Hey, put he's UID in the title, and format it more like this:

Scammed by xVulnerable | UID = ???? | \$85

Also without screenshots, we cant do nothing.

Personally dealt with xVuln and I don't think he would scam tbh, seeing how disrespectfull you are in the chatlogs I wouldnt have supported you either.

Wait patiently for him to reply and don't spam him, people got other stuff to do aswell.

Why are you uploading on distributing sites like Virustotal? No shit the stub gets detected. Moron. Morons like you are distributing the stub thus it getting detected so why are you crying? Not only you fuck up a FUD stub, but you are also breaking the TOS. jSpy is also updated to FUD on major detections, which means jSpy will be reFUD soon. It is virtually impossible to stay FUD 100% all the time.

"You will not scan/upload jSpy files on distributing websites such as Virustotal."

Yes I terminated your license for breaking the TOS.

You also claim jSpy does not work, where is the proof? Yet I had fully set it up for you on teamviewer so stop the bullshit.

Sorry OP but I will not pay for your ignorance.

"It is virtually impossible to stay FUD 100% all the time." No its not impossible. I know how to make things FUD for months, but it costs alot. You should say to him properly that he should not scan in virustotal, i know that Virustotal distributes more than Kim Kardashian's * Video. He paid for your RAT therefor you should also give him a nice service even though he is not 'skilled' in these things. In your thread it also stated that its 100% FUD, it already had detections before he even bought it.

I do see that your ToS does say to not scan in those sites, but people like him do make mistakes, It happens.

You and OP should try to solve it together, not to start a argument. This is why the deal dispute forums are always full and there is nothing we can do about it.

This is a example on why software/ebooks get cracked and leaked.

Spoiler [\(Click to View\)](#)

Most people care for revenue, but what makes revenue is service.

I am not on both OP or your side, but if he really did break the ToS then there is nothing we can do.

Kongou - December 15, 2014, 4:31 am

I'll be honest, I gave him 90 USD, and his rat and support are just shit lol.

Hakuna Matata - December 15, 2014, 5:49 am

jSpy is the worst RAT I've ever used.

None of the functions work, the stability is terrible and it's not even FUD.

And there's no support at all. The owner of the product will only respond to sales related issues.

Good luck with this.

2073436 - December 15, 2014, 5:51 am

I actually got scammed too by him. He's just a money whore. Lost \$65 to him.

Lalit fixed my rat for free.

Bought his lifetime crypter and he deleted me on skype and all the files he crypter are not fud.

Lexica - December 15, 2014, 6:18 am

Jspy barely works for me anymore either, watching webcams and disable webcam lights barely work. Keylogger is crap, it's never FUD anymore, there is always two or 4 AVs that pick it up. Support is horrible, I recommend Lizard IRC botnet to be honest, almost like a RAT with a side of a Ddos tool in their. I lose slaves after they connect immediatley, or It says I have 1 connection but no slaves on my GUI. Sad really, I bought it a few months ago when it was working fine and I got slaves daily.

And I dont know Virustotal sending out of about

I first scan Razor scanner this rat even not working.

DamienVC - December 28, 2014, 11:11 am

Seriously, this thread just made me realize how STUPID you are.

Even though it is around 10 days old, it is a matter of concern.

As per jSpy Terms of Service;
You will not scan/upload jSpy files on distributing websites such as Virustotal.

And if you break any ToS (as mentioned in the Terms of Service)
If you do not follow our TOS your license will be terminated.

And as per jSpy's BuyNow Page:
"By purchasing you accept our Terms Of Service"

You are a disgrace to mankind; your illiteracy makes it more disgraceful to see that you are on Earth. You are just a waste of oxygen; people like you even might be the reason for fucking global warming.

Its known that VirusTotal is a fucking distributing site that fucks up any FUD stub within days of a single upload, yet you are a fucking spic to use the same site?

If you did it on RazorScanner, then where is the fucking link?

Seriously, you not only fucked it up yourself, but you fucked up the whole stub so that everyone

else now lost the FUD status of their stubs as well.

BlackWidow123 - *January 2, 2015, 6:04 pm*

Unfortunately JSpy was the worst decision I made in my whole life. Did nothing with it. Its not even working and it was immediately detected as a virus by antivir. Goodluck. Dont buy this Crap, I am dead serious. Go for a real RAT like jRat if you need cross platform. Thanks for not paying people back their money xVul ;)
