Wow, good job, this looks pretty cool. Is it free for commercial use, or just personal?

Only3 - December 18, 2014, 10:25 am

if u change the red to dark gray or any dark color u like it will be much better

Entire - December 18, 2014, 10:33 am

Currently, the theme looks awesome. Again - free for commercial use, or just personal?

He has shared the source code. It means you can use it for personal as well as commercial use ;)

You can use it how you want as long as you give credits. Thank you.

How the fuck does that mean you can use it?

He has to say himself

Anyways, if I were to use this

I would tweak the outline color of the highlighted textbox, it looks a tad too dark

Why the hell are you going to ask if this is free for personal and or commercial? If the source code is there, you think some fuck boy isn't going to use this in his next upcoming booter or crypter?

wow , simple and sleek theme good job ?.

I am surely gonna use your themes in my next projects.

HLTV - December 19, 2014, 12:57 pm

This theme looks nice and clean thanks for it!

stackoverflowin - December 20, 2014, 2:05 pm

This is a nice theme, I'm going to convert it to C# - it's a shame you neutral repped me.
