Pudge the Butcher - December 7, 2014, 4:50 am

Hello my Fresh meats ,

Ok straight to thread ,

as i promised that i will make application for "[TUT] Crash your friends Whatsapp Instantly (whatsapp exploit 2014). [TUT]"

tested on all versions of WhatsApp and also 2.11.431 , 2.11.432 , doesn't work on windows 8.1 and 2.11.468, and i dnt have iphone so i dnt know about iOS.

So here it is :

Step 1 : Download the MSWhatsapp Crasher APK . Click [Here](#)

Or

<https://www.mediafire.com/?ao3niugrglbtzpm>

Step 2 : Click on boom and select The victim

Step 3 : and boom victim Whatsapp is dead . Check out the images for Reference

I hope you guys like it . it took me 10 min to code this .let me tell you something its a hell of a fun if you post this on any of whatsapp groups, Result : they all get crashed and they can not open that group until they all leave.

Thank you to view my thread , u can donate me ur fingers if u want .

Thank you to view my thread .

Yap but it will crash your whatsapp only when you open the bombarded conversation , else it will be good , just delete the conversion with your victim or just let it be there . Whatsapp will crash only when you open the bombarded Chat

So if I just delete this chat log I will be fine

Well. The text was working 3-5 days ago. I think whatsapp fixed the bug. Because it is not working anymore
