Thread: [My Tutorials and Program Overview Compilation](#)

**FractumSeraph** - December 10, 2014, 10:56 pm

YouTube has decided to suspend my account. Apparently this sort of stuff is too blackhat for them. You may find an archive of the videos [here](#). It requires WinRARv5 or later to open.

Whenever I have free time I make videos over various things on Hack Forums. If you would like your program added to this list, or you have a request, feel free to send me a PM.

**Crake** - December 13, 2014, 4:22 pm

Nice tutorial compilation. Decent quality, though I'd like to see some applied to more LEGAL topics. Nice clear explanation, I'd consider tutoring if I were you.

Would also be interesting to hear you explain a little more (eg on the SMS bombing tut) WHY it works rather than how (discuss how an smtp relay works in layman's terms, etc)

**FractumSeraph** - December 13, 2014, 5:07 pm

Thanks for the input, but I'm not sure I'd want to scare people away. Do you think it would be better to have this sort of information in the videos, or have a separate place for it?

I think so long as you're using relatively simple wording and explanation, it'd definitely improve the videos and not scare anyone off

**FractumSeraph** - December 21, 2014, 12:22 am

I've updated it with a few more videos. If anyone wants to see something here, feel free to let me know and I'll do it as soon as I can.

**GeguHax** - January 5, 2015, 4:10 pm

Can you help me get started in hacking im just asking :)

**FractumSeraph** - January 5, 2015, 5:01 pm

If you can be a bit more specific then sure. What is it you're trying to do?

**HastoDuck** - January 24, 2015, 7:05 pm

Hi Fallen Angel,

I loved your tutorial about IM. I'm just starting using it (and using RATs, in fact).

During the installation, my AV, detects IM as a virus, is it normal ? Should I turn it off during the install ? But will I be able to use it after (or will I have an alert each time I compile a builder) ?

Also, do you know a good server to use and a good crypter ?

Thank you very much for your nice work !

**PwNoGrApHy** - January 25, 2015, 3:27 am

Very nice explained! A great one you have here!

**FractumSeraph** - January 25, 2015, 4:42 pm

Antivirus programs will pick up most of your hack tools as viruses. If you know you've downloaded them from a trusted source, I would add the programs to your antiviruses exclusions/exceptions/ignore list. (Your antivirus ignores whatever you put here.)

What server you use depends on what you need, there is nothing wrong with IM3, but there isn't anything wrong with the other thousand options as well, so that's really up to you.

I'm not up to date with crypters, but last I recall, Krazys Crypter was a good one.

**HastoDuck** - January 25, 2015, 5:47 pm

Whoa !

Good tuts AND fast answers, you're the man of the day !

Thanks !

**FractumSeraph** - January 25, 2015, 6:17 pm

Thanks !

I wouldn't call 23 hours a fast response, but thanks.

I haven't been able to add much recently due to university.

**FractumSeraph** - May 7, 2015, 5:40 pm

UPDATE:

I've added a WiFi section with some videos to get it started.

**Theblacksuit** - May 8, 2015, 2:11 pm

thank you @Fallen Archangel you did a great job with you nice tutuorial compilation

**FractumSeraph** - June 12, 2015, 9:06 pm

I've added a small bottom section for tutorials that aren't really related to hacking, but are things that anyone related to IT should know about. This will be things like Archives, Gayzo, File Recovery/Secure Deletion, etc.

**IronBacteria-GR\_-** - June 12, 2015, 10:42 pm

nice tutorials there and thanks my friend a lot!!!!

**FractumSeraph** - June 25, 2015, 12:20 am

Updated with njRAT. If you'd like to see anything added to the list, please let me know.

UPDATE:

Now added secure file deletion and file recovery to the extra IT stuff.

ANOTHER UPDATE:

Added vProxy and vCrack. Both are paid products, but might still be helpful.

ANOTHER FIGGIN' UPDATE: Suspended account. Added an archive of the videos in case you would like to download them.

**RusselJeckel** - March 13, 2023, 5:02 am

YouTube is a big time diddler network

**unauthorized** - April 7, 2023, 3:05 am

HelloMan23948 - April 19, 2023, 4:47 pm

That file has been deleted, hopefully you can make an update someday,

**t689** - February 6, 2024, 1:47 pm

Files has been delated, please update the links,      Thank you ?

**EightBit Rx** - February 7, 2024, 3:40 pm

Yeah, link is dead. Would be very grateful for an update.

Cheers :)
