Thread: [Snowing Avatars - Get yours now! \[Till 22nd\]](#)

Hydra - December 14, 2014, 1:08 pm

Look at my beautiful avatar, want one like that?

Post here and I will take your current avatar and add snow to it. Due to file size limits, I'm restricted to 10 frames so I don't exceed it which causes a slight jitter when it loops.

I made a template out of it so I just replace my avatar with yours and export to Photoshop from After Effects and turn it into a GIF. Due to this, your avatar MUST be 120x150 or it will get cropped(if smaller, it'll be fine, it won't enlarge).

I'm doing this until the 22nd of December so that gives you all about a week to post a request.

Requirements:

+Must have at least 1 reputation;

+At least 200 posts.

It'd be awesome to have one Hydra, could use a little snow.

Mind making it fall slower though?

?Darky - December 14, 2014, 1:28 pm

Cool service but snow animations are hard to make it flawless gl anyways ^^

Regulus - December 14, 2014, 1:29 pm

Would it be possible for me to get one of those? Would be awesome if you could slow it down a bit as well, :)

?Marshm allow - December 14, 2014, 1:30 pm

I would love this if you don't mind doing it! Thanks :)

I can slow it down but you'll see a jitter when it loops again much harder than when it is fast.

That'd be awesome if you could do that. Give it a try i guess hehe :)

Fish - December 14, 2014, 1:50 pm

would you be able to do one for my signature and one for my avatar? if not just do my avatar thanks!

?ã?ž?@ - December 14, 2014, 1:52 pm

it kind of looks like it flashes white. If that flash was gone it would look even better.

B?STILLE - December 14, 2014, 1:54 pm

I'll take some snow, thanks hydra. Looks great.

Saint - December 14, 2014, 1:57 pm

Can you make me one, but one that is not going as fast as yours and Regulus's thanks in advance.

I can mess with the speed to reduce the flashing. I didn't spend time fixing mine up so it looks shit, but as you can see everyone elses, I tried to vary it but there always will be a jitter that makes the "flash" you're talking about.

Best I can do, any slower and it just looked horrible.

Damn, your GIF's length is too long.

It exceeds the limit so not really unless I reduce quality.

Grin - December 16, 2014, 7:17 pm

Fix your title. It says snowing avatars, but I think what you meant was, seizure avatars because quite frankly, that's what I feel an individual with epilepsy would suffer from after viewing your avatar.

'Soldier - December 16, 2014, 7:18 pm

That's the best I can do, I increased the speed to prevent a jitter but some members are fine with it so I slow it down anyways.

Hydra - December 21, 2014, 5:06 pm

@Encide, I had to shorten your avatar's length which cut out the fade-out.
