Thread: [\[Janus\] SQLi challenge #3](#)

JaNuS18 - December 11, 2014, 1:38 pm

Hi folks,

This is my challenge #3. Previous two were basic for advanced injectors. We were sorting data in DIOS output in searching alternatives for concatenating data there. After that warming up it is time to go to next level ?

~ Task ~

- display version with your name
- display numbered list of all tables in primary database (one table per row)

~ Site ~

aHR0cDovL3d3dy5jaG5yaS5vcmcvcHJvZmlsZS5waHA/cHJvZmlsZUIkPTIzODk=
(Base64 decode it)

~ Proof ~

As this challenge is harder I will force you to change your usual injections - see rules bellow.

~ Rules ~

- complete injection must be done in one vulnerable column
- you may not use concat or any other function with character _ in function's name (like group_concat...)
- you may not use function IN() or Benchmark()
- in your complete syntax command from may be used only once
- your command should work without knowing anything about databases/tables on that site...

Post your syntax to <https://privnote.com> (it is automatically destroyed after reading) and send me link to PM

Let's SQL knowledge be with you ?

Hello Everyone Exams Over xD Thnx For The Challenge

Aakash Choudhary - December 12, 2014, 7:58 am

Fucking Redirection. well done simple injection. Time to done with RULES

r0ml4h - December 12, 2014, 10:57 am

Quote:hey bro, can you check your website, because i get error like this

thanks god, error is gone, i spent 4 hours to build my query and all will be in vain if website target going error

thanks for challenge

Lamer - December 12, 2014, 2:15 pm

LOL this is part of the challenge , try order by 10 you will see no redirection, after for rules things without "_" etc ldk how to solve

You may not use any function with character _ in its name (group_concat, make_set...)...

See the rules!

(Dec 12, 2014 04:02 AM)benzi Wrote: [\[CITE\]](#) nice one, done.

I can't evaluate you as a solver without seeing your syntax?

Lamer - December 12, 2014, 4:24 pm

benzi never send syntax, he think he has rights over people.....:)

See the rules!oops! Sorry :P

Check Now,

Use of From - Once

No Use of Function having ' _ '

Result in One Column..

I Believe I Cleared This :P

Solvers list updated after you corrected your syntax. ?

Rules are there to follow them Rahul. Or skip the challenge. ?

I am fair to all equally. ?

Very nice challenge brother.

Because of your challenge [mainly RULES] i learned DIOS almost in that function.But once again my brother help me to understand that DIOS in that function.

Almost i learned because i am still understanding this DIOS in that function and will do more practice till i become perfect to handle that function

Thanks

Here is my proof

Thank you very much once again ? ? ?

I honestly accepted that i took help. So forgive me. Thanks

Why?

Nothing wrong with that picture in opening post (see bellow). It is visible and site is still vulnerable (just tested)...

Kashmiri Hunter - May 5, 2016, 9:18 am

Thanks Master Janus

Actually Some Time Ago Your Proof Picture was not loading

Now it is fine

Sorry for disturbance
