Malware Guard Theme [10 shitty component]

Oh what is Malware Guard (I want to create anti malware program and something cool name came out on my mind) , that's the name of my shitty project. I know that it will be useless because I am always a newbie

LIST OF COMPONENT :

[3] Button (blue,white,green)

[2] Panel (one is clickable , other one is passive)

[2] Label

[1] Separator

[1] GroupBox

[1] ComboBox

SCREENSHOT :

I am a newbie user that is nobody@hf , that's too mean .

Can someone reply this link <http://i61.tinypic.com/68t3ib.png> remove parenthesis as image so viewer can view my theme ? Thank You ?

LINK :

<http://pastebin.com/HArN18iy> remove the parenthesis

Here is the image guys.

Not a huge fan of it, but keep going! You will get better. :)

Rhez - December 6, 2014, 5:57 am

Thank You @Earn

BTW , what do you mean of "not a huge fun of it ?"

SaketSaket - December 6, 2014, 6:14 am

Nice start with themeing. Keep coding keep sharing.

1) Instead of using roundrect function in each control class just put it at top of the file within module & use it.

2) You are not disposing where necessary.

3) Instead of creating 3 different button controls just allow user to change colour in one control.

I am not expert but i am just telling you which you can improve.

Regards
Saket

Just added some suggestions too, please check it ;)

Rhez - December 6, 2014, 6:28 am

AHAHAHA.

Thanks for your suggestion.

on your 3rd suggestion how do I do that ?

Earn - December 6, 2014, 6:31 am

You should check out MSDN's [Properties Overview](#) documentation.

check theme made by Hawk HF - <https://hackforums.net/showthread.php?tid=4471197>

He has written code to change the colour ;)

Rhez - December 6, 2014, 6:41 am

Thanks for all the tips SIR .

I think this is enough for to day . Gonna go to sleep . It's already 10:41 PM here (Philippines, +8 GMT)

SIM-1847363 - December 6, 2014, 8:29 am

If its your first or second time editing or coding in gdi i think you did well. Maybe to help improve your skills try to copy a UI from a Image or maybe a application.

Rhez - December 6, 2014, 2:55 pm

Yeah , it's my first time . My first time to release a theme :)

Thanks for the advice . Gonna do another one

ShockeM - December 6, 2014, 4:02 pm

Not my favorite theme but good luck and keep creating!

Rhez - December 6, 2014, 6:11 pm

What do you mean at "Not my favorite theme" ?

(Dec 6, 2014 05:02 PM)@Castiel Wrote: [\[CITE\]](#) Not my favorite theme but good luck and keep creating!

Sir Earn also reply on this thread with "not a huge fan of it"

I don't get it ? . Is the Flat Style of the Theme ?

nuk - December 8, 2014, 9:34 am

Not too bad at all really... I have mixed feelings on this one... Good job though ;)

Aristocles - December 8, 2014, 9:58 am

Looks like a bunch mix of some themes. And colors doesnt match at all (especially the button's color)

Rhez - December 8, 2014, 5:05 pm

AHAHAHAHA.

Gonna create my own theme . Thanks for the comment

AntiHacker - December 8, 2014, 7:33 pm

keep going brother looks nice!!!!!! thank you so much op

Miserables - December 8, 2014, 8:59 pm

That's seems promising to me. I will download the theme.

Swagalistic Meow - December 9, 2014, 4:29 am

The theme is ok not in my liking but it's good for a newbie :) keep up the good work
