Thread: [Onlykl Theme as requested by Onlykl](#)

Hawk HF - December 13, 2014, 3:03 pm

Onlykl asked for a theme to be released here, and I said I might create it for him. I didn't expect people to be waiting for me to release this, but anyway, here it is.

Also, if you're interested in the warning icon, you can [get that here](#).

Enjoy.

Damn, looks pretty schmexy. I didn't know you could even make something this nice with .NET

wezli - December 13, 2014, 3:58 pm

That's pretty cool.

Can't you just use Win + L for this though?

Nope for RDPs :) Since I'm cracking them and some users cant change pwds so i protect them with this tool! :)

HAWK like always incredible work!! I might contact you very soon with something much cooler :P

Easy now, haha.
Free public themes aren't something I do every day.

Tbh, I'm not sure why I made this one.

cunstructive criticism

You forgot to change the form border style to none, warning triangles instead of circles. You need to fix the font it looks pixelated.

Everything you just listed was done on purpose.

The original version did not have a form border and the circle was ugly.

As for the text I don't see what you're talking about.

I'm at a party and you're killin my buzz. ;)

Yea sure man.

Its a public source. Do anything you'd like with it.
