Earning DOGE Fast!

Hi guys! This is just a little explanation on how I earn Doge so that I can convert it into BTC. As we know BTC is become impossible to mine recently and sometimes you earn less that a cent a day! Now I have a shit computer for mining so this obviously isn't my main source of income but I get around 30p a day off my CPU alone since my GPU is integrated I can't use it. Now lets say you have a new computer, less than a year old, you can pick up round about a 1\$ worth a of doge a day if you have a very good GPU. Since mine is around 4 years old now, It's shit and can't compare to that but yours probably can!

So here is where Cointellect comes in! You can earn money off mining off your CPU and GPU at the same time and it will sort out all the business for you so all you have to do is get an account and download the miner and it will be sorted! But the problem is, how do you get an account? I've made it simple for you in fact! You require a invite code to join cointellect so just drop me a PM and i will send you an invite code! Does that sound good? I expect to see you in my PM box!

Thank you for reading!
Have a nice day!

I'll try this out, why not. ?
PMing you now.
