Ya simply take the bios and plug it into your usb drive, upload a jpg to instagrams main server > then inject the jpg all of the servers and im pretty sure in return you get all username and passwords all in a text file.

I support this user with this method.

Instagram main server is the server that holds all instagram information u have 2 hack it its really easy just type in cmd ping www.instagram.com then get the ip it pings, type ping ip address here -t -l 65500

it will auto download a .txt file but it will be big because of all the instagram users, let it run for about 10 hours, don't close it or the cmd will corrupt and possible delete of system 32

i hope this helps good luck, don't get yourself into trouble

Im not in anyway responsible for the informations you use that i have stated above as u can serisuly go 2 jail for ever posible deth penalty by anal stretch...

Buy a bruteforcer, it's the only way you'll be able to get them really. Good luck.

Can anyone get me a good instagram username for some cash?

and do you know if anyone's selling both instagram usernames and snapchat as well?

Well this site is so lame because of the 2015 users, at times.... ummmm its sometimes hard to get any real information thats not sarcasm.

i mean.... look at the first 2 comments. That proves my point. The Vines has made people idiots. They think everythings a joke.

Ive been looking on this site all day reading. Might as well stick to YouTube.

Also, you never offered any info after making fun of the other guy.

You could just use Hydra if you know the username

Can any one tell me how to hack an instagram Account ???

Plz plz urgent

Max_Lietz - August 22, 2017, 10:15 am

Toasters are best at brute-forcing Instagram accounts. I installed InstaToasterCracker OS 2.3 and l'ts great at cracking Instagram accounts really fast. But I heard microwaves are much more efficient at cracking them quick. But give it a try it should work :)
