Thread: [Thinking about opening web app exploitation service \(Website hacking\)](#)

Doxedbywon - December 12, 2014, 11:24 am

I see a lot of false promised services on here
I do not claim I can hack school networks
I do not claim I can hack every website
I do not claim I will 100% be able to do your request

I am willing to give like 3-5 vouch copies.

But, back to my service, I graduated with my masters in computer programming & I know quite a but of web development, I currently work in the IT field

So, I would like to offer my service here, no I'm not upgrading in order to gain trust, I can deliver & show proof before you pay or we can use a MM

I can obtain user databases, access to ACP, Deface, shell & root websites like I said I'm not some master hacker, I cannot hack everything & I will never ever claim too, if I don't think I can even begin to find a vulnerability in your requested site I will honestly & respectfully turn down the job request.

Would anyone be interested in this?

Hazy - December 12, 2014, 11:28 am

A lot of people would be interested in this. You'll have to be able to deliver though.

OK. I call bullshit.
How about I link you to my personal website && you tell me if you can break in?

Alright PM me, like I said I'm not a master hacker, I can only do what I know how too. I'll take a shot at it.

Dubitus™ - December 13, 2014, 7:47 am

I'll believe you. I'll take on your vouch copy, if you're up to it. I PM'd you.

Assault - December 13, 2014, 7:48 am

OP told me he couldn't exploit my website because the layout used bootstrap. <_<"

goodbye.

InspectorGadget - December 13, 2014, 7:53 am

PM'd OP to see if he could get in to either of two websites I've hit before. Lets see what he says.

goodbye.

Can't tell if srs or not ?

Inkling - December 13, 2014, 9:04 am

I'd like to have a vouch copy, think you could hit me up on this?

Doxedbywon - December 13, 2014, 10:12 am

I am with my fiancé for the day, I will respond with my results later this evening.
