Thread: [DarkEyE Protector V3 # VB6/ASM # NO DEPENDENCIES \(NATIVE\) # XP to Win10 Execution](#)

xor - December 19, 2014, 6:50 am

THIS IS A SECURITY SOFTWARE AND ITS USE IS TO PROTECT YOUR FILES AGAINST REVERSE ENGINEERING, CRACKING PROCEDURES, AND NOT ANY OTHER USE. WE'RE NOT RESPONSABLE FOR ANY OTHER USE YOU DO WITH THIS SOFTWARE. YOU'RE THE SOLE AND ONLY RESPONSABLE FOR WHAT USE YOU DO WITH THIS SOFTWARE. TO REPORT ANY KIND OF ABUSE MAIL US TO: abuse@securitycode.eu

WARNING ! WE DO NOT HAVE ANY RESELLER. ALL SALES, PAYMENTS, RENEWALS ARE MADE ONLY THROUGH OUR OFFICIAL SITE !

Our official site is : <https://www.securitycode.eu>

Customer's satisfaction is our first aim. DarkEyE is coded in Visual Basic 6.0 with a full asm engine. Protected file DOESN'T need any additional dependency and will work on every Windows based system. Dark EyE has a powerful engine that allows you to protect your files with heavy code randomization (this process is fully automatized by the protector itself).

Please review this thread in its entirety before contacting us.

[\(Click to View\)](#)

- [?] FULL Asm Engine
- [?] Automatic heavy code randomization (Everything chosen randomly)
- [?] Anti Memory Dump
- [?] No additional Dependencies
- [?] Clean and Professional GUI
- [?] Fast on-the-fly updates (no need to update client)
- [?] .NET Apps supported. (Not every app.)
- [?] EOF Support (Automatic)
- [?] Install and startup option
- [?] Multi File Joiner (all extension)
- [?] Multi Exe Protect

[\(Click to View\)](#)

[\(Click to View\)](#) Dark EyE Protector, developed and maintained by the authors, is and was developed for only and definitely testing purposes regarding security of the user, and not of anyone else besides the purchasing user's specific security. Any, and all, securities not belonging to the user in which specifically paid for Dark EyE Protector is solely responsible for any, and all, actions they may or may not make whilst having Dark EyE Protector in their possession. I, the user and sole specific buyer by my own personal means, under no circumstances will commit any illegal nor unlawful activities using this software by the authors, or any surname the Author may or may not go by.

- If you post in this or other thread without PMing me before regarding some issue about this software your license will be suspended for 2 weeks.
- NO Refunds are allowed after you have purchased this software except RARE cases.
- You are NOT allowed to protect a file for another user for money or for free. If you do you will be permanently banned.
- We offer support for DarkEyE, we do not support any other software.
- If you have a complaint, you should pm me immediately, not after your subscription expired.

[\(Click to View\)](#)

Dark EyE Protector 1 Month usage and updates : 100,00 \$ (USD)

You can purchase ONLY trough our official website: <https://www.securitycode.eu/pricing/>

IMPORTANT NOTES BEFORE YOU BUY:

- To purchase DarkEyE Protector, for the first time, you need to register an account at official site client area. <https://www.securitycode.eu/clientarea/register.php>
- If you're already registered , if you wish to renew your subscription, you can login to your account at client area. <https://www.securitycode.eu/clientarea/login.php>

Payment methods currently accepted:

- PerfectMoney
- BitCoin

[\(Click to View\)](#)

- Conqueror : [Send a PM](#) (coder)
- TheDoktor: TheDoktor2007@hotmail.it (coder)

F.A.Q.

[\(Click to View\)](#)

Q: What language is coded in?

A: Visual Basic 6: DOESN'T need any additional dependencies. (NO .NET / JAVA). Protected file can be executed on every Windows based system without compatibility issues.

Q: Does it have USG ?

A: Yes , better than a simple USG: the main application you select is encrypted and then protected with advanced encryption methods.

Each protected file is from 90 to 96% unique.

Q: My monthly subscription expired, how much would cost to renew it ?

A: Same prices.

Q: Can i change my HWID when i want?

A: Yes, if your subscription is not already expired, of course. To do so, login to client area, go on settings page, and save your new hwid. It may require up to 24 hours.

Q: Does it has unicode support?

A: Yes, it has unicode support, that means that the protected file will work without issues on unicode machines(systems which have particular languages chinese/russians/etc.)

Q: Can i resell my license?

A: No.

Q: My protected application doesn't work, what to do?

A: Try to use compatibility mode option on which can be found on darkeye. If this doesn't work, your application doesn't work or it's not compatible.

Solomon Grundy - December 19, 2014, 6:51 am

may i be the first to grace this thread.....new version looks awesome

Mewtw? - December 19, 2014, 6:51 am

Best crypter out on HF. Used this 3 years ago and it's still the best !

kirgeron333 - December 19, 2014, 7:20 am

Best crypter on HackForums. I use this over 1 year and I highly recommend this amazing product !

PoisonKnife - December 19, 2014, 7:22 am

I have sent you a PM.

I am SO much going to get this AWESOME crypter ??

Prestigio - December 19, 2014, 7:43 am

Good luck sales with your new crypter mate

~OrwaySoftware

Thank you so much dear. :) Glad you all liking our service.

temfadbaba - December 22, 2014, 3:16 pm

nice update coder, I used the prevoius link to send you message for crypter renewal until now I did nt hear from you..if I'm buying v3 do I need to uninstalled prevoius app or you do the update from your ends....I travelled thats why I did nt pm for renewal in time. Thanks

reverse. - December 22, 2014, 5:23 pm

I talked to "darkeye.crypter" on skype, I've had him there for several years i think, but he told me i needed to talk to you.

I'm a previous customer of this product back in v1 and i havent been on this forum for a long while. I couldnt access my email to recover my old account earlier and eventually it got closed for some reason i have no idea of.

However i wish to purchase this crypter again if its possible, if its not possible because of this new account, i understand. If you can, shoot me a PM because I'm unable to PM yet.

Maybe you can lookup my old crypter username in your DB.

Have a great Christmas :)

Solomon Grundy - December 23, 2014, 12:53 pm

others should choke on this

http://scan4you.net/result.php?id=e0ea8_f0o7p7

?

degado - December 23, 2014, 4:33 pm

well I saw this crypter a while a go and heard it has a grate reputation I may look at this stuf later .
gws

ProOgar - December 24, 2014, 6:18 am

I LOVE update 3.0.2 !!!

Can save settings ! great job

thanks for update

reverse. - December 25, 2014, 3:20 pm

Hm, would it be possible to get an answer to my question previously?

Thanks

xor - December 26, 2014, 4:24 am

Just message Con~.

temfadbaba - January 4, 2015, 12:48 pm

thanks for your support, new hwid sent for activation

xor - January 6, 2015, 2:06 pm

Update wich will fix multiple minor bugs will be released tomorrow. As we fixed the binder with large files, please tell me wich max size you would like to bind (50 mb, 100 mb etc)

Please if you find any other bug, pm me.

immortalwon - January 6, 2015, 8:44 pm

100 MB binding is good in my opinion. I would prefer binding to as large as possible if it can be made possible.

xor - January 7, 2015, 4:57 am

Client new version released:

3.0.3 :

- Fixed multiple minor bugs.
- Fixed error n2 bitmap creation.
- Binder supports up to 64 MB Files.
- Added tray support.

Please report any bug if you find any.

XperiaZ007 - January 7, 2015, 6:23 am

The Manuel Download link is not working none coming up and the Old version V3.2 says this error when opening Error downloading Data Runtime Error 9

Working fine now Thanks for ur prompt Response

temfadbaba - January 8, 2015, 4:31 am

Conqueror, i think there is issue with 3.0.3 update, unlike 3.0.2 after crypting you get a message says "Outputcrypted" after saving your server a message will also pop up says "file crypted successfully" but 3.0.3 case is diff after crypting u will see "_cryptE80er" some like this and it doesn't work

xor - January 8, 2015, 5:06 am

(Jan 8, 2015 05:31 AM)temfadbaba Wrote: [\[CITE\]](#) Conqueror, i think there is issue with 3.0.3 update, unlike 3.0.2 after crypting you get a message says "Outputcrypted" after saving your server a message will also pop up says "file crypted successfully" but 3.0.3 case is diff after crypting u will see "_cryptE80er" some like this and it doesn't work

it's normal, i removed the message to make crypting process faster

temfadbaba - January 8, 2015, 7:33 am

oh ok, tnx.....is there any link to download VM workshop station for testing

Best Crypt er on HF!

fabian0 - April 10, 2015, 1:34 am

hi i want buy this crypt.. i cant send pm .. pls add me skype: fabio.maruzzi1

thanks!

Malicious™ - April 10, 2015, 1:36 am

Look's like a awesome crypter bro, I have only heard good things about it. Will be contacting you as soon as i get everything sorted :)

Teleforce - April 12, 2015, 5:59 am

(Apr 8, 2015 09:56 AM)Conqueror Wrote: [\[CITE\]](#) I'm sorry for being slow nowadays, but im so sick (fever). Updates will be a bit slower than normal, hope i get well very soon.

if you are still sick , just bring 4 lemons and make juice of them with half glass of water and drink it in few hours your health will be normal like before.

one of the best crypter on HF ? .

Solomon Grundy - April 12, 2015, 5:11 pm

oranges and bananas will be nice, get will soon brother ?

akosicamar - April 16, 2015, 9:04 am

Hi can I ask? is it compatible with IM3? and how long does it FUD

immortalwon - April 17, 2015, 12:58 pm

(Apr 17, 2015 07:48 AM)Conqueror Wrote: [\[CITE\]](#) Yes, and it depends. this the most asked question but the real question should be ? how much it will stay unfud ? the most important thing its the the time wich coders need to update the crypter. I can guarantee we're fast :)

Will executable signatures be brought back? I feel signatures make the file look more legit and better executions, no?

immortalwon - April 18, 2015, 3:25 pm

(Apr 18, 2015 12:41 AM)Conqueror Wrote: [\[CITE\]](#) on V3 You can clone executable signatures from any exe you want.

I know that but I am talking about the stubs having their own custom signature like when the crypter was first released.

Solomon Grundy - April 19, 2015, 5:15 am

(Apr 16, 2015 12:32 AM)Conqueror Wrote: [\[CITE\]](#) Engine version updated to 0.133. Everything should be fine. msg me for any kind of issues.

To all customers:

Please help us improving this crypter:

<https://hackforums.net/showthread.php?tid=4781030>

link is broken can you update please.....vouch for OP

Homunculus - April 20, 2015, 3:40 pm

prompt update
best crypter.

kindly check your pm pal

xor - April 25, 2015, 1:52 am

thanks for heads up.....i guess i have to renew before going on vacation lol

xor - July 24, 2015, 12:06 pm

This is my last post until i come back in my town. Sales have been suspended until 1 AUGUST.
Wish you happy summer.

Best Regards, Conqueror

lekeza - July 25, 2015, 4:37 am

Hello,

I would like to buy this crypter, but can't send PM, can you kindly PM the invitation code?

xor - July 31, 2015, 11:25 am

Hello everyone, im back from 6 days holiday ! currently replying all PMs. If you need anything just pm me, i'll reply asap. =)

Sales are back UP. If you want to buy/renew, proceed as usual.

MidasRU - July 31, 2015, 12:12 pm

Best crypter out there! I can say that for sure with confidence.

lekeza - July 31, 2015, 1:46 pm

I want to buy this product, can i get invite code? Will it work with Netwire? and bypass UAC?

I can't PM and I will appreciate if you pm me the invite code to buy

xor - August 3, 2015, 12:47 am

(Jul 31, 2015 01:46 PM)lekeza Wrote: [\[CITE\]](#) I want to buy this product, can i get invite code? Will it work with Netwire? and bypass UAC?

I can't PM and I will appreciate if you pm me the invite code to buy
Works with any native and net 2.0 files, and output files works without admin permission.

xor - August 5, 2015, 4:01 am

Next version will have a runpe only with these APIs:

CreateProcess and CreateRemoteThread.

REMOVED these APIs :

ntUnmapViewOfSection

WriteProcessMemory

VirtualAlloc

NtGet/SetContextThread

You can't find a better RUNPE than this at the moment on the market. This is not properly a RunPE as the 4 most important APIs are not used.

alibomax - August 7, 2015, 12:25 am

i will like to renew my crypter. Great crypter i enjoyed so much

Of course and the Crypted file will run with no Dependencies.?

Wardow - September 12, 2015, 9:09 am

(Sep 11, 2015 06:25 PM)E M I N e M Wrote: [\[CITE\]](#) Of course and the Crypted file will run with no Dependencies.?

VB6 has dependencies, actually, just it's included from Windows XP to Windows 10.

E M I N e M - September 12, 2015, 9:31 am

(Sep 12, 2015 09:09 AM)Wardow Wrote: [\[CITE\]](#) VB6 has dependencies, actually, just it's included from Windows XP to Windows 10.

DarkEyE Crypted File will execute with no dependencies--> (Win XP to Win10 32/64Bit)

-Unless the original file it self isn't native.

Wardow - September 12, 2015, 9:33 am

(Sep 12, 2015 09:31 AM)E M I N e M Wrote: [\[CITE\]](#) DarkEyE Crypted File will execute with no dependencies--> (Win XP to Win10 32/64Bit)

-Unless the original file it self isn't native.

DarkEye is coded in VB6, and VB6 has dependencies.

E M I N e M - September 12, 2015, 9:43 am

(Sep 12, 2015 09:33 AM)Wardow Wrote: [\[CITE\]](#) DarkEye is coded in VB6, and VB6 has dependencies.

DarkEyE Protector been running (non/stop) from 2011.

Many Experts are using it, If Crypted File has dependencies...

DarkEyE would be long time *ucked/*icked LoL....

*Logically...

But you can discuss this when the coder is here; I think he will be better for this convo.

xor - September 12, 2015, 9:57 am

Wardow is actually right, VB6 has dependencies the big famous MSVBVM60.DLL wich is included by default on every windows system starting since windows 2000/xp sp0.

Unlike .NET framework, this DLL is included by windows and it doesn't need to be downloaded.

Saying VB6 has dependencies its like saying delphi or other language has dependencies because they need kernel32, gdi32, user32 functions. wich are obviosly by default on the system.

Trillium - September 12, 2015, 10:27 am

What Conqueror just wrote is 100 % true.

GLWS !

Regards ?

E M I N e M - September 12, 2015, 10:30 am

(Sep 12, 2015 09:57 AM)Conqueror Wrote: [\[CITE\]](#) Wardow is actually right, VB6 has dependencies the big famous MSVBVM60.DLL wich is included by default on every windows system starting since windows 2000/xp sp0.

Means No Dependencies (Crypters hood LOL) as the DLL file is already included @every Win.?

Wardow - September 12, 2015, 10:31 am

(Sep 12, 2015 10:30 AM)E M I N e M Wrote: [\[CITE\]](#) Means No Dependencies (Crypters hood LOL) as the DLL file is already included @every Win.?

Not it does not mean No Dependencies, no dependencies, is a file which don't depend on any file.

E M I N e M - September 12, 2015, 10:41 am

(Sep 12, 2015 10:31 AM)Wardow Wrote: [\[CITE\]](#) Not it does not mean No Dependencies, no dependencies, is a file which don't depend on any file.

Every file has dependencies then as all of them won't work unless Windows installed.

The meaning of it in this hood is clear, That the file will execute @ all windows versions. Even if Only Windows Installed (not even drivers).

Wardow - September 12, 2015, 10:42 am

(Sep 12, 2015 10:41 AM)E M I N e M Wrote: [\[CITE\]](#) Every file has dependencies then as all of them won't work unless Windows installed.

Man, Conqueror said it, it's with a dependency, don't continue arguing, and Windows isnt a dependency, it's an OS lol.

E M I N e M - September 12, 2015, 10:47 am

(Sep 12, 2015 10:42 AM)Wardow Wrote: [\[CITE\]](#) Man, Conqueror said it, it's with a dependency, don't continue arguing, and Windows isnt a dependency, it's an OS lol.

I Agree with you bro, But since the DLL is there by default @ WinXP///Win10 then it means the crypted file will execute 100% with no need to download other files/software... as we talking about the OS... The OS it self has this DLL by default SO it became an OS main/official file which always included by default.

Thanks Microsoft for making it official DLL @ their OS's.

But also there's a way to run it once.. @ the End It depends to the DarkEyE Coders ~> if they wanna add this feature.

Just to inform you guys that I'm Online @ eminem@jodo.im; due the downtime of > thedark.army <~~~ domain.

It's Back.

ShikTik - September 18, 2015, 5:03 pm

Just wanted to give my review of this crypter so far. Purchased 2 days ago.

I had been watching this thread for a while and all the comments seemed good so I decided to give it a go as I was loosing lots of money using other crypters.

Eminem provides top level support, and is available almost all day and night to help. I ran into a few problems (me not being able to figure out a few things myself) and Eminem helped me and got everything working great for me.

Eminem speaks really good english! :) that's great when dealing with support for a crypter because most crypter support staff can't speak english good.

This crypter is FUD and I've made more than my money back using it already. It has a lot of useful features (Cloning digital signatures for example, allows you to bypass windows smart screen!)

It is updated very often (Since having it for 2 days it has been updated 2-3 times already). I would highly recommend this crypter to anyone that is tired of loosing money using shitty crypters.

My score 10/10!

Keep up the good work guys

RabbitON - September 20, 2015, 6:21 am

best crypter that i ever used, smooth/fast/FUD

thank you Conqueror

xor - September 21, 2015, 1:54 am

Teleforce - October 31, 2015, 11:44 pm

one of the best crypter i ever seen...

boboj_guru - November 3, 2015, 8:38 pm

Someone bought this crypter for me and it works fine and making use of it now, I also want to buy for my friend

E M I N e M - November 4, 2015, 1:53 am

(Nov 3, 2015 09:38 PM)boboj_guru Wrote: [\[CITE\]](#) Someone bought this crypter for me and it works fine and making use of it now, I also want to buy for my friend
Yes and welcome! Plz contact me @ Jabber Or send again the some1 who bought for u LoL

arsenel - November 4, 2015, 3:51 am

what is the average fud time?

Does it really bypass esed? I have bought 3 crypters in last 30 days and none of them bypasses esed.

Even if does now it gets caught in 2 hours.

E M I N e M - November 4, 2015, 4:21 am

(Nov 4, 2015 04:51 AM)arsenel Wrote: [\[CITE\]](#) what is the average fud time?

A little problem. When I try to encrypt a second file I get that error.

Code Run-Time error '13'

Type mismatch

Could you help me?

Asorock - December 8, 2015, 10:43 pm

Hello EMINeM and Conqueror, Please i need your help , I just renewed my licence for darkeye yesterday. the crypter succesfully opened at first but after the update i tried to crypt a file , I first got the error message " Error While downloading Data " Then i thought i needed to restart my system , after restarting the system, I tried opening the crypter but this time it wont open at all rather I got two error messages " Error While downloading Data" and " Run-time error 9...subscript out of range ". Please what could possibly be wrong and how to fix this.

xor - December 9, 2015, 2:42 am

When I had license couple months ago, It was fud 24/7, I never had even one detection actually

eternal101 - February 14, 2016, 12:21 pm

Hey just got my product setup but getting a detection from Comodo internet security, see scan link.
[www dot viruscheckmate dot com/free/#/taskID/stEOi8rNMZn7](http://www.dotviruscheckmate.com/free/#/taskID/stEOi8rNMZn7)

Any preferred settings for nanocore to make it FUD?

valgalaxy - February 14, 2016, 12:53 pm

does this crypter remove zonallID?

eternal101 - February 14, 2016, 1:07 pm

Pls help anyone used this wit nanocore? After crypting my nanocore, it doesnt execute. I get the error "object doesnt support this property or method." and am sure my file works before crypting, bcos i tested the file on my system.

E M I N e M - February 14, 2016, 3:02 pm

(Feb 14, 2016 02:07 PM)eternal101 Wrote: [\[CITE\]](#) Pls help anyone used this wit nanocore? After crypting my nanocore, it doesnt execute. I get the error "object doesnt support this property or method." and am sure my file works before crypting, bcos i tested the file on my system.

Don't use any function when building Nano Server.

Then use Crypters start Up.

And ur fine.

xor - February 14, 2016, 3:50 pm

"object doesnt support this property or method." Issue has been fixed. Sorry for inconvenience.
For any issues pm me. Do not post on thread as it is useless, Thanks

(May 14, 2016 06:34 AM)bamboleo Wrote: [\[CITE\]](#) How long it takes ? I have the last three days of

the license. ?

Restoring lost license days is not a problem in the seller side, just be patient and wait, don't create tickets, ask for news on skype, all those things wont get responded to, and if ever they get responded to will slow the whole process, so just wait until Conqueror posts an Official accouncement about issues being resolved and then kindly ask him about your days.

Flacon - May 14, 2016, 7:46 am

(May 14, 2016 06:46 AM)Wardow Wrote: [\[CITE\]](#) Restoring lost license days is not a problem in the seller side, just be patient and wait, don't create tickets, ask for news on skype, all those things wont get responded to, and if ever they get responded to will slow the whole process, so just wait until Conqueror posts an Official accouncement about issues being resolved and then kindly ask him about your days.

wardow is absolutely right follow his instructions and you will be fine !

NewGeek - May 14, 2016, 3:12 pm

Hopefully this will be fixed by the provider. Please let us know if there are any updates on the eta.

Thanks. :)

xor - May 15, 2016, 1:42 am

I guess they will fix on Monday. Stupid provider doesn't works on weekends. Can't wait them to fix this and move to another good Provider :)

So i believe this is my last license on darkeye. "My friends" close this file in system processes before even start working. File with detection 5/50 is already more effective for me than this crypted in darkeye (I lose 30-40% active servers because of this HUGE delay, and im sure not only me).

Regards. ?

temfadbaba - August 6, 2016, 9:32 am

As I told u I will PM u on Skype when it's Ready <3

Best Regards,

bamboleo - August 9, 2016, 7:43 am

Couple weeks ago i report bug in option "custom info" and you fix it. I have it again. PM

---EDIT----

I was wrong. Its not because of "custom info". Even when i dont use it i can't still crypt my file.

(Aug 15, 2016 03:09 AM)Demoralise Wrote: [\[CITE\]](#) DarkEyE Protector Basic... where is DarkEyE Protector Advanced? ;)

Not exactly "Advanced" But "Professional", you can see at our official site, and various packages on client area, if registered

Regards

xor - August 16, 2016, 8:45 am

Just a reminder:

Be warned where you purchase darkeye from. There are PLENTY of FAKE SITES where it's being sold scamming you.

Darkeye Basic and Pro are sold only on official site wich is
<http://www.securitycode.eu/>

No one of our team will never ask money for support or NEVER will ask to send money directly in various account.

ALL PAYMENTS MUST BE DONE AT OUR CLIENT AREA <http://www.securitycode.eu/clientarea>

Best Regards

F.A.Q.

[\(Click to View\)](#)

Q: What language is coded in?

A: Visual Basic 6: DOESN'T need any additional dependencies. (NO .NET / JAVA). Protected file works also on XP Service Pack 1

Q: Does it have USG ?

A: Yes , better than a simple USG: the main file is encrypted, and then protected with modern advanced encryption methods.

Each protected file is from 90 to 96% unique.

Q: After my subscription expires, how much would cost to renew it ?

A: Same prices.

Q: Can i change my HWID when i want?

A: Yes, if your subscription is not already expired, of course.

Q: It has unicode Support?

A: Yes, it has unicode support, that means that the protected file will work also on unicode machines(Chinese/Russians/etc.)

Q: Can i resell my license?

A: No.

Q: My protected application doesnt works, what to do?

A: Try to use compatibility mode. if this doesn't works, Your application doesn't works.

Hello Price increased before couple of months!

DarkEyE deserves \$\$?

Master in Online Business - January 18, 2017, 11:09 pm

(Jan 18, 2017 01:49 PM)E M I N e M Wrote: [\[CITE\]](#) Hello Price increased before couple of months!

DarkEyE deserves \$\$?

Yes agree on this DarkEyE deserves \$\$

but is too much men

year 2011 when i knew this software price was 35\$ from 2012-2013 45\$ ~47\$

from 2013 -2015 quarter 57\$-58\$ now from Quarter 2015 to 2017 74\$~75\$

Anyway is good software but must review the price and let us be happy when renewing our licences .

Again Credit to the Team .the have done great job to keep the software up till date is not an easy task.

Gt403cyl - January 18, 2017, 11:12 pm

xor - June 12, 2017, 9:31 am

(Jun 12, 2017 09:08 AM)Nikolai4os Wrote: [\[CITE\]](#) im having the same issue

Hi, execution time can't be changed on BASIC version. You may apply for PRO version wich doesn't have delay. Execution time anyway is some seconds. If you're running protected file in a virtual environment (RDP/Virtual Machine) will be more slow.

Bjorn Lothbrok - June 15, 2017, 7:40 am

Will this work with Netwire and what configuration can one use on this.

Mirakuru - June 15, 2017, 8:15 am

hannafreeiz - July 7, 2017, 7:27 am

is darkeye still on sale? Would love to buy

windoze64. - July 7, 2017, 10:48 am

Well this is now the 5th crypter i've purchased on hackforums this month (not to mention the single crypt service i also tried). I don't think I need to say it because this is known as one of the best crypters on the market right now, but i will surely be renewing my license and only using this one. I have zyklon and these are the crypts i tried: Spartan (didn't work), Horus (didn't work), Codex (didn't work), CyberSeal (executes correctly but breaks some functionality of zyklon/low exec rate), virtualcrypt.xyz (worked but .net)

DarkEyE with Zyklon (build it from webpanel with no startup, haven't tried if watchdog is working yet): use DarkEye startup, compatibility mode, and no anti-mem scanner! Working great!

So yea in summary read my mistakes (I tried to buy cheap crypters) and avoid them and come straight to this thread to buy a real crypter

E M I N e M - July 7, 2017, 11:11 am

Mr.shawclick - July 22, 2017, 2:42 am

Please could someone here tell me how to execute file in pc through netwire because i keep seeing parameters when i click on execute. what am i suppose to write in the parameters box that keeps

showing?

Your assistance will be highly appreciated !

ken0man - July 22, 2017, 10:11 am

(Jul 22, 2017 02:42 AM)Mr.shawclick Wrote: [\[CITE\]](#) Please could someone here tell me how to execute file in pc through netwire because i keep seeing parameters when i click on execute. what am i suppose to write in the parameters box that keeps showing?

Your assistance will be highly appreciated !

hmmm, well, use "Network Utilities / HTTP Downloader" options for download/execute. If you want to do it as you stated then leave parameter box blank or put any figure in it, i just tried it now with putty.exe, the putty.exe didn't show up in "Running applications" but showed up in "running process" despite the fact that i selected "visible" option.

coder_kill3r - July 26, 2017, 1:13 pm

Hello,

It's very easy and here's a Video TUT regarding NW VS DE

[Video: <https://youtu.be/4OxG52QZfrE>]

jrobinson86 - August 18, 2017, 10:50 pm

Hello Admins of Darkeye

I have been reading through the posts and seems it would be best to use the professional subscription.

-I have put myself on the waiting list and wonder how long it will take to be accepted?

-If the waiting list is to long will the standard edition worth buying in the sense of will it run at the same speed as the professional edition?

-Just wanted to ask a another question so Im very clear that this program will be able to take a putty.exe file and join it with another file like a pdf or doc?

-Will the anti virus pick up the exe file when downloaded onto my desktop?
ofcourse using the basic edition--delays?

also is there any directions or videos to help with this software using a exe file with the joiner and executing the pdf of doc for example?

thank you guys for your time

I wanted to say will the pdf or doc file be detected when i download it onto my desktop.

-The pdf or doc file has been joined with a exe file

and i really hope there are some instructions on how to setup a auto run of exe file

thanks again

Output extension: .exe | .pif | .com | .bat | .scr

Just one more..

If the files are joined only these extensions will be able to have show.. if i use the joiner for a exe file with a pdf. I would only be able to have the extension as .exe.pif | .com | .bat | .scr ??

kendrick5 - August 19, 2017, 6:45 am

(Sep 11, 2017 05:13 AM)KP12 Wrote: [\[CITE\]](#) Please i need your help..i have tried all the settings but still it doesn't work

Hello,

It doesn't need much BUT a couple of moves.

If the file is .Net then Don't add any function when building it (no install/startup, no nothing Only DNS/IP and Port)

Then add install/startup on DarkEyE and Anti memory Dump, Test the file if doesn't work then add also Compatibility mode, test and if doesn't work then Try Using ONLY Install/Startup on DarkEyE and if still doesn't work then your file isn't supported; as DE supports 99% of .Net Apps!

If the file is Native Then do the same tests it must work 100%.

Regards,

moe1101 - September 13, 2017, 4:31 am

What triggers avast's cyberscan/cyber capture?

Does darkeye protector or any other crypter evade this annoying avast's feature?

DarkEyE, #, and many others Ain't made for such shit as hacking and malware! It's sold for other aim's.

I suggest you always read the T.O.S before buying/using.

For illegal shit "TOOLS" are sold like for 25\$/100\$ a month. :) :)

BUT when for companies or people who really needs it for mentoring their shit then it's sold for great prices and waaay better than when sold for the skids who are

*Hackka wannabe's "LOL"

SO for us in all ways it's better to stay legal (business, image, & safety wises).

I'm I still funny & My Brothers??

Regards,

The other support guy said you couldn't use it to crypt stealers/grabbers/RATs etc. while you talked about using it with RATs. Indeed, I thought that was ironic. I don't think you understood my point.

Funny to see all this stuff while the DarkEyE coder tried to sell me unlimited private crypts and refuds (why would legitimate software for protection need to be FUD?) for some ridiculous price.

Not trying to sales trash, this is one of the better crypters on the forum. But still, I don't get why you guys would try to act like it isnt for malicious purposes. It wont stop any fed, believe me.

xor - October 17, 2017, 6:18 am

Does darkeye work with Formbook

xor - December 6, 2017, 4:13 pm

Update 3.5.0 has been released.

What's new ?

- A new HWID system that should definitely solve the hwid collisions.
 - A new .NET Loader (now selected by default) wich should make works more .NET applications.
- (NOTE That still not every .NET applications are compatible yet.)
- Minor bug fixes and some engine changes.

Pm me for any issues.

IMPORTANT : After downloading this update, it will not runs on your pc. YOU WILL NEED TO LOGIN TO CLIENT AREA and perform an hwid reset (www.securitycode.eu/clientarea) , download hwid grabber v2 , and save it.

After this step, if you have an active license, darkeye will runs correctly again.

Regards,

zeros4code - December 11, 2017, 5:01 am

Happy to come around here and will be back in few time for payment.

xor - December 24, 2017, 2:03 am

Merry christmas to everyone. We're operative even on these holidays as always!

Regards

Am asking if this crypter work with Imminent Monitor 5

AARE_BABS - January 4, 2018, 1:46 am

Hi,am looking for a good crypter to make my exe FUD can someone help me out my skype: jackyjacky5216 [Best Crypter}

xor - January 6, 2018, 12:25 pm

Latest engine fixed multiple execution BUGS on some systems.

Expect soon also a client update wich will better handle the engine updates, and fix other minor bugs too !

Please PM me for any questions or bug if anyone found.

Regards,

?Ladon Kkc - January 6, 2018, 5:07 pm

(Jan 3, 2018 01:53 AM)zeros4code Wrote: [\[CITE\]](#) Am asking if this crypter work with Imminent Monitor 5

Wondering the same thing can you verify this Q ? thanks !

Edit* already found out nvm

xor - January 7, 2018, 1:30 pm

Still good news ! Now our system automatically detects if any private stub is available for purchase (PROFESSIONAL VERSION) .

If you're wondering what PROFESSIONAL version has more than BASIC:

PROFESSIONAL Version has

Custom stub = The code of your stub is not shared with anyone else.

Enhanced memory protection.

Enhanced encryption algorithms.

Execution within the same process (NO EXTRA PROCESS CREATED)

Custom updates when needed (on demand by the user)

More updates coming on the website and on software, stay tuned as always :)

Use

Also, is Dark EYE a Public Stub or Private stub crypter?

Finally, which programming language is Dark Eye built on?

Thanks.

Q: Is Dark EYE compatible with Nanocore and Orcus both which are .NET programmed.

A: Best choice for crypter! but I would recommend use native tools with DarkEyE.

Q: which programming language is Dark Eye built on?

A: "DarkEyE is coded in Visual Basic 6.0 with a full asm engine."

[Source](#)

Q: is Dark EYE a Public Stub or Private stub crypter?

A: Both of them. <https://www.securitycode.eu/pricing/>

You can check F.A.Q. for more info.

Exodus - June 7, 2018, 6:45 am

(Jun 7, 2018 03:05 AM)kinsella Wrote: [\[CITE\]](#) Is Dark EYE compatible with Nanocore and Orcus both which are .NET programmed.

Crypting Orcus binaries is against their EULA.

EDIT: We re-opened sales and updates as always.

Sorry for inconvenience, a full day has been added to every customer.

borito80 - August 17, 2018, 9:04 pm

There are many looking for crypters that work well with native miners.

It is important that it is a FUD runtime and that it is maintained long enough until the stub is updated.

Could I send the miner for you to test if it is FUD scantime/runtime?

Then I would buy it like other users.

Hackism - August 18, 2018, 6:17 pm

You must be sick, I told you that I made a deal a few hours ago with a private encoder. I have given my word of honor and so I have expressed it to other coders who have contacted me.

You are saying it yourself: You have offered me a free crypta and I have rejected it, why?

Also after what I just read in your thread I will not deal with you ever, swindler.

Spoiler [\(Click to View\)](#) <https://hackforums.net/showthread.php?tid=5567127>

And surely the others must be similar.

I apologize to OP and readers of the thread for using it for a dispute with this stupid one, but he has obliged me with his actions.

shut the fuck up you fed. you ask in all threads for sellers to crypt your file for a test. your bloody shit feds want to kill all crypters. fuck off and stop quoting me. silly fed.

Master in Online Business - August 20, 2018, 11:01 am

GREAT PRODUCT NO ANY OTHER CAN BE COMPARED WITH IT

xor - August 22, 2018, 1:56 pm

In the next days you will see a GREAT improvements on execution. The update will probably made on the fly, without needing to update the client. This will include a better memory protection handling, and a more stable execution method. Stay tuned :) Consider this update wich will comes as a "V4" Version.

bijenu - August 24, 2018, 10:56 am

Does it work with Agent Tesla Keylogger

xor - August 24, 2018, 12:47 pm

Client update 3.1 has been finally released. Output file has now additional anti-debuggers technique added. Message me for any issue.

F.A.Q.

[\(Click to View\)](#)

Q: What language is coded in?

A: Visual Basic 6: DOESN'T need any additional dependencies. (NO .NET / JAVA). Protected file can be executed on every Windows based system without compatibility issues.

Q: Does it have USG ?

A: Yes , better than a simple USG: the main application you select is encrypted and then protected with avdanced encryption methods.

Each protected file is from 90 to 96% unique.

Q: My monthly subscription expired, how much would cost to renew it ?

A: Same prices.

Q: Can i change my HWID when i want?

A: Yes, if your subscription is not already expired, of course. To do so, login to client area, go on settings page, and save your new hwid. It may require up to 24 hours.

Q: Does it has unicode support?

A: Yes, it has unicode support, that means that the protected file will works without issues on unicode machines(systems wich have particular languages chinese/russians/etc.)

Q: Can i resell my license?

A: No.

Q: My protected application doesn't works, what to do?

A: Try to use compatibility mode option on wich can be found on darkeye. If this doesn't works, your application doesn't works or it's not compatible.

One of the best programmers on this forum. Vouch for DarkEyE, you will not be disappointed!
