Thread: [DigAdz - The best way to earn money in 2015 - Full guide](#)

Cubero87 - December 10, 2014, 1:13 pm

Hello guys, Im here to show you DigAdz, "the new Paidverts", for who dont know how it works, its simple.

You can earn money for free, clicking on AD's, acumulating points and converting them into money. Or you can invest. For every \$1 that you invest they'll return \$1.5 asap.

There's a Level, Points, In team and Earning balance.

Level: For each level you get, you'll receive more money daily. To rise your level, you need more points. This is the level table:

Point Level 1		800 to 4.5k
Point Level 2		4.5k to 10.5k
Point Level 3		10.5k to 22.5k
Point Level 4		22.5k to 45k
Point Level 5		45k to 82.5k
Point Level 6		82.5k to 165k
Point Level 7		165k to 330k
Point Level 8		330k to 660k
Point Level 9		660k to 1.35m
Point Level 10		1.35m to 2.7m
Point Level 11		2.7m to 7.5m

Each point worth \$0.001. They will be converted daily, based on your level.

As you can see in your first page, there are 3 coloured buttons in the right. Green, blue and orange. So you can earn cash value, Bonuses and Points

1. Dig Value

Earn Cash Value with Dig value. This is money!

2. Dig Points

Increase more point to receive large value ads. The more you accumulate points, the larger value ads your account will gain priority in receiving.

3. Dig Bonuses

Surprise! You need to click 10 activate ads to receive a random bonus next day.

If you dont want to invest, click all DigPoints everyday. You can earn 120 Digpoints daily, and you'll start to receive money value AD's when you reach 800 DigPoints.

Check Referral forum for more info!

Spoiler [\(Click to View\)](#)

You do understand how this is an unsustainable business model, right? Do you think advertisers are paying any money to (insert name of whatever pyramid scheme is trying this now) for someone to click their ad for the sole reason of earning money from someone else?

The only place (insert name of whatever pyramid scheme is trying this now) is generating revenue is from that poor sucker who thought it was smart to give money to a company that will "turn your \$1 into \$1.50 asap."

Well that is working with PaidVerts.

For every \$1 you spend you get \$1.55 in ads, and they are working very well. They have just spent several thousand dollars on servers, and have 4 full time developers, plus there is a total amount of around \$500,000 that members have in total, but the site has over a million dollars. So it is possible that this site may work. We just have to wait and see.
