Thread: [Hackforums IOS App - Speed Art - Updated Version](#)

**redhotmo** - December 17, 2014, 3:40 am

Hey guys, please rate this out of 10, the mockups are at the start of the video for you to view.

[Video: <https://www.youtube.com/watch?v=MWqoiCe-Sbo>]

That's awesome. I'd try it out if it was public. I hope it will be public, good luck.

**Internet Explorer.** - December 18, 2014, 7:39 am

Nice idea!

However, the video had quite an abrupt end, and showing the final result in a picture would also be great :P

If there was a hackforums app then it would probably look a bit like the site, by that i mean it may use the same background etc.

I like you design but if i was designing a hackforums app i would make it convey hackforums, if you get what i mean.

That design looks amazing, OP.

Very good work

Pretty useless as you could just make a bookmark instead and it would do the same thing.
