Thread: [\(Minecraft\) Bukkit/Spigot Plugin Coding | Around \\$20 per plugin](#)

FormerlyS - December 16, 2014, 10:12 am

I'm sorry there's no thread design, I can't design.
At least I gave it some color :)

Hello HackForums user,

I'm offering my plugin coding service to you! It's cheap and I can code anything!
You can choose the permissions, functions, commands, et cetera!

And all that for around only 20 dollars.

This of course depends on the complexity or non-complexity of your plugin. It can be cheaper, it can be more expensive.

Payments are via PayPal. Shoot me a PM to receive my Skype, or, better yet, send me your Skype and I'll add you.

The only downside is that I want CLEAR instructions on what you want the plugin to be able to do.

Click the PM button below to send me a PM.

Cheers!

I would advise this going in the minecraft section. Might get more interest there!

Hey, thanks for your reply!

Isn't it against the rules to sell services outside the marketplace?

No it isn't. People sell things in other sections. MC clients are sold in the minecraft section

Ok thanks.

Posted there now. ?
