Make a !say command, like we can use it to send messages to a skype user, Example: !say skypenamehere that would be awesome, but other then that loving the bot so far.

Massive vouch for this guy! Amazing bot and really fast, it responds almost immediate!
Best bot for \$5, best available to be honest. You can add your own commands with ease, just need a little knowledge about python.

Overall the bot is really nice, works efficiently and is cheap. Don't hesitate to buy this!

His bot are so beautiful I nearly urinated myself. I spent 3 weeks without eating or sleeping in order to simply use this bot in awe. I've taken LSD, but nothing compares to the astonishing power he has

produced with this bot. Props to ArtMachine. One day it would be an honor to meet him.
