Thread: [Get \\$5 PayPal - Post a Forum Name - POST TO JOIN - EVERYONE](#)

Pixel5816 - December 14, 2014, 12:21 pm

So we (I and someone else) are making a forum. It will have sections featuring beginner and advanced tutorials for all sort of programming languages, art styles and graphics etc, a marketplace and gaming (a lot of forums on game server management).

We need a decent name for this. If we use one of the names that are posted below, the poster of that name will have \$5 PayPal sent to them (I'll PM you).

Post one or more names to enter; the .com and .net domains must be available!

<https://www.namecheap.com/> - Check availability.

Thank you for participating! :) ?

To be more unique, try a name starting with a catchy sounding word or color from another language, such as "MaviForums" rather than something like "GeneralForum" or "RelaxForum".

Maybe the board's theme colors could then fit that name, such as a nice shade of blue for

MaviForums.

We have chosen a name, which is pixelboard.net.

Thank you for the entires :)
