Thread: [Does Adsense Accept .io Domains??](#)

DAFUQISTHISSHIT - December 5, 2014, 7:01 am

Hey guys!

I recently just bough a .io domain and I plan to use it with adsense. However im not sure if adsense accepts this domain extension

Have any of you got a .io domain and adsense on it?

Thank you ?

Google does not specifically publish a list of domain extensions that are not allowed. Therefore, you should be able to use it provided it has legitimate unique content.
