Total of 42 people.

Post #32 was selected randomly.

Proof that #32 was [bro?](#)

He has 24 hours to respond to my PM to receive the award, if he doesn't respond it will be re-selected.

Spoiler ([Click to View](#)) Due to the Christmas spirit I figured I'd do a little giveaway to say thanks to the community. I currently don't have much to give as I don't have any current services on Hackforums until later next year.

Basically, I want to involve everybody with this giveaway and require nothing in return. Meaning, you don't have to put an obnoxious signature on just to have a possibility of winning. Anyways, you'll have a choice of the following:

- L33T upgrade (non-upgraded members)
- UB3R upgrade (If you're already accepted)
- Gift award (Any member)
- \$20.00 in PayPal.

There will only be 1 winner as I'm not made of money. The winner will be picked in a few hours, but will be done tonight. It will be at random from your post. You will only be able to post once. If you post multiple times you will be disqualified.

Simply post the answer of the question below:

What are your plans for the next year?

Please note what prize you want.

What are your plans for the next year?

For the next year, I plan on studying harder for certain subjects in school (Used to do extremely well, now kinda just in the middle of excellent and "meh") I wanna improve my study habits by focusing more on schoolwork and not playing as much video games (Yes, you can say I am addicted :l) I also am planning on helping my community out by maybe doing some volunteer work. I really just want to do better in school and will put forth all my effort into schoolwork.

Some other things I am planning to accomplish by the next year:

Become ub3r :P

Ask the girl I like out :)

Find a good money making method online until I can get a job

Becoming an even kinder person overall and helping everyone out both online and real life

Those are the main things I would like to accomplish by next year. Good luck to everyone entering and thanks for doing this giveaway! It's nice to see a giveaway where it doesn't require a signature where it gives you a chance to win! This would be an amazing early Christmas present for someone!

Reward I would like: Ub3r upgrade. I am approved already for ub3r. I deleted the PM from the Approval Bot but a staff member told me as long as it says on the upgrade page, "ub3r upgrade" or whatever and it lets me purchase it, then it means I am approved.

Happy Holidays!

Well I have lots of plans for next year! I intend to start getting into a much more competitive Dota 2 scene. I've been working really hard and I think I've actually gotten semi-decent at the game! My team is kind of a joke but I have my four best internet friends. We're not going anywhere insane, but I think playing a tournament with them would be fun. I am also on my high school's robotics team. I am one of the leaders of the team, so I'll be doing a lot more work than last year. I'm doing the CAD for this years robot and I'm also doing most of the wiring. I cannot wait to start heading to competitions! Lastly, I want to get my grades up, I'm not doing to great in school, but I think with the upcoming Christmas break I think I will have time to clear my mind and get a better outlook on life. This year was pretty bad for me, but the way next year looks I cannot wait to head towards it!

Thanks for reading, I'd like the upgrade to l33t. I really want to change my name because I feel stupid with a name like this. I am no longer a 13 year old, I am clearly much more mature.
