This site allows you to get paid to test apps for android, ipad, iphones and more...

It's very simple and easy to use. You can expect to earn \$10 per test, however there are a huge range of free tests that I would advise using as this will boost your rankings and get you invited to more paid tests.

However, sometimes there aren't always paid apps, but this is dependant on the electronics that you have. I would suggest that you don't use this as a quick method to make money as there is a \$50 withdrawal limit, but either way, its quick and easy to test the apps.

Please subscribe to my channel too ?

10\$ per test?

Hmm, welcome to the world of cell phone malware and ..... don't expect payout.

Hmm, welcome to the world of cell phone malware and ..... don't expect payout.

They're a good company, tester pay to use their services so of course this may be the case. I wouldn't want to pay \$20 per person just to put out my malware though.

We don't understand each other. Nobody will pay noone.

Domain will EXPIRE in 1 month.

Contact/Administration e-mail is [info@designingenjorerna.es](mailto:info@designingenjorerna.es) which is on already expired domain.

Go figure out yourself.

Maybe I'm weird but I really don't consider 10\$ or 20\$ a profit if I'm risking 500\$ bill for mobile data or roaming.
