Thread: [Official future of hackercraft.](#)

**Edward Snowden.** - December 16, 2014, 12:42 pm

Many has concern so write them down and I'll quote the question in OP and I'll answer them.

All donation/rank will be honored. [Logic things to do]

Mcmmo ==> Still have to think about it I could always grant the choice of 1 skill to keep.

Base well, most is ashes atm.

Will I abuse my power ?

-No.

Will I play in a faction?

-No.

Will I hire douches for mod ?

-No.

I can tell already that I will be very close with the community and I'm looking to bring them what they ask, not what I want. Still the veto remains.

Please keep this thread simple and with HQ post. Each second I lose by reading a LQ post = less times for server.

**Nath** - December 16, 2014, 12:44 pm

Glad you got it all semi resolved. Dont settle for less than you deserve.

I might actually consider playing when it's all up.

**Turtle** - December 16, 2014, 12:54 pm

So were doing a faction server again?

-Custom enchants would be a great idea

-1.8 items

-Drugs

-<http://dev.bukkit.org/bukkit-plugins/brewery/>

-Only about 5 items in shop, players will always find an exploit, less items better eco

-ADVERTISE

-Player Shops

-mini games(screw Mob arena)

-<http://www.curse.com/bukkit-plugins/minecraft/skript> <-----

**Alex** - December 16, 2014, 12:56 pm

Please, listen to the community. Don't be like Robust and say no to every feature request just because you don't like the feature yourself. Make a poll.

Anyway, good luck, hope the server will turn out better.

**Edward Snowden.** - December 16, 2014, 1:14 pm

Ok for the brewery this seem like a very funny plugin... :D

1.8 items is good but I'll listen to community.

Custom enchant ftw. Nothing too OP. I don't want Pay2Win enchant. Custom enchant aren't just pro X , I can add things like health regen on armor etc.

5 items in shop. Erm no. I have a clear view of the eco but I'll be open to commentary. For "exploit" we have peach.

Advertising I can do that easy. I've been promoting website since 4 months and done business to promote 3X website, I guess I can advertise MC server somewheres. Else just using the voting websites.

Player shop. Might do. Will check this : like a town with shop.

Mini-games = way to gain unique items that you can't get inshop or anywhere.  
ex. Picklock for lock chest :)

**Reticulum** - December 16, 2014, 2:23 pm

Wait what exactly happened to everything, what's going on?!

**Turtle** - December 16, 2014, 2:29 pm

(Dec 16, 2014 03:23 PM)Ridge™ Wrote: [\[CITE\]](#) Wait what exactly happened to everything, what's going on?!

Only thing thats happened was Robust bailed on the server and made Peach owner. Server is reseting. You'll keep your rank(I think)

In that case...

Peach can i plz have a free upgrade (seriously) :>

On a more serious note, fix the vote links and make the links give EM. Nerf cactus and the rest of the AFK free money items such as steak, etc. I think it would be good for new players if there was a small area in spawn where there is a pig/cow/chicken spawner called the "free food" area. A lot of the time, when HC resets, I go on and get pissed because I don't have any food,

Sumix - December 16, 2014, 9:40 pm

/fly would be a handy edition for building bases although you should only be able to fly in either wilderness or your claimed land and when you are not combat tagged.

Edward Snowden. - December 16, 2014, 10:07 pm

I have my own idea about /fly now. You will have the final result @ launch.

deiski - December 17, 2014, 2:42 am

That's why you worked alongside of Peach during this version of HC.

Examplesze - December 17, 2014, 4:02 am

I think peach will do some good things with this server because it's HIS money on the line at the and of the day and profit motives are the best.

Core i5 - December 17, 2014, 4:06 am

Good day mate, sorry if this is too long.

Being a Minecraft Player since Alpha (I love wasting my life), have seen various gamemodes. Most annoying of which is obviously being the hub servers, where everything revolves around earning money. They, albeit, have some unique gamemodes. Anyway, moving on. Factions, oh factions, I

(An Year Ago) opened a server, pissed off from all of this P2W op prot VIII servers, made a "Legit Factions" server, it went amazingly well. With the addition of only some plugins, bukkit, custom enchants, for example a Level 30 Enchant may give you Prot V, McMMO and some other minor additions to the server made it an Instant Success!

So, this tells us that really, don't waste your time being the same server which already 2000+ factions server are, be unique, be original. If you are confused about donations. Well, simple. 8 Ranks, I'll brief them up to you.

Rank1 Access to 3 set homes, can access a cheaper version of the normal shop. Can open his private shop in the designed "FactionsShopSafeZone" Area.

Rank2 Access to 5 set homes, can access a cheaper version of the Rank1 shop. Can open his private shop in the designed "FactionsShopSafeZone" Area (Larger area of shop) Can set his own nickname.

Rank3 Access to 5 set homes, can /setspawn (The spawn set cannot be altered for 48 hours), access to a cheap version of Rank2 shop. Opening his private shop near spawn (Easier access and larger) Can set his nickname, and can ask a Mod to set his prefix.

Rank4 Access to 5 set homes, all previous commands. Access to the CheapAsEbooks shop, high quality nice shop.

Rank5 Access to basic McMMO levels, get's 100 in mining and all others, (No tokens as they would make him go to 1000 in sword level which is unbalanced)

And so on.... Doing this type of donator ranks (Along with kits) will get you enough donations to have a hefty profit! :) You just need to be able to keep stuff put together. Updating plugins etc.

Moving on, moderators. Please do not waste your time having uber's and leets becoming moderators rather than people who are actually good. It won't really work. Please, keep it simple.

Moderator Rules:

Banned Players on HF or the Server cannot be mods.

A 1 month Time Frame is given before applying for mod again.

If denied more than x number of times, applying is not allowed.

I spent some time making this format:

Spoiler ([Click to View](#))

Name:

Saad Muzaffar

In Game Name:

LeonMundt also known as Gunner and Cagefighter.

Age:

12 (will be 13 on the 30th of may), although I do know, that the applying age is 15 or over:

I still want to try my best as I think of myself, to be different than other 12 year-olds in many ways and want to prove it in any way possible. I don't merely rage like other kids of my age and I hope you see this application without the concern of my age and if because of my age this application is

an instant deny, please wait a few days.

Leonmundt

Current Residence

Saudi Arabia

Current Rank  
Elite

Languages  
English, Arabic (Many guys speak), Urdu, Hindi and a little bit of Russian and Spanish.

Why I want to become Moderator

The reason I have chosen to apply for this challenging rank is to help people by protecting their builds, seeing who grieved their town, etc etc. Additionally, it has come into my sight, that people have started spamming and/or using abusive and foul language, it is my severe wish to be able to stop these occurrences especially in my time-zone, and to make Kaise123 a much more safe and better place, free from this nonsense. Also, I also would love to handle this prestigious rank because it helps myself to improve my way of communicating with people, and to know a lot more of people. With that, I also wish to help a lot as the rank "Elite" does not seem enough to me for helping. I wish, you people understand how greatly I want to help this server.

Previous Knowledge

I have been a moderator and a host in many games of varied genres, Such as: I have been a notable host of COD4 (Call of Duty 4), Swat4 and also Terraria, but when I heard of Kaise123 I stopped playing all these games and devoted myself to Kaisecraft. Moreover, I have also hosted my own Minecraft server for a limited amount of time, but due to some issues it is mainly used myself for testing Logblock WorldEdit and CoreProtect for practicing and improving my skills. Also, I have been an Admin in a notable server called Airport Wars, which is a server for a client called SA-MP (Gta SanAndreas Multiplayer)

I have also been programming a lot, using Microsoft Visual Basic. Till now, I have not made very advanced programs but I'm certainly sure that, if given the time, I may make a lot more advanced programs. And lately, I have made my own server (it was Hamachi first) but now, I port-forwarded it and use it for learning the plugins a lot, and try to invite some people and also just generally play in it.

Forums Knowledge

I have studies BB Code well, and I can confidently say that I am very good at it, you may also find examples of my well-knowing of this, while seeing my posts. As telling this, I'd also like to state that I have been a forums moderator as well, and have certainly maintained the forums because of my rank there, as that forums had a much bigger User-Base than Kaisecraft as it was lasting for more than 2 and a half years. Although learning the forums isn't that hard, I've tried to be good at it and tried to learn most of the commands used in the forums and also in this server.

How I have Helped

I have helped a lot of people in this server, Although it will be literally impossible to state each and every one but Nevertheless, these are some of the few things I have done. I have built houses and

have also helped others in making huge builds, and making them a less of a challenge for the original builder. Aside from building, I have also helped people, not even considering their ranks. I'm going to post pictures as a stand-alone proof for how much I love helping; as this is the main reason for me applying for moderator.

People who I've met:  
(click to show/hide)

## Moderating Knowledge

After joining this server, I realized that I really need to learn Residence, and I can say I did pretty well in learning the commands and how to use the. Furthermore, I started practicing World Edit in single player and I enjoyed it, and learnt a lot more about it and tried to remember it's commands. Then, I started learning World Guard for my server and it too, went pretty well and now I know most of my commands, although I did learn many more plugins such as LogBlock but these are not necessary for the server, so I won't talk about them. Also, I have started learning CoreProtect, although I am starting to know much of the commands, but there is still somewhat left from me to learn. I am very keen to use these plugins to my advantage in becoming a moderator. And as I stated before, I tried all these plugins in my server, and will surely handle them with excellence if ever promoted into the rank of moderator because I always go with this quotation:

"Practice makes a man perfect"

Here is my knowledge in these plugins so far:

RES:  
(click to show/hide)

CP:  
(click to show/hide)

WG:  
(click to show/hide)

WE:  
(click to show/hide)

I've not copied these from anywhere and this is all made by me.

Some other commands:  
(click to show/hide)

## Reputation

Can't say much here, that's for others to decide, I'm pretty sure people take me as sometimes an annoying but a person who is always keen for helping, I try my best not to show-off (but sometimes I do by mistake). I always try to lend a helping hand to anyone.

Normal Time In Normal Days (Saturday,Sunday,Monday Tuesday) 2-3 hours.

Weekends (Wednesday Thursday Friday) 3-4 Hours Or Two Times.

I also login on MC Chat pretty often on my mobile. If someone needs me, I try to come on PC as soon as possible.

## Language

As I have mentioned before, English is not my first language but have gained excellence in it. I have a fluent speech and vast vocabulary. I am very fluent in English, seeing my English grades I normally get A+'s and also please note that my exams follow Cambridge which are one of the

hardest exams ever.

How I've changed:

I know, that this is the fourth time I'm applying for moderator. How I've changed? Well, I've tried to be more patient in-game and try to be very mature and not to be the bossy guy. I've also stopped "swaying" moderators and they all are my friends, and I talk to them like normal people. I've also told. that I give respect to each rank. Some people say, that I annoy the moderators by helping them a bit too much, I've tried to work on that, and believe me; I tried. Also, I've tried not to be boastful amongst my friends even in simple little things and I'm aware that I sometimes may do it by mistake but I'm trying to fix my self.

### Past Convictions

Out of all these topics, this is the hardest for me.

I have been convicted one time for griefing accidentally, and it was a temporary ban for about 5 days.

Here is my explanation:

Although I don't know why you said me to reply on this post, I'll atleast try to clear my image and I'm not asking for a un-ban appeal or any thing like that.

I know I did place lava as he was supposedly my friend and I was just joking, I didn't really mean to grief anything. Anyways, I was fixing all the things by placing dirt to cover the lava and obsidian to separate the lava into two sections so they can be easily removed, but what happened was as you read earlier in a post done by SkyraBlue, it was raining here in Saudi Arabia although it wasn't raining exactly here all the lines are connected to each other and internet/radiowave failiures happen very often here, so as I said, I was fixing the lava and I was pretty much doing it well untill suddenly I forgot a spot and the lava started spreading to the nearest hole (Minecraft Phsyics). So, I tried to stop it but suddenly my Internet was gone as it was a little bit shaky previously. So, it didn't come back for a long time as it was still raining and the lines were yet to be fixed. So, when I joined I saw that I was banned.

This is my explanation of whatever happened.

Commands I used:

```
//replace lava air Somewhat worked but I missed a spot in which the lava started flowing.
```

```
//undo Didn't work as the lava had been already spread from one are to the other and cleared some of it.
```

I'm very sorry, MrTroll.

PS: I've also explained this before.

Reason For Application

I know I've been banned, I apologize but before anyone goes ahead and denies me, I've got one thing to say: If I didn't really like helping people, I could've just stayed Elite as it is pretty much a jr.mod. and I'm also aware, that if I don't help people and also don't stop what is wrong I'll be demoted.

Another reason is that there is "no" Moderator in my Timezone and also this can be an advantage for me and the server as many people are logged on that time. I really like helping people but I mostly can't, as I don't have World Guard to protect their builds neither Core Protect to see who

griefed them.

I really love helping and it is the main reason. Why do you think I'm different, because if I didn't like helping; Moderator is like a very huge hassle if you don't want to help and you'll be pretty much demoted if you don't help others.

### About Myself

I am 12 years old and belong to a normal/high class family. My family consists of three members (including myself) who are:

My father

My Mother

And myself.

I really like tweaking around with computers, and I also love trouble shooting problems (which are mainly caused by me) and oftenly I trouble shoot my friend's computer too. I have many hobbies, and I'm very good in studying and always score well in the class. I have a very balanced routine so, I normally do everything in the exact same time everyday. I really like reading playing cricked or just playing Minecraft which is one of my favorite hobbies . As I have so many. This is all I can say about myself.

### Conclusion

This is all what I have to offer, I've answered everything truthfully and swear that if I become mod, I will not fail to do my duties.

Thank you very much for reading this app, and I hope you Support or -1 me wisely.

Also note that, the mistakes are not acutally mistakes but are more likely to be typing errors.

People +1 or -1 this application based on what they think is good or bad in him. A mod has a +3, an admin has a +10 and the owner or admin can just accept or deny the app based on what they think.

These are my suggestions,

Thanks!

**Chickendipper** - December 17, 2014, 10:46 am

A lot of time went into grinding McMMO and items in the old server - the more we keep, the better.

I know it sounds biased as I had ~1.3k mining, but it seriously took me a long time, a few sleepless nights, and 7 god picks to get that far.

I personally think withers should be allowed, but not allowed to break player-based blocks (so we can still grind withers, but not use them to raid) as well as have obbybreaker.

I also believe TNT and creeper spawners should be fairly cheap. Why? Raiding is at the core of a factions server, and having easier access to TNT means more raids will happen, and more frequently.

pretty mad if I lost my hardly earned McMMO levels, if not all then like someone said earlier, let users keep 2 highest McMMO levels or something similar like that.

**Slut Muffin N** - December 17, 2014, 2:37 pm

I wish someone would let me help run this, I could bang it out and make it perfect in a day.

(Dec 19, 2014 03:33 PM)bleachmaster Wrote: [\[CITE\]](#) what does a custom launcher have to do with ak-47s

He is talking about gun mods for forge. Something like the technic launcher which auto downloads the mods for you. Not sure if people would like HC if it had mods though.

**Detoxicate** - December 19, 2014, 2:55 pm

Some mods I like, like the diamond chest one... Whatever it is called, that makes a chest with multiple pages.

**Poutine** - December 19, 2014, 3:20 pm

(Dec 19, 2014 03:33 PM)bleachmaster Wrote: [\[CITE\]](#) what does a custom launcher have to do with ak-47s

You can code whatever you want in your custom launcher.

Anyway you dont know what youre talking about so stfu

**?ã?ž?@** - December 19, 2014, 4:01 pm

I am not in favor of /fly it kills off multiple features of the game and gives hackers a easy advantage to raid peoples bases. Also setting a smaller boundry size is dumb i dont agree with that eather.

Dont wanna play on a dinky map.

**Optimized** - December 19, 2014, 4:04 pm

JUST a suggestion but, can you OP-ify the server a bit? make it more erm... powerful. like kits and stuff.

I like OP servers.

**badvibes** - December 19, 2014, 4:43 pm

(Dec 19, 2014 04:20 PM)Poutine Wrote: [\[CITE\]](#) You can code whatever you want in your custom launcher.

Anyway you dont know what youre talking about so stfulol no. you're thinking of a modded minecraft client. not launcher. the launcher is what appears when you double click Minecraft.exe (or Minecraft.jar if you're on linux). A custom launcher is nothing more then a different layout and a few useful tools. A modded minecraft client is where the client has changes in it, such as new weapons (ak-47's) and new effects (shooting peoples brains out, etc.) you can however code whatever you want in your custom launcher, albeit it won't modify the actual client unless you plan on having it launch a normal minecraft jar and then running multiple transformers to inject the client itself, which only about ~5 (?) people have done.

**deiski** - December 20, 2014, 5:32 am

The server is in good hands now. Not to many people play but its still fun and everyones helpful.

**Edward Snowden.** - December 30, 2014, 3:48 pm

(Dec 30, 2014 02:57 PM)?Creative Wrote: [\[CITE\]](#) The server is in good hands now. Not to many people play but its still fun and everyones helpful.

They are mostly waiting the official confirmation of Omniscient. I do understand them since I wouldn't like to play on a "maybe" server.

I don't mind to pull out money for the server as long it help and that people are happy with.

**Griev?us** - January 1, 2015, 2:04 am

Server's basically dead, Peach if you need help hit me up.

**ProKitzel** - January 1, 2015, 7:56 am

After reading through the scam report I realised Edward Snowden was a kid who basically had too much spare money and only invested so he and his friends could cheat the whole time. Robust had sense to manage the server but no money and when things were good he took all the money as if it was his own and completely lost all sight of the agreement. The funny thing about Robust is he actually had the balls to try to argue in public he was in the right and redefine how business in the real world works.

When the thing was first relaunched everything looked promising but seeing what went on behind the scenes I realise the immaturity of them both and wouldn't trust them to organise a piss up in a brewery. It won't last long so I wouldn't bother wasting time playing now.

**Edward Snowden.** - January 1, 2015, 11:52 am

As much the time you spent to post useful things ? Pretty sure you are a multi that hide. Nothing else to say. If you think I would spend 1k to cheat on a "dead" server as your called it, then you moron. I did that to offer the community a second chance to play hackercraft as I enjoyed it and that how I meet many good friend such as :

- Cyrus
- Cyphjr
- Kondotose
- Chickendipper
- Slash
- Yoshi
- Six30
- etc.

I want to give them an opportunity to live the same things.

**?Marshm all0w** - January 1, 2015, 11:55 am

Oh god. I would love to see HC go back to its fun with every player enjoying the server. Last time when fuckin Roqueer was doing shit, it was like a chore to go on and it was repetitive. I really hope you do everything better <3

**Edward Snowden.** - January 1, 2015, 12:12 pm

(Jan 1, 2015 12:55 PM)?Marshm all0w Wrote: [\[CITE\]](#) Oh god. I would love to see HC go back to its fun with every player enjoying the server. Last time when fuckin Roqueer was doing shit, it was like a chore to go on and it was repetitive. I really hope you do everything better <3

A little preview of my idea in general to hype :

-RP town:

Sell the stuff you acquired in faction server in a shop you will have rented with EcoMoney (ingame money). We will be using ChestShop. There will be street and we will be using dynmap for this town. The town will expend as the player base grow. You will have compass to locate a player shop to avoid running in all the city.

-Customs Enchants

We want to provide a new sort of gameplay with new enchant that will enhance the pvp experience. Such things as slowest the enemy on a hit, have a chance to strike with thunder your enemy etc.

-Events

Hunger games event.

PvP tournament event.

Best in category contest.

Much more.

-Minigames

Such as try to evade from a prison.

Pretty much the minigame hypixel hold but with our custom ideas. best resume ever no?

**badvibes** - January 1, 2015, 1:48 pm

(Jan 1, 2015 01:12 PM)Edward Snowden. Wrote: [\[CITE\]](#) have a chance to strike with thunder your enemy etc.lol just for fun, not sure if exact methods but w/e

Code private Random random;

private int random;

private Location loc;

@EventHandler

```
public void onAttack(EntityDamageByEntityEvent event) {  
    if(event.getEntity() instanceof Player && event.getDamager() instanceof Player) {  
        random = Math.random() * 100;  
        if (random < 80) {  
            return;  
        } else if (random < 95) { // low chance  
            loc = event.getEntity();  
            loc.getWorld().createExplosion(loc, 2, false);  
        } else { // lower chance  
            loc = event.getEntity();  
            loc.getWorld().createExplosion(loc, 2, false);  
            event.getEntity().getWorld().strikeLightning(p.getLocation());  
        }  
    }  
}
```

} (Jan 1, 2015 01:12 PM)Edward Snowden. Wrote: [\[CITE\]](#) -RP town:
