I received a trial vouch copy of this product and I am thoroughly impressed with the software. It works well bringing in lots of dislikes. Very easy to setup and get running and although I haven't tested the flag option I have no concern over it. Definitely a good buy to scare off any competition or if you just want to laugh as your friend gets disliked into oblivion >:D

Can you code a YouTube view bot? Maybe incorporate the two together? I would be more interested in something like that for casual use not so much as CPA/PPD, while it can be used for that as well.
