Thread: [How to make some extra cash online! Easy as hell!](#)

ThaGambler - December 21, 2014, 5:51 pm

Hey HackForums,

First off, I would like to say I am not the original creator of this method. Someone told me about this and all I did was maybe modify it a bit. Anyways this is the method. It will take you no more than 10 minutes of work a day and you can easily make some good pocket money. I know this because I've made quite a bit using this method.

Now for the Method!

The Basics: GCa.sh is a URL Shortener by the owners of GProfit.de. GProfit.de paid out over 550.000€ in the last 5 years! It is run by a registered company in germany with 25.000€ in registered capital.

You can earn 2.5\$ per 1000 Visits on WORLDWIDE traffic. No shitty up to 10\$ CPM when you in reality just get 1\$ or less! You will be tricking horny guys without a brain to click on your links which can be easily done using this method. If you dont want to use gca.sh you can use any other url shortner btw but for this method I will be using gca.sh.

Step One: Setup GCa.sh Account. If you haven't, sign up to Gca.sh. Click Register and fill out the form or simply register using Facebook, Google or Twitter!

Step Two: Once logged in, you'll see this tool which you can use to shorten links:
We wont be using this yet, but just keep this in mind.

Step Three:

Head over to [Reddit.com/r/Gonewild](#) and pick some random hot girl.

Upload 2 pictures to imgur.com

Shorten the imgur links with the tool in your user dashboard on GCa.sh

Mask your links with bit(dot)ly (better safe than sorry!)

Step Four: Go to this list of websites and submit your fake kik profile with your shortened links from GCa.sh.

<http://www.findkikfriends.com> Works best

<http://kikfriends.com> not too god but can still get the job done

<http://kiknames.com> it's okay...

Step Five: Go to a kik sexting forum below. Choose any of the ones below and start spamming new threads in every category. Choose a thread title like "18/F/Horny looking for horny sexting buddy".

The thread should look something like this:

Quote:I'm 18, female, super horny :(
Please help me get off :*

Here's a pic of me: <http://bit.ly> [WARNING: potentially infected]/asdj8s (These should be images of the girl)

Here's what I look like: <http://bit.ly> [WARNING: potentially infected]/ahsd89 (These should be images of the girl)

Here's a short sneak :* <http://bit.ly> [WARNING: potentially infected]/asdh88 (These should be images of the girl)

AND here is my kik ! <http://bit.ly> [WARNING: potentially infected]/asxk33 (This should be a link to the profile of yours on the kik website you posted your fake profile.)

Please comment or I wont add u XOXO

List of Forums:

This is in my opinion the best method out there to earn money with short links. This is an easy 10k clicks PER DAY itself if you do it persistently!

Somewhat nice method, public most likely but I would keep this to myself still.

BRB, making an eBook. Thanks for the \$200+ OP!

uriel360 - December 21, 2014, 6:32 pm

And the Captcha is not getting in the way? I would imagine some people might not want to do this step.

ThaGambler - December 21, 2014, 6:40 pm

Hahaha this method is already public dont know why people would want to make an ebook lol. If anyone has any questions as this is a fairly long post, let me know.

How much money have you made so far?

More than enough to make this method worth the time. I'm not posting any figures publicly.

Sounds like a load of BS but the actual method seems legit.

I have no idea how you get so many clicks, I don't get more than 6

//The Storm - December 22, 2014, 6:56 am

With snapchatforum, you have to use a different link shortener

thank you so much mate ! Really nice to see some good shares

You might hate me but this is my personal input to uberannoying url shorteners with intermediate page infested with malware paying FLAT RATE for HQ Reddit traffic:

(Dec 22, 2014 05:10 AM)Azraelstear Wrote: [\[CITE\]](#) I see there's just another thread about Gca.sh and Reddit/kik method.

And someone even though "Hmm, it would be good to make paid e-book from this public method"

So here are reasons why this method SUX.

1. This method was already posted by AlfaBravo. Please don't repost it.
2. Gca.sh is UBERannoying, with 2 pop-ups, intermediate AD promoting Malware
3. Gca.sh captcha doesn't load often in Chrome making people unable to go to content.
4. any less annoying URL shortener makes much more counted views.
5. With malware infested intermediate landing pages, and pure money making motivation won't get you far in Reddit
6. Reddit readers are learning fast and most WILL STOP CLICKING on Gca.sh
7. MOST OF REDDIT traffic is from US. So it's plain stupidity to choose Gca.sh with their pathetic FLAT RATE and high losses due to captcha and malware infested intermediate ad.

MAIN PROBLEM:

If I have thousands of horny visitors I would be stupid to monetize them with Gca.sh when I can drive them to website with Adult dating or Ex-GF affiliate links and content.

As most of Reddit traffic is US, they have high GDP per capita and high computer skills, are used to paypal, paying with CC's ... they are one of very few nations that actually spend money online regularly

Around 60% US traffic. Any penny method is waste of effort.

Alexa have only 2-3M toolbars. Similarweb is from Israelis and according to guys that deal with them, they have data from over 50M computers so they are more accurate.

You don't have to use gca any link shortner that's worth it can work. ALso using bit-ly or goo.gl to mask your links is not a bad idea. Also if you read the post properly I did say that I am not the original creator just someone who maybe tweaked it a bit.

I understand that. I've just have urge to inform other that even if it is somewhat profitable, it's waste

of much bigger potential of this traffic.

kasperr - December 22, 2014, 8:43 am

Such a saturated method. Hey, still a good basic idea that can be applied to other scenarios though...
