Thread: [\[PS\] How To Put Any Image In Text! \[Beginner tut\]](#)

Psilocybe - December 18, 2014, 8:12 pm

Hey guys, Voidwalker here! I just made a tutorial (Voice & video) on how to put an image inside of text (Take my avatar as an example).

Pretty beginner stuff, and this is BY FAR the easiest way to do this!

*Sorry for mic buzzing sound, getting new mic for Christmas.

Enjoy!

Yeah there's kinda a shortcut to it at the bottom, if you jsut drag it onto that symbol.

Great way to quickly learn how to put an image behind any text. However, before you start making more videos explaining these things, PLEASE fix your mic! That electronic noise makes my ears bleed. :(

Other than that, superb guide! THANK YOU!!

Here is what I got from this guide. :)

Also, ctrl+alt+g does that drag down layer thing. (Im a total ps newb so I don't know any of the terms)

Spoiler [\(Click to View\)](#)

Yep! I meant to say something about that, but forgot. Getting a new mic on Christmas so that should be the only video I have with that noise (:
