EarnHF might do it if he likes it..... HawkHF he may if you pay him or if he likes it. What i'm getting at is if your willing to pay or if someone likes it or you do it yourself.... is probably the only options.

And for me i MAY make it if i'm not too busy, i like it if i finish my work i will give it a go. ;) If you just need help be more descriptive please.

Do you need help replicating that? Completing that? Cleaning it up?

Did you want this to be created for you? Or do you want tips on how to make it yourself?

Be descriptive in your posts. The more you describe, the more we can help you with.

I might do this later.

Maybe.

There are a few others around here that may give it a shot as well.

Great Theme makers of HF avoid using psd in themes instead they do it purely in GDI+ ;)

I will give it a try today eve n will post in tonight.

This.

I rarely use images in themes, with the exception of check marks in checkboxes.
When recreating a theme, the only thing I require is an image of what should be made.

You didn't ask for many controls here, so I went ahead and made it.
It only took about 45 minutes, so its no big deal.
