Seller: [Prince Gumball](#)

Price: \$6.98 (As of December 14, 2014)

Sales Thread: [Laquisha SMS \(Click Here!\)](#)

Reviewer: [.Sinister](#)

????????????????

I have received a copy of the product, Laquisha SMS. I might as well let you all know what you're getting when purchasing this product. Here goes my review.

Features10/10

This bomber definitely does work. I tried it a few times on myself to make sure it did work, and I was not disappointed. There's not much to say here besides that. You want to bomb someone's phone? This is it.

GUI

9/10

I love the different tabs in the program. It's not all in one spot. Settings here, bombing there, custom carriers here, it's all organized. Everything is great really! The only thing that bothers me is that I have to erase the default text before I input any information in it. If it was like a textbox where I can just click on it, and everything is erased, that'll be great!

Ease of Use

10/10

This is made so that ANYONE can use it. You don't need any experience to use this program. As long as you have information, you're all set.

Overall

9.6/10

The product works exactly like it promise. If you need someone's phone to be molested, use Laquisha SMS. The program will literally shred your victim's phone. Like always, be careful how you use this. Laquisha SMS has my vouch.

Thank you for offering me this vouch copy. This has been my honest review of Laquisha SMS.

.Sinister APPROVED ?

The reason why they say it's crashing is because they don't fill out all the things they need to fill out before they click send c:

Man who the hell has time for that. XD

But, honestly, I hope in the future you can add or change the spamming feature to only random numbers or both emails and numbers (not simultaneously)

Paid for it, tried it and the carrier (which was supposed to work) didn't, so they included a carrier in the list that didn't work. Asked for a refund since I just bought it because of that carrier and the product DIDN'T work. Here's what I got: <https://gyazo.com/4d3934c5dafa94e1e967dbefa62aa271>

Hope I can solve this...

Dude, it says no charging back and you charged back.

I told you I wanted to give you a refund but I need to buy christmas presents for family right now and I told you I wanted to give you a refund.

Maybe if you had waited till christmas was over, and I had gotten my family some presents, and was able to afford a decent christmas, I could give you your refund. But you charged back so I shouldn't have to give you jack shit now.

it says all the carriers listed work and they don't. Don't lie while trying to sell something. I paid for that carrier to work, but it didn't. Not to be rude, but it's not my problem even if its christmas, I'm not a rich kid.

Neither am I lol. You bought the product, and I said DO NOT CHARGE BACK and you did. Maybe if you where not so impatient I would have gladly given you one because I do not mind giving them out, but right now is not the best time for me to give away refunds.

I asked u for a refund before I charged back, but u refused because u needed the money, quite funny.

FOR EVERYONE WHO'S THINKING ON PURCHASING IT: Even if the carrier is listed it may not work , if it doesn't you won't get a refund because he's in need of money, deal with caution and only from carriers that OTHER users verified. I paid for a carrier that was on the list but it didn't work, now I lost my money because he needs it " more than I do " . Definately deal w/ caution.

Been busy with personal drama and college...but the update is still going to happen. There's no ETA...It's hard to say when it will be done. It will be updated when the update is done. I won't be on much until I finish the update.

But, Here's what you guys have to look forward to:

- Fixed Carrier Support
- Sexier GUI Spoiler ([Click to View](#))[img]http://imgbin.org/images/21805.png[/img]
- Email Save Settings

realrbn - February 10, 2015, 5:14 am

C3XX - February 10, 2015, 5:49 am

Hi, I may be interested but could you please tell me what carriers in the United Kingdom it supports?

Cynn - February 10, 2015, 2:22 pm

Gumball's account is closed so sales are closed!

If a moderator could close this, that would be great

but then the program on the computer crashed.
