty much lots of stuff in those 2 links

<https://github.com/Omnicoind-Project>

<https://github.com/Omnicoind-Project/Omnicoind/wiki>

Is there a way to be allowed to generate more than 1 address/minute from the API calls?

I'm trying to build a website that'll need an OMC address for each user, so is there a possible way to do this? or I'll have to queue them on server and generate one by one?

Doctor Blue - June 5, 2015, 5:20 pm

If it's just for recognizing payments then you should be using a more suitable solution like Coinpayments' IPN service. You can also handle everything yourself with omnicoind.

FRANKIE - June 5, 2015, 5:21 pm

Just getting everything finished and set up to start mining again

severos - June 5, 2015, 9:36 pm

If I have to relay on omnicoind then I'll need to get a server that allows running it to use my scripts, I'm not sure about Coinpayments' IPN as I've just taken a fast look at it and it really seemed complicated, all I really need is something like blockchain http notifications :/

Projec7 - June 6, 2015, 3:04 pm

Made a wallet. Like it a lot.

Abraham Lincoln - June 21, 2015, 12:18 pm

The crons got stuck early this morning and I just finally got time to fix them.

Everything is running like normal again. No hashrate was lost. It was just a frontend error.

Apologies for the inconvenience.

Abraham Lincoln - July 9, 2015, 5:57 pm

Looks like OVH is having an outage. My servers are down, and even pool.omnicoin.cc is down.

EDIT: We're back up.

Abraham Lincoln - July 20, 2015, 11:09 pm

The site is now fully running through Cloudflare. Unfortunately this means that the old pool DNS record won't work anymore. The new address to point miners to is pool.omnichain.in:3333

Hopefully this won't cause more issues than it will fix.

SIM-2015410 - July 21, 2015, 10:10 pm

The thread title still says Casino so you should probably add a casino to your site again soon :P

Abraham Lincoln - September 27, 2015, 9:24 pm

Ever since I moved to Cloudflare DNS I've been having a lot of issues with the URL structure on the site. This caused connections over SSL to be dropped and broke the CSRF check on the pool most of the time.

I just sat down and fixed it all. All urls are now forced to non-www and forced to use SSL (except for the API). The CSRF check is also fixed on the pool.

If anyone has issues, let me know. Hopefully I didn't break anything.

Abraham Lincoln - November 19, 2015, 4:35 pm

Well, I got a free month of hosting due to OVH's SLA. The server / official node will expire on January 05, 2016.

Abraham Lincoln - November 24, 2015, 8:34 pm

As of 11/18/2015, official support for Omnicoin has ended. OmniChain will be shutting down on January 5th, 2016. Please withdraw your coins from the online wallet and pool. They will not be recoverable after the 5th.

Abraham Lincoln - December 14, 2015, 8:42 pm

I've come to an agreement with [Magainmann](#) to keep Omnichain running. He will continue to pay the bills to keep the site alive. He may at some point take over full control as well.

So the January 5th date is no longer applicable. The site will last at least that long, but it's up to him to keep it running past that date.

Magicmann - December 15, 2015, 12:41 am

And thanks Abe, for the hard work you've put into making Omnicha.in. It's a fantastic service, and if this coin is going to survive, Omnicha.in is definitely going to help it.

Bulgarian - December 15, 2015, 11:33 am

If Omni says it's dead... [POST](#)

How can I make an account for the pool in omnicha.in? Also can you make an English version of the video explaining how to sign up and verify your Omni address?

Magicmann - December 16, 2015, 12:42 am

Omni didn't specifically say it's dead. He said that official HF support is no more. You can't just shut off a cryptocurrency. As long as there's a people supporting a cryptocurrency, it can last.
