Thread: [How To Delete Temp Internet Files/Cookies/History/Form \[Tutorial \]](#)

Swagalistic Meow - December 9, 2014, 4:18 am

Each Of these require One Button
Unless you use the Delete all code.

'Temporary Internet Files

System.Diagnostics.Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 8")

'Cookies

System.Diagnostics.Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 2")

'History

System.Diagnostics.Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 1")

Form(Data)

System.Diagnostics.Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 16")

Passwords

System.Diagnostics.Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 32")

Delete(All)

System.Diagnostics.Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 255")

'Delete everything – Also delete files and settings stored by add-ons

System.Diagnostics.Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 4351")

I dont see why these require a button? You could do this is the form_load event if you wanted to, or atleast some other control? Go away with your shit tutorials please.

Odus - December 9, 2014, 5:50 am

You are in NO position to teach when you can't correctly prompt a message box. Why are you just copying code into a thread that you haven't even tested? My views are the same as Cookie Monster's.

prompt a message box. Why are you just copying code into a thread that you haven't even tested? My views are the same as Cookie Monster's. Then why bother visiting my thread ? It's for those who need help, And btw it was a simple mistake i forgot the Box but i corrected it. ~ No one's perfect we all make mistakes. ?

My tits are pretty calm. You are just misleading new users very hardly. Maybe they wanted to use a picturebox? Now they're sad because you told them to use a button. Rip in peace.

Kill?Muvz - December 9, 2014, 10:11 pm

You only joined today and you're already so popular. But let me tell you, that's everything but a tutorial.

memory - December 14, 2014, 12:34 pm

Coming from a beginning coders point of view, this doesn't make any sense to me.

Where do I put the code? How do I use the code? These are simple questions that you could ask yourself and answer yourself in the thread that would make it easier for beginners like me to understand.

I understand what you're saying but this stuff (although horribly skidded) isn't for beginners at all.
