How come i actually got the exact same program? Haha?
It's working though, Vouch.

One thing: Can you add a function to the combolist maker, where it actually duplicates the username, with a : between both lines?

So it will be like username:password , instead of just username.
Thanks

Hmm found out about 50% of the time, whenever I try logging in via the official client, it pops me the "too many incorrect passwords entered, please try again in 60s"

But I still get more accounts, which is weird :P

Now at 8 level 30's, I love this :P

2 weren't secured so I managed to get them on an email of mine :)

For anyone wanting accounts, simply send me a pm and I'll send one your side :)

Update: Currently at 20ish accounts, 6 weren't email secured and one among them was inactive for over a month :D

I love that software :P

I've gone through 1,500,000 accounts on NA. Got around 200-300. Sadly every single one of them that is over level 20 is email verified. If anyone can find a way to bypass the email verification this would be crazy. This program is amazing at getting into accounts, however changing the passwords to make them yours is difficult/near impossible right now. Hopefully things turn up in the near future! This program is beast though.

None the less programs seems to work great.
Super secret spot. I would tell. But I want to go through all my accounts first, and all the ones I want xD Then ill let people know heh.

I'm getting a Bronze 2 atm, but it has all the champs and 9 rune pages.
Fine for me since I'll just rank it up to a higher rank lol. >.>

Also since that last post the amount of plats and golds I have gotten have like doubled ish. lol

Mind you I haven't found anymore diamond accounts :(Guess That one was just luck.

this method doesnt ban ip addresses.

WOLF3 - December 22, 2014, 10:35 pm

Then why did I get up banned from league :P

What do you mean? Please explain or pm me

Known Alias - January 10, 2015, 9:24 pm

Still for sell guys working great!! Buy now :)

MalformedPatient - January 14, 2015, 7:40 pm

About to buy...will post results after a night or so of cracking.

MissingN?. - January 14, 2015, 8:31 pm

Vouch for Known Alias, got 3 Diamond accounts from using his cracker but felt bad so I told them to change their passwords.

MalformedPatient - January 16, 2015, 8:03 am

I've ran about a little over 1 million in different combolists...haven't gotten anything. Could it be that my RDP got ipbanned or something?

dragonmage70 - January 16, 2015, 8:48 am

Is there any chance of this getting proxy support? Cause riot will most likely ban ips after a while.

Yep, my RDP is saying invalid for everything. Even my legit accounts that I tested, this thing needs

proxy support or it's useless.

Known Alias - January 17, 2015, 1:23 pm

no need for proxy support because to most likely never get banned with this method. Also what kind of combo did you use for 1 million? Scraped? sqli your self or old leeched sqli? or what

Garden of Sinners - January 17, 2015, 4:32 pm

Just bought this. I'll be testing it out shortly after although proxy support would be nice :)

Edit:

9162 invalid, 0 valid, 0 transfered, 0 banned accounts. What a shame.

But this account checker is floating around the net for free.

If this is yours it got leaked along time ago.

anyway

GLWS

It's got netseal on it, so somebody would have had to crack that.

it was cracked when the original owner had it but the difference is that NA doesnt work on the cracked one

Wrote: [\[CITE\]](#) If you didn't already know, Netseal is easy to crack. does not matter about netseal it was never made to be as a protection product but as a license system. If netseal was compatible with other languages for example ubot custom script it would be a lot harder to crack. Its all about obfuscation. Even tho almost all public obfuscation methods are crackable.

It's not working for me at all, I think it's broken.

5h1t_warrior - *January 30, 2015, 7:25 am*

this is not working for me anymore will there be a fix?
