v1.2 Update:

- # Private Licensing System
- # File Cloner
- # Fixed some bugs

vaan - December 14, 2014, 7:56 pm

How does licensing system works? Can i run it on different unit?

licensing system limit is 2 pc.

You create an account and receive serial number from me after you buy.

Soon the price will rise

GenericSkid - December 30, 2014, 8:36 am

Is that just a (kinda bad) recolor of the old Predator Pain?

Yes, it is! ([Click to View](#))

[img]http://a.pomf.se/xderju.jpg[/img]

OP, can you explain this?

the skin looks similar because the graphic mader is the same guy who made pp styles,
The codes/hooks are private and made by me.

Last week for the Christmas Deal!

I don't mean to be rude but this is awefully weird. You're saying you contacted the guy who did the PS for the original Predator Pain and he gave you the recolored image with your product name, but then neither of you decided to keep the graphic consistency and changed the buttons, textboxes, or checkboxes?

And the image in question, why are the borders blacked out? Is it just artistic license? I would hope not because it conflicts with the rest of the thread design.

On the point of the source, I cannot claim anythibg since I do not have a access to the program or its source. However, I still stand by my assertion that this is really sketchy.

Edit: I'm not asking for it. I'm just stating I can only comment my suspicions. I have no solid proof.

Edit: <https://hackforums.net/showthread.php?tid=246027> : Op you a multiaccounter too?

Edit 2:

Seriously be careful what you are doing on HackForums and what you are selling, people on here can find out anything.

This so much. If you're gonna do something stupid, at least try to not suck at doing it.

Build a binary and upload it for us to check, if it is custom-made as you claim, we should not be able to find any similarities.

I know that someone in fact leaked the Predator Pain Source in question on another forum, including the complete project, so...

Demon?A?sylum - December 30, 2014, 9:43 pm

I'm not gonna prove anything to you

And I'm not gonna make binary specially for you.

you are not one of my customers , no one tell you to buy my logger

Valak - December 30, 2014, 10:54 pm

bought it yesterday, pm sent waiting on reply

Lucid - December 30, 2014, 11:55 pm

Is this FUD? Watching this thread to see more about the product and see how it does.

Demon?A?sylum - December 31, 2014, 12:26 am

No the logger not fud curretly now is 10/32 you can use a crypter to fud it.

Password is inside the keylogger, meaning that it can be stolen.

In every keylogger you have inside for this you need a crypter

drakZZZPT - September 6, 2015, 12:23 pm

Vouch for this guy and the logger!

I love this Logger, it's simple and easy to use, thanks for support!

legendaryzones - May 18, 2016, 8:29 am

Is this still good? This thread seems outdated.... If you are still providing support for this.. Please update the payivy link so i can purchase as it seems like a good one
