Remember, there was a misunderstanding, haha. I forgot to reply to explain I didn't want #hero as a subtitle. I just liked that design, so I was explaining to you that I wanted the one that looked like "#Hero".

Are you able to draw/create Anime-like avatar(s)?

I can provide some concrete examples and/or ideas of what it could be like.

The issue with my current ones, is that they are literally taken from existing content and edited badly with paint.net by me, so i wish to have my very own one (until someone copies it heh).

Sadly I cant create anime characters :(I could only render out content that is already out there and make you an avatar
