Thread: [Undeclared Identifier WTF !?](#)

YoungHacker - December 15, 2014, 3:44 am

hi,
i was/am using VC++ 2010 and getting error 'undeclared identifier' for cin and endl (might be getting for cout too lol) so i used 'std::cin' and i get another error saying 'is not member of std'?
such BS is the reason why i gave up using VC++ some time back ._. why cant it be as normal as turbo c++ or something
what am i to do? :/

and no i didnt miss <iostream>

Trip2nite - December 15, 2014, 4:00 am

Please post some code.
Will make it much easier.

Number one. Why would you be using VC++ 2010? Isn't 2013 out? Oh wait a minute, you are referring to Turbo C++.

YoungHacker - December 15, 2014, 8:38 am

Oh its solved :D
Stupid mistake from my side lol

And if VC++ 13 is out I should use it?
I have no time lol (till march)..and using 10 because I have to

No, stick with 2010, it only lacks the support for all of the newer language standards that 2013 has.
???
