Thread: [Installing an older version of KiK on Cellphone?](#)

Dayalu - December 17, 2014, 10:55 am

I did it on Bluestacks besides right now I'm not home and feel like going for a EW run, only have my cellphone on me.

How can I put the older KiK so I can use fake camera?

Cheers gents!
Dayalu.

I use this one: apkandroid.blogspot.co.uk/2014/08/kik-messenger-731-apk.html

Uninstall your current Kik app then double click the one you just downloaded and it'll install. :)
