Thread: [\[\\$15\]\[V3.0\]\[100% FUD\] - Hidden Iye Keylogger/Stealer \[FF/IE/MSN Stealer\]\[Hidden Process\]\[USB Spreader\] - No .Exe](#)

Samuell - June 4, 2010, 9:49 am

Current Price :

New Customer - \$15.00 USD

Source Code + Resell Rights - \$60.00 USD

V2.1.5 Owner: \$0.00 USD

V2.0 Owner: \$2.00 USD

V1.1/V1.0 Owner: \$10.00 USD

What do you get for \$15?

- Hidden Iye Keylog Builder V3.0.exe
- (100% FUD) Hidden Iye Stub.exe
- Hidden Iye Vaccine.exe
- Reshacker
- Over 50 Real System .lco Files
- Free Setup/Support over Teamviewer
- Money-Back Guarantee if there are any problems with the sale/setup. (At my own discretion)
- 1 Month Support / Lifetime Support (+\$5)

How do you buy this?

- A. Send me a PM on HF.
- B. Post your information on the thread.
- C. Message me on my one and only MSN in my signature. (z-technical@hotmail.com)

"Virus scan plz!!"

V3.0 Functions (List):

- 100% FUD
- Invisible on Task Manager List
- USB Spreader (Working on Win98 - Vista, will not spread on Windows 7)
- Written in VB.net
- System folder not viewable, regardless if "Hidden folder viewing" is on.
- Keylogger works on ALL WINDOWS OS.
- SMTP Mail Function
- Sends Activation E-mail when opened on a computer
- Supports @gmail, @google, @hotmail, and @live for sending address
- Set subject of the e-mailed keylogger
- FTP Mail Function
- Choose FTP Server
- Choose Folder on your FTP Server
- Choose name of uploaded files.
- Sends confirmation e-mail/file when keylogger is activated on a computer.
- Takes a picture when victim launches program, so you know which one of your phishes they fell for.
- Encrypts strings/obfuscates code (can't be de-compiled)
- Works on Windows 98/Xp/Vista/7
- Set custom log interval
- Name *.exe whatever you want
- Spawn fake error message with custom title/message/symbol
- Add to Startup (Registry)
- Registry Checker (If startup value is deleted, the program will simply re-create it).
- Kills Task Manager (No error message, just doesn't open).
- Kills CMD
- Kills Regedit
- Melts Original *.exe
- Anti AVG/Sandboxie/VMware/etc... (Over 50+ Anti's)
- Sends Screenshots with every log
- Logs anything that the victim Copy+Pastes (Clipboard stealer)
- Built in File Pumper
- Submit-A-Bug Page
- Only allows program to be run once, even if it doesn't melt.
- Uses Hooks
- Low CPU usage and size (Less than 1 CPU)
- Only uses network when sending logs, TCP/UDP programs cannot detect.
- Clear Logs (No [TAB] or [ENTER])
- Smart Logs (Shift capitalizes letters, space adds a space, etc etc)
- Displays window that is being typed into
- Copies self to hidden system directory upon opening, and renames self to winlogon/svchost.exe
- Steals System Information
- Hidden Startup (Invisible)
- Backup program that re-copies and runs the keylogger from a hidden system directory if it's ever deleted.
- Option to choose to display [Backspace] in logs or simply remove a character each time they hit it.
- Quiet first run, disables Anti-Virus scanners/Viewers, then copies self, then re-enables.

- Steam "Stealer"
- Updated Vaccine, flawless and takes 5 seconds to remove.
- Unkillable process on all Windows OS.
- Keylogger spawns a fake error message when victim attempts to end process, claiming it is a critical system process.
- Send to any e-mail@anydomain you want.
- Customize the "To" e-mail address.
- Deletes all cookies in browser, forcing victim to relogin to his accounts.
- Advanced HWID Locking system, if you don't pay for this product, it will not work on your computer. (Leech-Proof).
- All code is highly encrypted, I have not yet seen a decompiler that does more than spit on weird Aztec symbols.
- Program designed to allow one server to infect 100's of people and not run into errors of overwriting files (FTP) or overloading SMTP Servers.
- Built in binder.
- Built in downloader.
- Toggle Mouse Clicks.
- Firefox Stealer
- No-IP Stealer
- FileZilla Stealer
- CD Key Stealer
- Windows OS Serial Stealer
- @hotmail.co.uk + @googlemail supported.
- FTP Function will now never overwrite old logs.
- Disable Keyscrambler option. Enough Said.
- Runtime FUD (Except against NOD32)
- Steals more system information.
- Stable + Hidden Run on Restart.
- Unkillable Process.
- Dynamic Naming Function
- Flawless Vaccine, works 100%.
- [NEW] MSN Stealer
- [NEW] Internet Explorer Stealer
- [NEW] IMVU Stealer
- [NEW] Pidgin Stealer
- [NEW] Update Information Page
- [NEW] Advanced USB Spreader (No More Timers)
- [NEW] .Com Extension Added
- [NEW] .Pif Extension Added
- [NEW] .Scr Extension Added
- [NEW] UAC Bypass
- [NEW] Sexy New GUI
- [NEW] Silent Run on Startup
- [NEW] Built-In Stub
- [NEW] Terms of Service Graphic
- [NEW] Google Chrome Stealer (Only works if chrome is closed when the program is first run.)
- [NEW] Added Username System
- [NEW] Added MD5 Hash Encryption (E-mail Credentials)
- [NEW] Changed HKLM -> HKCU
- [NEW] Updated Manifest File
- [NEW] Hidden Extension

V3.0 Functions (In-Depth):

- Built-In FUD File Binder

That's right. This is probably the most requested function; it does what you expect it to do, it'll bind the keylogger's server to any .exe you want. Also, since the binder uses a unique non-fail dropping method, after the program is run the first time, your keyloggers code is removed from the binded file and safely placed in their system :). Leaving the original file as just the fake program/malware you tricked your victim with.

Have fun spreading like a champ.

- Built-In Remote Downloader

Oh yes. The name basically describes this function; when the virus is first run on your victim's computer, the given URL will be downloaded to their system files and ran. This is a great way to spread both your keylogger and your botnet!

Warning: Make sure the software being downloaded is 100% Runtime FUD, otherwise you'll probably end up giving the keylogger's position away to your victim.

- Add To Startup

This is probably the most easy to understand function; it adds a registry key to tell the computer to open the virus on startup. Also, if the registry key is ever deleted, it will immediately be re-written. (Checks every 0.001 seconds)

- USB Spreader (Not Working on Windows 7)

Another fairly obvious function; the USB spreader does exactly what it says. When someone put's their USB into a computer infected with your keylogger, the keylogger will immediately copy itself to the USB in a hidden directory, and it will also write an autorun.inf file on the USB to tell it to always run the keylogger immediately when it's plugged into any computer.

(E.X. If Computer A is infected, and the USB is plugged into it, and then plugged into Computer B, Computer B is now also infected.)

- Send Screenshots

If this option is selected, along with receiving a text log after every time the interval you set is reached, you will also receive a full screenshot of your victim's computer. This is very useful as it gives you some general information about them.

(E.G. What timezone their in, what they like to do in their free time...what kind of porn they watch, etc!)

- Log Clipboard

A very nice function; whenever your victim copies something to the clipboard using (Ctrl+c) the keylogger steals a copy of whatever they copy and adds it to the log. (You can see an example of this in the SMTP Log picture above). Useful for getting sensitive information such as confirmation codes/passwords.

- Display backspace as -1 letter in logs

The title basically tells you what this does; you can either see [Backspace] in your logs or 1 less letter for every time the victim presses backspace. This may make better logs, but most people tend to spam the backspace button way too much, causing the log to become inaccurate.

- Clear Steam Cache

This function runs an extra command when it's first run, deleting a number of registry entries/temp folders that hold cookies. This is useful because it forces your victim to re-enter their username and passwords for any account they previously selected "remember me" for. (Such as steam).

- Melt Original File

This is a very nice little function. Basically, after the keylogger has successfully infected your victim's computer, it deletes the original .EXE you sent your victim.

P.S. This isn't one of those fail functions that makes a .bat file telling it to delete itself, this is the real deal.

- Kill Taskmanager/CMD/Regedit

This function simply disables the victim from using the selected system application. Rather than using the registry to disable them, I use the program itself; this is seen as less effective, but I feel that keyloggers are more about stealth, and with this method people won't get an error when they attempt to open these processes, they just won't open. (A lot of the times, people will Google the errors they get and then fix their problems).

- Hidden Process (Epic)

This is my favorite function. Credits to Scout for the source code, I modded it a bit to make it usable for this application. Basically, when your victim starts up task manager, everything will be normal, but the virus will NOT APPEAR. That's right guys, they can't end the process if they can't see it, so....yea. (Also, programs that are made specifically to find hidden processes will not detect this, since it's a simply blink function on a timer of 0.0001).

- Display Mouse Clicks

After getting a lot of complaints from people who said their FTP/SMTP were getting flooded by [Left Mouse Click] I decided to make it toggle able. If the option is not checked, mouse clicks will not be recorded.

Thanks for all your support and help everyone from HF and LC.

Special Thanks to:

Vaqxine - Basically wrote my HWID Lock Code

Snefl - Designed The GUI of the V3.0 Builder

Miharbi-DoNo - Gave me Source Code to his Chrome Stealer

Erudite - June 4, 2010, 9:55 am

If your thinking about purchasing this I would 100 % recommend you to, this guy puts 110% into any support you ask for. This is a FLAWLESS keylogger, beats anything in the market (in terms of value for money, support and quality) BUY whilst price is cheap, as this is surely going to rise as its an amazing product.

I have successfully logged hundreds of victims, and I am loving the new additions, hiding the .exe is great; stops suspicion arising. Also the GUI is very simplistic but easy to navigate and very simple to set up.

Great guy, great product.

Samuell - June 4, 2010, 10:09 am

Thanks for the support mate! ^^.

Joshua4550 - June 4, 2010, 10:26 am

Holy titfuck, this is ABSOLOUTELY AMAZING! If you need a keylogger, for home/public use, or you want to hack anyone.. this is THE PRODUCT to buy! Totally what he advertises, not ONE BIT misleading, works PERFECTO, has a NAICE graphical interface. Easy to install, easy to remove if you have the vaccine, easy to setup, test. Sends you an email/uploads files to tell you when its activated EVEN gives all saved passwords in most browsers. FUCK THIS IS AMAZING. I ABSOLOUTELY SUGGEST BUYING THIS ;) For \$15, you're dumb to not buy it! Vouch!

Edit: Ah, my ftp details got found through the built .exe

Samuell - June 4, 2010, 10:32 am

Haha, thanks for the awesome vouch man!

BigG - June 4, 2010, 11:03 am

Hey man nice job on the new GUI ? Remember if you need anyone just ask (im the sig guy) :P

I might get this one but I only have the money on alertpay. Do u accept that? I have v2.0

Ekk0 - June 4, 2010, 11:10 am

Love the program. WELL worth the purchase.

tiffbunnyrabbit - June 4, 2010, 11:16 am

wow the gui looks great u cant ask for anything more im buying now

prowler.inc - June 4, 2010, 11:22 am

big vouch from my side , im also using it and that is the one that made me happy after buying 5 different loggers here

msuper28 - June 4, 2010, 11:24 am

great keylogger btw why did you scan the stub to virus total!? use scan4you.biz instead...

Samuell - June 4, 2010, 11:34 am

VirusTotal is the most up to date scanner, so I wanted to prove it's truly FUD.

Thanks for all the vouches people, I'm back on MSN now!

Oxycotton - June 4, 2010, 11:39 am

Epic... nice job on this one classical! :D /WIN

Samuell - June 4, 2010, 11:48 am

Oh my lord in heaven, my paypal has been limited for the #8th time, if I can't get it unlimited I fucking

quit -_-.

j0ey - June 4, 2010, 12:16 pm

Cool, well be messaging you when youre on

Oxycotton - June 4, 2010, 12:17 pm

Classical! No don't quit! There is tons of way to unlimit it!!

tiffbunnyrabbit - June 4, 2010, 12:26 pm

im trying to purchase now and it wont send but dont quit just figure out whats going on your doing a great job im very pleased with how sleek your user interface look

Samuell - June 4, 2010, 12:58 pm

If someone could like, set me up with a verified paypal I'd give them something really freaking good.

(If it helps I have an unused Visa GiftCard)

Oxycotton - June 4, 2010, 12:59 pm

Classical, please send me the v3 via PM !

Samuell - June 4, 2010, 1:06 pm

I will get on MSN a little later and give everyone their copies of V3.0...I'm just trying to sort out Paypal (AGAIN).

Oxycotton - June 4, 2010, 1:06 pm

Oh yeah.... sorry my bad :P Forgot.

Joshua4550 - June 4, 2010, 1:19 pm

Does it have to be verified? I mean, or is your problem just the limit thing? Go on msn, tell me whay you needed a verified - I may be able to help.

Shift-T - June 4, 2010, 1:27 pm

sory to hear abt ur paypal
hope soo u get it back

and BTW is this RUNTIME and SCANTIME ? FUD

Joshua4550 - June 4, 2010, 1:35 pm

(Jun 4, 2010 01:27 PM)Shift-T Wrote: [\[CITE\]](#) sory to hear abt ur paypal

Talk on MSN..

MsgTooShort

Samuell - June 4, 2010, 4:00 pm

Fixed my Paypal issues for now, Sales/Upgrades are back open!

Joshua4550 - June 4, 2010, 4:01 pm

Uh.. my ftp details got found through the built .exe

Samuell - June 4, 2010, 4:02 pm

(Jun 4, 2010 04:01 PM)Joshua4550 Wrote: [\[CITE\]](#) Uh.. my ftp details got found through the built .exe
As you've told me on MSN, you sent it to your friend who is highly experienced in computers; chances are he simply cracked the EOF. Luckily, 90% of PC users aren't that smart.

However I will add an MD5 Encryption to the FTP details in V3.1.

harrypage - June 4, 2010, 4:57 pm

Vouch, just brought and VERY impressed, thanks alot!!

Samuell - June 4, 2010, 8:31 pm

Bypassed Avira's stupid EOF detection by using Deathader's Resource Tutorial :).

http://scanner.novirusthanks.org/analysis/8a169d88170d821d0b818249f96300b8/b2hteWcwMDAwZC5leGU=

Samuell - June 4, 2010, 9:50 pm

I'm gonna get offline soon; I've updated about 25 people today, and sold about 9 copies.

Once things start to die down I'll start working on V3.1 :)!

swift87 - June 5, 2010, 2:57 am

Ok, sorry to do this, but I have to report some bugs. I can't explain how, but I have a modest test computer that I haven't been able to successfully infect with ANY keylogger (and I tried with more than 10). (I am thinking very seriously on making a contest on keylogging it). So here are the bugs:

On win xp professional 32bit:

on users with admin rights it installs, I get the confirmation email, but then after reboot it doesn't add to startup.

on users with no admin rights doesn't even install.
Think you can help with this?

[later edit] Ok, back with some more...AVG detects "C:/.../Temp/java update.exe" as Hack Tool.ILY when I install the server. By the way..what is this file used for?

Samuell - June 5, 2010, 5:45 am

(Jun 5, 2010 02:57 AM)swift87 Wrote: [CITE](#) Ok, sorry to do this, but I have to report some bugs. First off, I just personally tried the reboot function, it works perfectly fine. Secondly, you said that you've tried over 10 keyloggers, so I'm assuming your computer is missing some kind of key component that all keyloggers utilize. Third, Java_Update is the chrome drop, as I said in earlier threads I can't get the pure code version to work, due to some compatibility issues with Windows 7 SQLite. Fourth, it does not require admin rights, I just ran it perfectly fine on a user account.

If you have any more troubles feel free to hit me up on MSN.

P.S. My Paypal's are getting limited everyday, over \$2000 now in limited paypals. If I don't find a solution to this soon, I might just go back to gaming lol.

If anyone knows some methods to get a paypal that has a low chance of getting limited, please let me know! I have an unused Visa Gift Card that can be hooked to a paypal account if it matters.

Bendik - June 5, 2010, 6:19 am

Well, why are you getting limited all the time?

PayPal doesn't limit you for no reason, so there must be something your doing wrong ;-p

Vanity - June 5, 2010, 6:26 am

(Jun 5, 2010 06:19 AM)Bendik Wrote: [CITE](#) Well, why are you getting limited all the time?

Yeah, and there was. Looks like he has finally figured it out ;)

The new Hidden Iye works perfectly well~ except it's unable to log keys from my computer :P only other people...

vouch for classical!

StonyHeart - June 5, 2010, 8:03 am

big vouch for this guy , i am also using it and this one made me happy , very trusted man.. thanks again

bruenor9 - June 5, 2010, 8:10 am

Hmm Looks good IM thinking about bying it lol seems very nice :D

Snefl - June 5, 2010, 8:16 am

Vouch for Classical. He provides fantastic support and doing business with him was a pleasure.

Samuell - June 5, 2010, 8:56 am

!!! IMPORTANT !!!

Guys, my Paypal has been once again limited, and I'm getting really sick all this.

Basically, any support/updates I'm doing right now are 100% free, since I have lost all money made from this keylogger thanks to Paypal. I will not be making ANY sales until this is 100% sorted out. If anyone knows how to get me a legit, verified Paypal, I'd pay you very well if you could hook me up.

So for now, I will update/support as I can, but please understand I've received \$0.00. If you have payed for the product, feel free to request a chargeback on paypal, since I don't have access to anyone's money, and it's better that you guys have it rather than stupid Paypal.

So if anyone can offer me any help in this matter, it would be greatly appreciated.

P.S. If it matters, I do have a Visa Gift Card that can be hooked to Paypal accounts.

Asus - June 5, 2010, 9:16 am

Sad to hear about this but my copy of the keylogger is not working.

Samuell - June 5, 2010, 9:17 am

(Jun 5, 2010 09:16 AM)Asus Wrote: [\[CITE\]](#) Sad to hear about this but my copy of the keylogger is not working.

That sucks, feel free to charge back the cash until I can assist you. Honestly man I'm in a bad mood, I've lost \$1.5k in the last month, and wasted the better half of my days programming something that I've gotten no money for.

damag3 - June 5, 2010, 10:43 am

pm me when u can sell me a copy id buy

sad to hear bout ur loss

Samuell - June 5, 2010, 10:51 am

No one knows how to get past Paypal's retardation? :(.

damag3 - June 5, 2010, 11:05 am

Did they tell you why it got limited?

Asus - June 5, 2010, 11:10 am

(Jun 5, 2010 10:51 AM)Classical Wrote: [\[CITE\]](#) No one knows how to get past Paypal's retardation? :(.

I felt it. Submit fake documents and I know someone who can do it for you and he had pass once with me.

ShadeLeech - June 5, 2010, 11:21 am

1. Change your ip.
2. Make a new paypal with NO information the same, although when you use fake info you'll find yourself unable to make one of those paypal CC things for online purchases that require CCS
3. Only trade with people who are paypal verified.

IF you don't have a credit card, there are guides on how to make an online bank account for free for you to verify a new paypal account. The process of verification via online bank account is 3-4 business days. However, once you make the new paypal you'll be a-ok to receive money again, you just wont be able to spend it.

If you're trying to get unlimited i wouldn't depend on it considering the kind of users on this site combined with the kind of users who would use this kind of product, and what they would be using it for.

StonyHeart - June 5, 2010, 11:03 pm

(Jun 5, 2010 08:56 AM)Classical Wrote: [\[CITE\]](#) !!! IMPORTANT !!!

Guys, my Paypal has been once again limited, and I'm getting really sick all this.

Basically, any support/updates I'm doing right now are 100% free, since I have lost all money made from this keylogger thanks to Paypal. I will not be making ANY sales until this is 100% sorted out. If anyone knows how to get me a legit, verified Paypal, I'd pay you very well if you could hook me up.

So for now, I will update/support as I can, but please understand I've received \$0.00. If you have payed for the product, feel free to request a chargeback on paypal, since I don't have access to anyone's money, and it's better that you guys have it rather than stupid Paypal.

So if anyone can offer me any help in this matter, it would be greatly appreciated.

P.S. If it matters, I do have a Visa Gift Card that can be hooked to Paypal accounts. I will not lie to you. PayPal is a dirty business. Most of their seller protection is just for products that can be proven. Things that exist. Not electronic goods. It's hard, if not impossible, to 100% protect from reversed PayPal payments and account access limitations. But, there's a couple ways you can protect yourself.

PM me to tell how to protect yourself from reverse and from account access limitaion.

Free Bump for my Friend

its worth the money + he also give the support he says not like other ! ++++

Samuell - June 7, 2010, 9:14 am

Wrong thread, this can be considered as a multi-post :P.

zSwag - June 7, 2010, 9:22 am

Great Keylogger and an even more amazing price! Only \$15... What you get is simply indescribable.

Hi.

ruskg123 - June 7, 2010, 9:22 am

big vouch from my side, Love the program. WELL worth the purchase.

Samuell - June 7, 2010, 9:54 am

Thanks for the support guys, hope you enjoy the product!

Xerexz - June 7, 2010, 10:06 am

This is so totally worth your \$15!

It has EVERYTHING you could need for your keylogging duties :p

I highly suggest you use Classical's keylogger, as it is 100% pure quality <3

I just bought it, works perfectly too :3

StonyHeart - June 7, 2010, 10:07 am

big vouch from my side to classical , the only one i trust in HF, amazing programme, full functions, low price and well worth the purchase.

keep this great work..

Dark123 - June 7, 2010, 10:15 am

tHanks Alot bought his keylogger and IOved alot Great Gui
and nice fast saless

Samuell - June 7, 2010, 2:58 pm

Thanks for all the vouches guys, I'm back at home now :).

G@m3r8700 - June 7, 2010, 3:09 pm

been using this some time, before i used v.2, and this is the sickest product ever! it's so awesome, and for ONLY 15 bucks :D it's insanely cheap for what you get, and the best part is if it should be detected Classical make it fud again VERY fast and he just update for you!

a big Vouch for this software!

if you don't buy you are pretty stupid ! sorry :P

++ Classical is only 13 years old, but is a insanely good coder!

you can't stop loving him or the program when you first tried! :)

Samuell - June 7, 2010, 3:17 pm

I've restarted MSN, so now everyone who sent me a message, please send it to me again so I know who still needs updates/support/a copy sold to them.

Thanks for understanding my fail guys :D.

batucan05bb - June 8, 2010, 6:39 am

how many +free update for detect?

Samuell - June 8, 2010, 6:48 am

(Jun 8, 2010 06:39 AM)batucan05bb Wrote: [\[CITE\]](#) how many +free update for detect?

I'm not an asshole, if it gets detected within a day, or a week, or maybe (if you're nice) a month, I'll just give you a new stub.

However the actual policy is that (unless you buy the \$20 lifetime package) you will only get stub updates for up to a week, and builder updates only until V4.0.

darkzomibe - June 8, 2010, 7:08 am

Viraavy - June 9, 2010, 6:13 am

I am requesting to all user of this keylogger, pl reply their experience with V3.0.

I am facing some problem. After activation day, I am not getting logs from maximum victims. On first day, server send logs flawlessly at the prescribed interval. But after second day or restarting of the victim system, it doesnot send any logs.

What is your killing ratio. Means, how many infected files have you distributed & how many victims have you got.

Thanks,

(limposhare)

The same here. I tested on a computer i have full acces to, and the explanation is that it doesn't add successfully to startup on all computers, so after the victim shuts down the system you won't get any logs. Also on another computer I tested (this time a remote installation on a victim) it doesn't even install (and I know for sure he executed the server)..

The OS on which I'm having these problems is win xp proffesional 32bit.

I told you a while ago about this but you couldn't figure out a solution. If you have one now I'll be happy to test again. C'ya on MSN mate.

randy999 - June 9, 2010, 10:03 am

for what purpose are keyloggers used when hacking a random person?
like what passes would u want etc?

Samuell - June 9, 2010, 11:01 am

To those who are having issues with the keylogger; I want to teamviewer you on MSN. The problem is I can't recreate any of the issues you guys are having on my computer; I've keylogged myself for the past week and not a single flaw has come up =/.

If I can see the error/issue with my own eyes, it's 10x easier for me to fix.

zSwag - June 9, 2010, 3:19 pm

PM with all the details and I would like to add you as a friend is it ok with you ?

I've talked to you on MSN mate ^^.

Also, just so all my customers know, V4.0 will be the last version I release of this project; I'm gonna be moving on to something new after that ;].

(People who have lifetime support will get a massive discount on the new product, as will anyone who has ever purchased this software.)

Yes - June 11, 2010, 12:26 pm

Message me on MSN I'll do it right now.

devilofwar - June 12, 2010, 3:07 pm

Hey Guyz i see you all liked the program but it wasn't the same with me. Actually the program didn't give me any logs just screen shots and clipboard copy. I contacted classical several times he tried to fix the problem with me for a while but afterward he stopped replying on my msgs and considering that I paid the 20\$ for support. Anyway I see u all liked the program which wasn't the situation with would you please try to help fix this matter. I have several matters that are not working with this software please tell me what to do to fix them or it is a problem of the copy and should be changed. The problems are :

- 1- The software doesn't send any logs(just emails containing pics and clipboard)
- 2- No firefox stealer (in the first email there's only Internet explorer stealer) " I'm running Firefox and there's the emails password stored"
- 3- I have a no-ip running but the logger didn't steal its password and user
4. I tried the binder but it was not working fine " the outcome didn't run the server "
- 5- I didn't try the downloader & the usb spread but if you triewd them are they working ?
- 6- The program isn't totally hidden as it leaves winlogon.exe with the user name beside it in the task manager "is it normal"
- 7- I didn't try the startup run but is it working with you ?

P.S : classical told me that he's sure what's stopping the logs to be sent or recorded is a third party application which I don't have and I tried other keyloggers like the one from Boodye (crack hack logger) and it's working really fine but it lacks stealth and the other options provided in the other keyloggers.

Would you help me please !!

Samuell - June 12, 2010, 4:10 pm

I'm not sure yet, I recommend you don't buy from him until I verify.

Samuell - June 14, 2010, 2:25 pm

Hey guys, I'm almost done with V3.1, here's the change-log:

- [NEW] Login System
- [NEW] Auto Update Feature
- [NEW] Chrome Stealer (no drops)
- [NEW] Improved Keylogging Structure
- [NEW] Fixed Startup Bug
- [NEW] Changed Infection Path
- [NEW] Updated Vaccine
- [NEW] Stub is now both scantime AND runtime FUD
- [NEW] Added Persistence

I'm gonna be adding MSN, P2P, and some other spreaders very soon, I just want to get this update out first. I'll release it as soon as my hosting is up.

Fr3shY - June 14, 2010, 4:28 pm

I tried contacting you to purchase on MSN but you never responded. If I can purchase through PM, feel free to message me the info or else I'll wait for your response.

(Jun 15, 2010 02:59 PM)darkzomibe Wrote: [\[CITE\]](#) updating went smooth :3 Buy this keylogger, you wont be sorry!
Thanks for the support man, and yea guys, this is THE keylogger to have ^^.

Samuell - June 15, 2010, 7:08 pm

I've released V3.1.1.

V3.1.1 Changelog:

- [NEW] Added .jpg compatibility with binder.
- [NEW] Added .mp3 compatibility with binder.
- [NEW] Added .avi compatibility with binder.
- [NEW] Added .txt compatibility with binder.
- [NEW] Binded Files are now 1/19 UD, Avira detects them and I know how to bypass it, but I really can't be bothered to right now lol.
- [NEW] You can now choose a custom SMTP server to recieve your logs on; so you could have your logs sent to admin@hackforums.com for example.
- [NEW] A few other minor bug fixes.

If you have V3.1, you can automatically download this update by simply running the builder and logging in :).

badwayz - June 15, 2010, 8:50 pm

Works great so far!! If it continues to work forever I'll be very happy!! :) I will be doing more testing tomorrow! Thanks very much!

Samuell - June 15, 2010, 9:16 pm

(Jun 15, 2010 08:50 PM)badwayz Wrote: [\[CITE\]](#) Works great so far!! If it continues to work forever I'll be very happy!! :) I will be doing more testing tomorrow! Thanks very much!
I hope it continues to work well for you, cheers mate ^^.

Samuell - June 15, 2010, 10:42 pm

Working hard to release yet another update tomorrow (V3.2) I'll keep you guys informed.

Spoiler Alert [\(Click to View\)](#) I'm gonna be adding a lot of spreaders :).

Spacedllama - June 15, 2010, 11:50 pm

How do i get the latest version? =/

Titleman - June 16, 2010, 3:08 am

man when i try to update its stuck on 99% for long time

Radino321 - June 16, 2010, 4:16 am

idont remeber which 1 ibought (and i lost it)
but ithink it was 2.0 and , iwanna to update for 3.0 .

Asus - June 16, 2010, 4:50 am

Classical, I need the updated one. Right now I have a none working copy.

Samuell - June 16, 2010, 8:35 am

Guys, when you run the auto updater, you need to run the builder as an administrator, or it will not work!

4l1 - June 16, 2010, 9:20 am

Ive bought it I can say you it is fucking great. Every Penny is worth ! UNBELIEVABLE!

Ex0z - June 16, 2010, 9:23 am

Hey how do i get the updater i cant find the auto updater?

Samuell - June 16, 2010, 9:28 am

J U i C Y only version V3.1+ has the auto update feature, message me on MSN if you need a manual update to the newest version :].

(Jun 16, 2010 09:20 AM)4l1 Wrote: [\[CITE\]](#) Ive bought it I can say you it is fucking great. Every Penny is worth ! UNBELIEVABLE!

Thanks man, I'm glad you're enjoying it!

magret - June 16, 2010, 9:32 am

update my version 2.0 to version 3.1.1

Always happy to make trade with this man

Like the regular update of this project

darkzomibe - June 16, 2010, 9:41 am

I said it before and i say it again, buy this keylogger, you will only be happy about this product..

Vouch vouch vouch vouch..

Well can only say Classical if you ever need one to help with supporting on your future products then i would love to be a part of it. :)

Teh Wallhacks™ - June 16, 2010, 9:44 am

Once I get some more cash I will buy this

Xerexz - June 16, 2010, 9:45 am

I just updated from v3.0 to v3.1.1.

Classical was once again, he was very kind and helpful.

v3.1.1 is amazing, like all Hidden Iye releases!

Thanks pal! :D

frankturner - June 16, 2010, 10:07 am

Yeah, Classical is the MAN! ?

The software is very cheap, updated, and backed by A+ timely customer support. I'll buy anything this man sells without a second thought.

Thank you Classical!

Samuell - June 16, 2010, 10:28 am

Thanks for all the support guys! I'm working V3.1.2 right now, it's a super minor update with a few key bug fixes :).

Teh Wallhacks™ - June 16, 2010, 10:36 am

I added you on MSN and Pmed you

Bought it and its awesome

much love :)

G@m3r8700 - June 16, 2010, 11:36 am

he just updated mine from 3.0, went smooth without any problems! still the best logger/stealer i have used

darkzomibe - June 16, 2010, 12:25 pm

Classical i got one question, is gmail/ftp information crypted?

so a person is not able to compile/hex the server ? (and gain access to the server where we keep the logs?)

Samuell - June 16, 2010, 1:09 pm

(Jun 16, 2010 12:25 PM)darkzomibe Wrote: [\[CITE\]](#) Classical i got one question, is gmail/ftp information crypted?

so a person is not able to compile/hex the server ? (and gain access to the server where we keep the logs?)

I've already added that feature, it's encrypted with XoR, I'll send it in the next patch.

TeemoProd - June 16, 2010, 1:24 pm

Vouch. This is a great keylogger.

Teh Wallhacks™ - June 16, 2010, 1:27 pm

I have gotten 1 person with this already!

BigG - June 16, 2010, 1:29 pm

After like 50 people gmail automatically blocks the logs :/

Samuell - June 16, 2010, 1:41 pm

(Jun 16, 2010 01:29 PM)????! Wrote: [\[CITE\]](#) After like 50 people gmail automatically blocks the logs :/

I can't do anything about that mate, it's Google's policy of how many e-mails you can send in one 24-hour span.

Make a new server with a different "from" address and you should be ok.
Or just use FTP.

BigG - June 16, 2010, 1:45 pm

(Jun 16, 2010 01:41 PM)Classical Wrote: [\[CITE\]](#) I can't do anything about that mate, it's Google's policy of how many e-mails you can send in one 24-hour span.

Make a new server with a different "from" address and you should be ok.
Or just use FTP.
Won't the same thing happen again when I change the 'from' adress?

Samuell - June 16, 2010, 1:46 pm

(Jun 16, 2010 01:45 PM)????I? Wrote: [\[CITE\]](#) Won't the same thing happen again when I change the 'from' adress?

The idea is that you have one "to" address, and multiple "from" addresses, that way you get all your log on one e-mail, but you can still receive a shit load of them every day.

Or you can just use a custom SMTP server. (Released that in V3.1.5)

BigG - June 16, 2010, 1:47 pm

You should add a suggestion to send limit the amount of time between logs in your keylogger then. Like put a warning ?

Samuell - June 16, 2010, 1:49 pm

(Jun 16, 2010 01:47 PM)????I? Wrote: [\[CITE\]](#) You should add a suggestion to send limit the amount of time between logs in your keylogger then. Like put a warning ?

Mm, not a bad idea, I'll add it in a future patch :P.

P.S. There was a glitch in the auto updater, it was server-sided, and it's been resolved. It should now be working just great :)!

Frankstare - June 16, 2010, 2:52 pm

Good guy!!!!

My anti virus recently ate the v2 and he didn't give me v3 yet bcause he was working on it.. I had told him what my anti virus did.... and he quickly set me up with v3.1.1 even though he was hella busy.

-vouch

Samuell - June 16, 2010, 3:18 pm

Thanks mate!

The new patch should be out by the end of the day guys!

marshall42 - June 16, 2010, 3:39 pm

Thanks for all mate!! very good job!!! ;)

xSadRulesx - June 16, 2010, 3:42 pm

(Jun 16, 2010 01:49 PM)Classical Wrote: [\[CITE\]](#) Mm, not a bad idea, I'll add it in a future patch :P.

P.S. There was a glitch in the auto updater, it was server-sided, and it's been resolved. It should now be working just great :)!
How do we auto update? Anyways great keylogger vouch!

Samuell - June 16, 2010, 3:44 pm

Just open the builder and put in your login details; if there's an update, it'll detect it.

Beck - June 16, 2010, 4:53 pm

Bringing Classical's thread back to the top :)

As far as I know, I haven't purchased Hidden Iye yet, but he seems like a good person, nice personality :)

Vouch ?

Samuell - June 16, 2010, 5:06 pm

Thanks for the support man ^^.

Samuell - June 16, 2010, 7:17 pm

V3.1.2 has been released!

V3.1.2 Changelog:

- Added .php extension compatibility to binder.
- Added .html extension compatibility to binder.
- Added .bat extension compatibility to binder.
- Added XoR Encryption to SMTP Details (Username & Password).
- Fixed the Automatic Updater.
- A copy of the changelog is now downloaded along with the new version of the builder.
- Fixed a bug that caused an error to pop up when the computer was locked.
- The 'Infection Settings' now have optimal settings pre-checked when you load the builder.
- Added some information about the "Anti" option, check the box to view the info.
- Re-FUD'd the stub file.
- The program will now check to make sure your HWID is valid whenever you hit "build", so if I disable your HWID and you just keep the builder open, you won't be able to build anything.
- Remove the word "Bit Defender" that appears under built servers.

Upcoming Updates:

- MSN Spreader
- P2P Spreader
- LAN Spreader
- RAR Spreader

- Stronger file persistence
- And much, much more!

This update is available for download through the automatic update system!

Sotirod - June 16, 2010, 7:32 pm

- The program will now check to make sure your HWID is valid whenever you hit "build", so if I disable your HWID and you just keep the builder open, you won't be able to build anything.

Does this need an internet connect connection to connect to you to verify HWID?
Why would you disable my HWID? (Just Curious)

Samuell - June 16, 2010, 7:34 pm

(Jun 16, 2010 07:32 PM)Sotirod Wrote: [\[CITE\]](#) - The program will now check to make sure your HWID is valid whenever you hit "build", so if I disable your HWID and you just keep the builder open, you won't be able to build anything.

Why would you disable my HWID? (Just Curious)

Yes, and I only disable HWIDs if the user has charged back their money, or requested (and received) a refund.

Sotirod - June 16, 2010, 7:36 pm

OK. Sounds like a winner, and makes perfect sense.
I'm booting up winderz, and will hit you up on MSN shortly.

Sotirod - June 16, 2010, 8:37 pm

Wow! This dude is fast.
Woo Hoo! The first for 3.1.2!?

Thanks Man!

Vouch!

soularsen - June 16, 2010, 8:58 pm

Thanks for the support man, I pride myself with having some of the best support on HF.

P.S. I'm willing to sell a copy of this keylogger in exchange for buying me l33t :).

Samuell - June 17, 2010, 8:53 am

Since I've released V3.0, I've already made three major updates, here's a compiled list of the additional features this keylogger now has. (Since I can't edit my original post.)

V3.1 Changelog:

- [NEW] Login System
- [NEW] Auto Update Feature
- [NEW] Chrome Stealer (no drops)
- [NEW] Improved Keylogging Structure
- [NEW] Fixed Startup Bug
- [NEW] Changed Infection Path
- [NEW] Updated Vaccine
- [NEW] Stub is now both scantime AND runtime FUD
- [NEW] Added Persistence

V3.1.1 Changelog:

- [NEW] Added .jpg compatibility with binder.
- [NEW] Added .mp3 compatibility with binder.
- [NEW] Added .avi compatibility with binder.
- [NEW] Added .txt compatibility with binder.
- [NEW] Binded Files are now 1/19 UD, Avira detects them and I know how to bypass it, but I really can't be bothered to right now lol.

- [NEW] You can now choose a custom SMTP server to receive your logs on; so you could have your logs sent to admin@hackforums.com for example.
- [NEW] A few other minor bug fixes.

V3.1.2 Changelog:

- [NEW] Added .php extension compatibility to binder.
- [NEW] Added .html extension compatibility to binder.
- [NEW] Added .bat extension compatibility to binder.
- [NEW] Added XoR Encryption to SMTP Details (Username & Password).
- [NEW] Fixed the Automatic Updater.
- [NEW] A copy of the changelog is now downloaded along with the new version of the builder.
- [NEW] Fixed a bug that caused an error to pop up when the computer was locked.
- [NEW] The 'Infection Settings' now have optimal settings pre-checked when you load the builder.
- [NEW] Added some information about the "Anti" option, check the box to view the info.
- [NEW] Re-FUD'd the stub file.
- [NEW] The program will now check to make sure your HWID is valid whenever you hit "build", so if I disable your HWID and you just keep the builder open, you won't be able to build anything.
- [NEW] Remove the word "Bit Defender" that appears under built servers.

I pride myself with releasing at least one major update every week, and a small update, or "patch" every 2 days or so :).

roboracol - June 17, 2010, 9:20 am

vouch this, one of the best keyloggers i ever seen, its worth paying for this keylogger, useful for almost anything. VOUCH!

badwayz - June 17, 2010, 9:33 am

I have been doing some testing for him as of 3 days ago after purchasing. I found a couple of bugs in some extensive testing and I told him about them and he has ALREADY fixed them!! :) I told him how I created the bugs and he knew how to fix it! Wonderful!!

Asus - June 17, 2010, 9:40 am

Nice update mate, maybe you should check the 64 bit compatibility.

Samuell - June 17, 2010, 9:47 am

Frankstare - June 17, 2010, 8:59 pm

HEY.. HEY YOU... YA YOU

did i tell you the the stealer aint workin? the only thing about the steal that is working is the msn steal and cd key stealer.. even though you suck at codeing (i am kidding n u know it) your a good man :)

Sotiroad - June 17, 2010, 10:56 pm

(Jun 17, 2010 10:37 AM)Classical Wrote: [\[CITE\]](#) If someone wants to buy me HF L33t for a copy of this keylogger, I'd gladly accept! That's \$15 for lifetime supports+update! Save \$5 :D!

I would have done it if I waited an extra day to buy. :)

Definately L33T material. You Da Man!

Logger working great!

magret - June 18, 2010, 3:18 am

2 ask :

1/ The stub is unique or publique ?

2/ The stub is in your server for the change if the stub is detected ?

4l1 - June 18, 2010, 8:33 am

- Clear Steam Cache

This function runs an extra command when it's first run, deleting a number of registry entries/temp folders that hold cookies. This is useful because it forces your victim to re-enter their username and passwords for any account they previously selected "remember me" for. (Such as steam).

This is not working!

Help me on MSN!

Samuell - June 18, 2010, 9:24 am

(Jun 18, 2010 03:18 AM)magret Wrote: [\[CITE\]](#) 2 ask :

1/ The stub is unique or publique ?

2/ The stub is in your server for the change if the stub is detected ?

1. The stub is 30% unique.

2. No, it will not automatically change in the built server, that's impossible :P.

(Jun 18, 2010 08:33 AM)4l1 Wrote: [\[CITE\]](#) - Clear Steam Cache

This is not working!

Help me on MSN!

I'll look into it.

Guys, I'm/I've kind of taking yesterday and today off since my friend who controls my paypal is on vacation, so I can't confirm any payments that are sent to me. I'll keep you guys updated but for right now I don't really plan to do any massive coding today. Thanks for understanding.

4l1 - June 18, 2010, 9:37 am

it doesn't clear the steam cache ! I will explain where the bug is ! Im waiting in msn!

Ex0z - June 18, 2010, 9:42 am

I need to speak to you on MSN later as im unsure on how to update. Thanks.

darkzomibe - June 18, 2010, 9:47 am

(Jun 18, 2010 09:42 AM)J U i C Y Wrote: [\[CITE\]](#) I need to speak to you on MSN later as im unsure on how to update. Thanks.

You mean the builder? well if you got the newer version then you just type in your login info and it will auto-detect if there is a update.

If you dont got one of the newer version then you need to speak with Classical on msn where he will need your HWID and the login info u wish to use then he build it to you and send the newer version to you.

Samuell - June 18, 2010, 9:50 am

(Jun 18, 2010 09:37 AM)4l1 Wrote: [\[CITE\]](#) it doesn't clear the steam cache ! I will explain where the bug is ! Im waiting in msn!

I've checked this out; It only clears the password field since steam has upgraded their systems. I'll try my best to fix this in the next patch, thanks.

(Jun 18, 2010 09:42 AM)J U i C Y Wrote: [\[CITE\]](#) I need to speak to you on MSN later as im unsure on how to update. Thanks.

What version do you currently have?

What he said :P.

ThisIsShort.

4l1 - June 18, 2010, 10:05 am

Yeah please fix the steam Cache clear Bug and there is another Bug in the autoupdater . It doesnt finish the Progress . It freezes 99%! BTW when will the Patch with the steam Cache clearer it is Important for me.

Samuell - June 18, 2010, 10:08 am

(Jun 18, 2010 10:05 AM)4l1 Wrote: [\[CITE\]](#) Yeah please fix the steam Cache clear Bug and there is another Bug in the autoupdater . It doesnt finish the Progress . It freezes 99%! BTW when will the Patch with the steam Cache clearer it is Important for me.

I fixed that issue with the updater, if it freezes at 99%, it means it's already updated and the new builder has been placed in the folder the messagebox stated.

To fix this, just move the builder to a new directory and run it from there. Then, when the update is done, READ THE MESSAGE BOX.

No ETA on the steam fix.

Samuell - June 18, 2010, 2:10 pm

Guys, I'm sorry if I'm not my normal happy self on MSN today, the friend who has been holding my paypal funds (About \$500-\$600 at this point) messaged me randomly on MSN saying "I'm not gonna be around for about 2 weeks ok? I'm really busy so later". So now I feel kind of scammed, I don't have access to my money for the next 2 weeks, and any new sales I make I won't have access to either lol.

So sorry in advance if I have a short temper on MSN today.

As for the new patch, it should be out tonight or tomorrow.

Cylay - June 18, 2010, 2:15 pm

devilofwar - June 18, 2010, 2:30 pm

Vouch for classical nice support. I had some problems with different things autodownloader not working, keylogger not working (just pics and clipboard, and ftp also) but I came to a conclusion after trying it on several pcs and I found where's the problem which a guy asus found it either which is 64 bit windows is making some kind of conflict with the program.

Classical promised to fix it but really nice support from the guy and what a decent person. VOUCH for classical

Samuell - June 18, 2010, 2:32 pm

Edit: I hear u likez mudkipz. :)

zSwag - June 18, 2010, 5:18 pm

sales are back on (ask classical), i am not going on vacation for another week or so. So if you're planning to buy do it soon ;D

darkzomibe - June 18, 2010, 5:27 pm

Good to hear Kevin... anyways this topic should get sticky :)

Samuell - June 18, 2010, 5:30 pm

(Jun 18, 2010 05:18 PM)Kevin23va Wrote: [\[CITE\]](#) sales are back on (ask classical), i am not going on vacation for another week or so. So if you're planning to buy do it soon ;D

Confirmed. I've talked to him on MSN, we're back in business for right now :P.

Samuell - June 18, 2010, 6:56 pm

I've released a patch... it's really not much I'm sorry guys I felt really lazy the last two days.

V3.1.3 Changelog:

- [NEW] Added Mutex
- [NEW] Added "Remember Me" for the login menu
- [NEW] Fixed some minor bugs that (I think) were causing the program to not work on x64 bit computers.
- [NEW] I've made the Automatic Updater a LOT better. You'll notice what I mean in the next update :).
- [NEW] Added the ability to view a list of changelogs by navigating to the "Info" page on the builder HUD, and then clicking "View Changelog".

Upcoming Updates:

- Steam Cache Clear Fix
- Lots of Spreaders
- Website Blocker
- Self-Destruct Function

Thanks for understanding.

darkzomibe - June 18, 2010, 7:40 pm

Thx :) just updated to next version, anything went smooth as always.

BUMP for a great keylogger.

I'm back again and online, sorry I had to step out.

magret - June 19, 2010, 12:49 am

an other ask
whats is melt original file in infection seting ?
This is not a Self-Destruct Functionwhats is it ?
thx

Samuell - June 19, 2010, 8:45 am

(Jun 19, 2010 12:49 AM)magret Wrote: [\[CITE\]](#) an other ask
whats is melt original file in infection seting ?
This is not a Self-Destruct Functionwhats is it ?
thx
Self-Destruct would delete the virus off the computer after a set period of time.

Melt deletes the original .exe the victim opens after they've been infected.

I've added everyone who has requested it, I'll be on MSN for a while now.

amit33514 - June 19, 2010, 8:48 am

intrested in buying

-Drpepper- - June 19, 2010, 2:42 pm

I can believe that a person who has 14 years old doing this awesome keylogger I recomment to all people buying his beast keylogger :)

darkzomibe - June 19, 2010, 3:32 pm

nvm

anyways i make this a bump

too short

Dark123 - June 19, 2010, 8:04 pm

got the latest version :)

like the login system

:D

Cryptic - June 19, 2010, 8:31 pm

Very nice, I give it 10/10. Very friendly guy and great support also.

Tate - June 19, 2010, 10:10 pm

Great keylogger. Transaction went well.

tiffbunnyrabbit - June 20, 2010, 9:13 am

im not sure if i have the updated version but i also cant build the module because the screen is a little messed up

4l1 - June 20, 2010, 11:23 am

Classical is working on à New steam steal method..

Samuell - June 20, 2010, 12:56 pm

Guys I do realize there are some bugs in the keylogger; I'm working to resolve these, however you must understand that it does take time to fix some of these functions, as I didn't follow tutorials to create this program, I have to test things one at a time on over 6 computers to make sure it's completely working.

I will hopefully have a new patch out tonight, but I honestly cannot promise anything.

Thank you for your understanding.

Titleman - June 20, 2010, 1:37 pm

man please fix the Clear Steam Cache
i really need it! i bought it bcz this
thanks

Viraavy - June 20, 2010, 8:26 pm

(Jun 20, 2010 12:56 PM)Classical Wrote: [\[CITE\]](#) Guys I do realize there are some bugs in the keylogger; I'm working to resolve these, however you must understand that it does take time to fix some of these functions, as I didn't follow tutorials to create this program, I have to test things one at a time on over 6 computers to make sure it's completely working.

I will hopefully have a new patch out tonight, but I honestly cannot promise anything.

Thank you for your understanding.

? At last v3.1.1 working fine at my end..?..But Kaspersky 2010 catch the server without binded situation too.

v3.1.2 & v3.1.3 not sending logs..?

Please look in this matter also.

Freshlyground - June 21, 2010, 1:27 am

Can I put this key logger into a Microsoft office document, mp3 or jpeg file ? I need to keylog this web administrator who scammed me US\$2000

MSN

i bought a lifetime

Freshlyground - June 21, 2010, 7:24 pm

I added you on MSN I want to buy your keylogger.

Samuell - June 21, 2010, 7:32 pm

I'll be on shortly, I want to get the patch finished first.

Samuell - June 21, 2010, 9:05 pm

Hey guys just giving you an update; I rewrote the entire keylogging code; it's now a deep global hook that's working great on both x32 and x64 bit computers :)!
The patch will be out tomorrow for sure, I promise!

To keep you guys from sending me death threats, here's a preliminary changelog:

- [NEW] Fixed the annoying "beep" sound that used to occur when the computer was infected.
- [NEW] Fixed incompatibility with x64 bit, it's now working perfectly on all windows os!
- [NEW] Fixed "Remember Me" Bug.
- [NEW] Made the virus less likely to be detected on runtime :D!
- [NEW] Made the infection occur on multiple threads, it runs much smoother now.
- [NEW] Fixed glitch causing the program to not properly infect Windows Vista x64.
- [NEW] There are a lot of other features that I don't feel like listing right now, but this is mainly a bug fix.

Topper - June 21, 2010, 9:38 pm

Can't wait! I'll buy it tomorrow!

Justitia - June 21, 2010, 10:44 pm

Yay! I can't wait to see the update. I've been waiting for that x64 fix before sending the logger out.

Samuell - June 22, 2010, 12:17 am

Yea, I'm gonna go to sleep now, the update will be out sometime tomorrow guys :).

wyterzzz - June 22, 2010, 1:43 am

very good keylogge
too shorty

Rayman - June 22, 2010, 2:53 am

Hi,
I also want to buy one. Pls PM me :)

Thanks

Samuell - June 22, 2010, 9:04 am

Added everyone on MSN, and I'm back online. Switching between finishing up the patch and making sales :P.

the.c0mrade - June 22, 2010, 10:50 am

Works like a charm!

This guy is a hero. Instant support. I highly recommend him.

2 Thumbs Up.

Samuell - June 22, 2010, 11:07 am

Version 3.1.4 is out.

V3.1.4 Changelog (6/22/2010):

- [NEW] Fixed the annoying "beep" sound that used to occur when the computer was infected.
- [NEW] Fixed incompatibility with x64 bit, it's now working perfectly on all windows os!
- [NEW] Fixed "Remember Me" Bug.
- [NEW] Made the virus less likely to be detected on runtime :D!
- [NEW] Made the infection occur on multiple threads, it runs much smoother now.
- [NEW] Fixed glitch causing the program to not properly infect Windows Vista x64.
- [NEW] Updated Mouse Hook, works a lot more smoothly now.
- [NEW] The Auto Updater now runs a lot smoother (as I'm sure you've noticed :)).
- [NEW] Many other minor bug fixes.

I'm very sorry, the steam cache fix will not be out till the next patch. Please stop sending me death threats :D!

OriginalKyle - June 22, 2010, 1:36 pm

Huge vouch for Classical! It's everytjing he said it is! Thanks bro. My friends will be buying soon.

Mate, for the last time, your computer is messed up. You refuse to try it on another environment. I try to offer you support, and you keep jumping on and offline every 5 seconds; so when I send my messages, you never get them. Sort out your computer issues, it's you, not the program.

I've also noticed you bought LethalInjection (which also works great) and that didn't work for you either.

devilofwar - June 23, 2010, 2:49 pm

mate I tried it today and send you a message telling you that it worked fine but after a while it did the same matter I know that my PC is messed but I tried it on another 2 pcs 2day it didn't act like my PC but still it messes after a while. As for the lethal injection ask Cyberdevil and he'll tell you that he do have a problem with the coding and he said that he'll fix it and send an update but nothing happened since then. Anyway when I bought version 3 and told you it's not working at the first time there was really a problem with x64 systems that you didn't know about until someone else complained about the same matter. I'm not offending you and I understand that your making you're best to help people and not hiding like cyberdevil but I do want perfectly running program as the usage I want to us the program in is extremely critical and there's no second chance so that's why I'm running for a perfect program to help and the time is running against me. Even I opened a thread today to ask the people to which do they recommend me to buy Winspy, SniperSpy or any other program I'm really in need for an extremely perfect keylogger and RAT.

My thread : <https://hackforums.net/showthread.php?tid=497711>

Samuell - June 23, 2010, 2:50 pm

(Jun 23, 2010 02:49 PM)devilofwar Wrote: [\[CITE\]](#) mate I tried it today and send you a message telling you that it worked fine but after a while it did the same matter I know that my PC is messed but I tried it on another 2 pcs 2day it didn't act like my PC but still it messes after a while. darkzomibe - June 24, 2010, 8:33 am

bump, also sent you a idea over pm.

Samuell - June 24, 2010, 8:56 am

(Jun 24, 2010 08:33 AM)darkzomibe Wrote: [\[CITE\]](#) bump, also sent you a idea over pm.

Ok, I'll read my PM box.

Update:

Guys, to those of you asking when the next update is, I just spent the last 8 hours sleeping. You can't honestly expect me to program 24/7. Today, I'm going over to a friends house for 13 hours. I plan to release the next patch tomorrow sometime. Also, I really need to start looking for a legit Sales Rep. Cause my MSN is getting out of hand; I literally signed in this morning and had 5 offline messages, and within 30 seconds I had another 9 windows open, and 6 more friends requests. I'm only one person guys, I'm not ignoring anyone, it's just kind of hard when I have over 100+ customers, and I'm only one person who can only be online so much in one day. Thank you for understanding.

zSwag - June 24, 2010, 9:38 am

I b sales rep kk!

contact: kevin_is_fly@hotmail.com

darkzomibe - June 24, 2010, 9:53 am

i can help...

(you got my msn)

Aspolale - June 24, 2010, 10:06 am

i can help if you like u got me msn

Samuell - June 24, 2010, 10:32 am

Thanks for the support guys, but I'll probably open an actual thread at some point for people to apply for being my sales rep; since you would be receiving a payment.

the.c0mrade - June 24, 2010, 12:14 pm

Just want to know if this works on all versions of Windows 7? I tried this twice on one of my victim, but it gave me an application error.

Classical did say it works on all versions on windows 7. Just wanted to confirm.

Samuell - June 24, 2010, 12:25 pm

(Jun 24, 2010 12:14 PM)the.c0mrade Wrote: [\[CITE\]](#) Just want to know if this works on all versions of Windows 7? I tried this twice on one of my victim, but it gave me an application error.

I'm back online MSN, I have an epic headache though o_O.

Samuell - June 26, 2010, 8:56 pm

Guys, I'm gonna be getting a new host for my auto updater very soon; just need to sort it out ><! Until then feel free to message me on MSN for a direct link to updates.

iHackS - June 26, 2010, 10:04 pm

Big vouche, flawless, easy to use, and great support. The GUI is also very nice. After purchasing many keyloggers and stealers I finally found the right one. I would buy this keylogger even if it was \$250 its that good! Nice work Classical!

Samuell - June 26, 2010, 10:35 pm

Xbtera - June 29, 2010, 12:20 pm

Very awesome. Easy set up and great customer support :)

Works like a charm :)

The only thing is I wish the google chrome (and others) were as good as the lexfplorer info stealer..

For some reason it can't pull any of my info off of chrome.. But EVERYTHING comes off of lexfplorer (probably because Microsoft fails so badly)

Samuell - June 29, 2010, 10:17 pm

(Jun 30, 2010 07:23 AM)TTGSPEED Wrote: [\[CITE\]](#) Hmm.. For some reason occasionally avg antivirus picks it up.. Idk what that's all about :/

Other than that it's fud :)

Binded files are picked up 2/19 by AVG and Avira; try an un-binded file, that should be fully FUD.

Viraavy - June 30, 2010, 9:36 am

Malwarebyte also catch the server registry setting & remove it.

Server visible in Task Manager at the time of installation.

Mouse work slow at the time of sending log & installation of server.

?

magret - June 30, 2010, 9:41 am

chrome stealer not work for me

Mate, I've told you before, it's limited to your computer. Try it on any other CPU bro.

(Jun 30, 2010 09:41 AM)magret Wrote: [\[CITE\]](#) chrome stealer not work for me
o_O...This seems to be a problem for people, I'll check it out.

pl0xz0r - June 30, 2010, 9:44 am

Wow im interested, adding you right now O_O i have a question

Viraavy - June 30, 2010, 9:51 am

(Jun 30, 2010 09:42 AM)Classical Wrote: [\[CITE\]](#) Mate, I've told you before, it's limited to your computer. Try it on any other CPU bro.

But, what about malwarebyte..?

[img]http://i47.[censored].com/25sa0co.jpg[/img]

sneezing panda - June 30, 2010, 9:57 am

Question, can i run it on two computers? I go to my dads for a month tomorrow and i would like to be able to run this program both tuere and here at my moms. Would it be possible to HWID it to a portable hard drive so it stays on there but is able to run on both computers?

EDIT: Ill only buy it if i can do that.

obvious123 - June 30, 2010, 10:40 am

Just Purchased!

Great Guy - Great Keylogger!

Mesale - June 30, 2010, 10:54 am

Hello brother.

I want to ask a question... Can i load a multiple systems -in same time- this logger ? Is there a multiple system support ? Sorry for my bad eng.

I'm waiting your response.i will buy the keylogger in this week.

OriginalKyle - June 30, 2010, 4:03 pm

Just love this thing man! Thanks again Classical. \$20 for lifetime is very well worth it!

Croobs - June 30, 2010, 8:58 pm

Hi classical, just wondering if you could talk to me when youre free on msn so i can purchase the keylogger.

xmastex - July 1, 2010, 1:10 am

dam it. I can never catch you on MSN. Either me or you is offline.

So i guess i'll need to ask my questions here:

- Does it leak a lot of memory? Does it use many resource like some keyloggers do?
- What if i'm tired of receiving the logs from someone?
- Can i bind (for example) a file of 17 MB to the server created from your keylogger using your binder? Will it be FUD again?

Cheers ^

jenso942 - July 1, 2010, 2:56 am

will there also be a guide on how to se this up or is it just supa eazy, dont know been awhile since trying loggers :/

tehukera - July 1, 2010, 8:40 am

Bought a copy, very legit and professional seller :).

Asus - July 1, 2010, 9:57 am

What about those malware bytes?

prowler.inc - July 1, 2010, 10:08 am

(Jul 1, 2010 09:57 AM)Asus Wrote: [\[CITE\]](#) What about those malware bytes?
want also know what he says about it -.-

Mesale - July 1, 2010, 10:26 am

Hello Classical.i added your msn.

i will buy the keylogger today. :) and i want to ask a question.

Samuell - July 1, 2010, 10:44 am

It is detected by malwarebytes, I'll be re-FUDing it when I have time :S.

check ur infos plz what this means rofl..

zSwag - July 21, 2010, 1:29 am

I'm speechless... I lost a good friend :(

Classical died in a car wreck last night. He was traveling home with his parents back from his grandparents house to vist his ill grandfather. It happened at around 3am. They were hit by a drunk driver. The only survivor was his brother, he is in critical condition in the hospital. He had to be air-lifted. His brother suffered terrible injuries. He is currently in a coma.

I received a call from his aunt at around 2pm today.. I was in total shock.... I was truly speechless. I've been at the hospital all day. I am still in total shock... I cannot believe this happened. That last time I spoke to Zac was about 3 hours before the crash, he was on his phone excited to get back and improve the Key logger for everyone...He had so many major updates in the works for it. It's just sad he was never able to show everyone what he had so much joy making. He was truly a genius.

The car was left in pieces after the crash. He It was a terrible wreck. I'm so sorry I had to give bad news to you all.

You will never be forgotten...

RIP Zac (1998-2010)....

Oxycotton - July 21, 2010, 1:40 am

grandparents house to visit his ill grandfather. It happened at around 3am. They were hit by a drunk driver. The only survivor was his brother, he is in critical condition in the hospital. He had to be air-lifted. His brother suffered terrible injuries. He is currently in a coma.

I received a call from his aunt at around 2pm today.. I was in total shock.... I was truly speechless. I've been at the hospital all day. I am still in total shock... I cannot believe this happened. That last time I spoke to Zac was about 3 hours before the crash, he was on his phone excited to get back and improve the Key logger for everyone...He had so many major updates in the works for it. It's just sad he was never able to show everyone what he had so much joy making. He was truly a genius.

The car was left in pieces after the crash. He It was a terrible wreck. I'm so sorry I had to give bad news to you all.

RIP Zac (1998-2010)....Bull shit? Are you joking me? Oh my fucking god... i've known him for like 2 years man!

prowler.inc - July 21, 2010, 1:41 am

i also know him good and this is totaly bullshit... , sure sure just get the facts. he left here without any messages that he goes away for a time...

read his msn status (i take a break from coding) = he scammed everyone here and dont give a fuck and left or already has a new nick..

i do not believe this skid shit

Oxycotton - July 21, 2010, 1:45 am

... He is alive. He is online, he has a new msn though, he has asked me not to give it out.

prowler.inc - July 21, 2010, 1:50 am

i do not care.... if he dont get back to all customers il report him for them :)

Oxycotton - July 21, 2010, 1:52 am

Naw man, he is still here noob.... lol.

Procrastination™ - July 21, 2010, 10:19 am

The keylogger is horrible imo, it logs for around 4 hours and then shut itself down. Sometimes it doesn't even receive logs, just the headers of the browser windows.

Btw I know Classical isn't dead, I've seen him in his RSPS.

Sage Mode - July 21, 2010, 10:48 am

I thought about buying this but he never got back to me, and that speaks volumes about the support.

Etepula - July 21, 2010, 10:54 am

i was alredy buyin it and no support

magret - July 21, 2010, 11:52 am

(Jul 21, 2010 10:19 AM)Mildly Legit Wrote: [\[CITE\]](#) The keylogger is horrible imo, it logs for around 4 hours and then shut itself down. Sometimes it doesn't even receive logs, just the headers of the browser windows.

make add to startup in your builder

Spacedllama - July 21, 2010, 1:00 pm

Classical. I need the latestversion please. It has been months.

Procrastination™ - July 21, 2010, 5:14 pm

(Jul 21, 2010 11:52 AM)magret Wrote: [\[CITE\]](#) make add to startup in your builderOf course I did that. Thanks for being a lot more helpful than support though -.-

FBI AGENT - July 21, 2010, 5:19 pm

Why is he never on MSN, I bought this from him but he never comes online. This shit doesn't work. Waste of money. It logs for 4 hours then shuts itself off.

Cough - July 21, 2010, 5:21 pm

sounds great i might buy it!!

Viraavy - July 21, 2010, 6:11 pm

(Jul 21, 2010 05:19 PM)FBI AGENT Wrote: [\[CITE\]](#) Why is he never on MSN, I bought this from him but he never comes online. This shit doesn't work. Waste of money. It logs for 4 hours then shuts itself off.

From the beginning of my purchase, I am facing problem. Everytime he assure me it is sorted out and last time he tells me that problem only occurs at my sustem. I have tested his keylogger on two system after changing HID but problem remain there. I am the first buyer who report that Malwarbyte catch it. He ignore firstly but when I show him proof he accept but afterthat he goes to holidays and we are waiting for him...??

???

Asus - July 23, 2010, 11:07 am

Classical is in a coma? I dont think so, lets hope he comes online during this 2 weeks.

Bz786 - July 25, 2010, 7:52 am

I believe we have all been scammed... Recieved no updates it isnt even FUD it gets detected by nearly all anti-virus programs...

unknownkind - July 25, 2010, 8:53 pm

For me its only detected by Antivira but I cant even use it cause I reformatted my computer and have new hwid.... Where is he??

--UK

ISO - July 25, 2010, 11:56 pm

The last time I've seen Classical on msn , he was just saying take a "pause" of coding.I think he has just stopped.

Oxycotton - July 26, 2010, 12:31 am

I can't even build a server... i think classical ran away with the fucking money, and that sucks because i was good friends with him.

ISO - July 26, 2010, 4:55 am

Me too , he was a nice guy... =(

Viraavy - July 26, 2010, 6:44 am

(Jul 26, 2010 12:31 AM)D0UCH3B@G™ Wrote: [\[CITE\]](#) I can't even build a server... i think classical ran away with the fucking money, and that sucks because i was good friends with him.

He told me in first week of July that he is going to leave from vb net programming. But didnt tell me when he will come. I am still hoping that he does not run away, ? He will come ?

Lets hope..?

Where are you un-classical..

ISO - July 26, 2010, 7:28 am

XD ok let's hope man , chance are limited but...

JazonX - July 27, 2010, 12:01 am

I bought this actually around the 15th of June and I still have no problems..there was one update really but other than that it still works fine, and am currently having to check my email A LOT because of the logs from people I have logged. If you're having problems...maybe you need help with it?

ISO - July 27, 2010, 12:11 am

I'm customer since the first day , have you speak about update to Classical ?

badwayz - July 27, 2010, 2:21 pm

Damn, I haven't seen him on MSN in forever. I left a few offlines, but no reply. Now I see that he's not around for wahtever reason.

ISO - July 27, 2010, 3:10 pm

I'm sure he is go on.Hope he will recome here !

Asus - July 28, 2010, 5:39 am

Wow he has been away very long, maybe he had no money to pay up for his server.

ISO - July 28, 2010, 5:40 am

Yeah , That's true.Will try to catch it on msn :D

Diabolic - July 28, 2010, 5:43 am

He has been away for months now ehh ?

Asus - July 28, 2010, 5:46 am

(Jul 28, 2010 05:43 AM)Diabolic Wrote: [\[CITE\]](#) He has been away for months now ehh ?

No, hes only been away for like nearly 20 days. I think personally he wont run away. He's tired of PayPal hustling him + rest for the summer.

ISO - July 28, 2010, 6:12 am

Possible.I hope he will come :D

unknownkind - July 29, 2010, 2:15 am

Maybe hes in jail...

:-P

ISO - July 29, 2010, 2:34 am

??? Why ? He hasn't do any botnet I know...

Bz786 - July 29, 2010, 6:15 am

Fuckign update this.. This is just a waste of fucking time.

Asus - July 29, 2010, 5:06 pm

Alright, it's near 30 days I waited. Razor told me hes been AFK for ages aswell. Not sure where he has been. Please update the stub! It's not FUD!

Teh Wallhacks™ - July 29, 2010, 5:10 pm

Hey was last online today

Seriously

I want an update!

Asus - July 30, 2010, 2:58 am

Classical please come online and update the thing, many people are waiting. I am sure you can FUD?

ISO - July 30, 2010, 4:04 am

He is just to lazy man.I understand he , now he have a lot of money.

Samuell - July 30, 2010, 10:23 pm

Just for the record, I didn't (and have no intention) of running off with everyone (or anyone's) money. As my MSN status has been showing for the past few weeks, I had taken a break from coding. I'm re-making the 'Hidden Iye Keylogger' from the ground up, literally created a new project file, etc.

After looking back at my code after not seeing it for a few weeks, I realized just how lazily written it was and how easy a few simple edits here and there could highly optimize its performance. I am

aware it is not FUD, and I'm sure many many bugs have popped out since I left.

If I was here to scam you guys, I would of surely taken down the HWID server, but I've left it up even though the program is half broken. This new software I am creating will have a new name, new commands, new settings, and a much more organized source code.

I've never had access to the money that was sent to me, since it was either sent to a paypal that is now limited, or to my friend's paypal who I can only use when he's online and not busy. (Since I can't actually log into it).

Anyway, I'm hoping to get this new software done by the end of summer. All customers of the Hidden Iye Keylogger (who have not charged-back on paypal) will receive the product 100% free. I'm also hoping to get a small beta up and running within the next two weeks to hammer out any bugs that may appear on OS that I do not own.

Thanks for your understanding and patience, and have an awesome day.

P.S. My PM box is full, and signing in to my old MSN results in my computer crashing from all the offline messages. I'll be creating a new public MSN later that everyone can add me on. (I've reached the maximum on z-technical@hotmail.com).

P.S.S I'm gonna start replying to the last page or so of posts, if you have any questions that are still relevant, feel free to re-post them.

(Jul 29, 2010 02:15 AM)unknownkind Wrote: [\[CITE\]](#) Maybe hes in jail...

:-P

I'm 14. I'd go to Juvenile Detention Center not Jail :p.

Frankstare - July 30, 2010, 10:30 pm

could you please send me the latest version of the keylogger, i lost it :(
And is this new keylogger your making made of Vb.net still?

Samuell - July 30, 2010, 10:35 pm

It will still be in vb.net, yes. Although I don't see how that's an issue anymore seeing that all computers have .net 2.0 framework o_O. I'm learning C++/C# on the side so meh.

Frankstare - July 30, 2010, 10:38 pm

Ok, but you still didn't give me the link to newest version of hidden iye or tell me if i could use hidden iye (latest version)

You could delete 1 message in your inbox + trash and send me it... THANKZ :)

Samuell - July 30, 2010, 10:41 pm

(Jul 30, 2010 10:38 PM)rusher Wrote: [\[CITE\]](#) Ok, but you still didn't give me the link to newest version of hidden iye or tell me if i could use hidden iye (latest version)

It is, but the new version will have a built-in crypter.

Asus - July 31, 2010, 8:31 am

I think that would be a bad idea a built in Crypter. Make something like a USG that randomizes the stub so lesser chance of detections.

Samuell - July 31, 2010, 8:34 am

(Jul 31, 2010 08:31 AM)Asus Wrote: [\[CITE\]](#) I think that would be a bad idea a built in Crypter. Make something like a USG that randomizes the stub so lesser chance of detections.

It's going to automatically generate a random stub, then encrypt it, it's all automatic.

joerich - July 31, 2010, 8:35 am

classical @ I really interested with your keylogger, but I am really newbie on this.. Pls PM me!

I only have this joko_maryono2000@gmail . no MSN

Asus - July 31, 2010, 8:40 am

(Jul 31, 2010 08:34 AM)Classical Wrote: [\[CITE\]](#) It's going to automatically generate a random stub, then encrypt it, it's all automatic.

Add a web cam stealer aswell, great idea mate. Supporting you on your words.

nem8men - July 31, 2010, 8:40 am

Sent you a mail, your HF pm quota still maxed out. I want to buy this..get an employee if the workload is too much to better focus on coding.

..is this the c or .net version?

Samuell - July 31, 2010, 8:41 am

(Jul 31, 2010 08:40 AM)Asus Wrote: [\[CITE\]](#) Add a web cam stealer aswell, great idea mate. Supporting you on your words.

Web Cam Stealer is on the menu ;].

(Jul 31, 2010 08:40 AM)nem8men Wrote: [\[CITE\]](#) Sent you a mail, your HF pm quota still maxed out. I want to buy this..get an employee if the workload is too much to better focus on coding.

..is this the c or .net version?

This is still .net framework 2.0 version.

Asus - July 31, 2010, 8:46 am

With Web cam stealer it will be one of the most funniest keylogger ever made! Make sure its not buggy while you code.

Samuell - July 31, 2010, 8:57 am

(Jul 31, 2010 08:46 AM)Asus Wrote: [\[CITE\]](#) With Web cam stealer it will be one of the most funniest keylogger ever made! Make sure its not buggy while you code.

Yea, as I said in an earlier post I'm gonna have about 2 weeks of beta testing before I release the real thing ><.

Castro - July 31, 2010, 9:34 am

Added you on MSN

Lets talk ;)

Samuell - July 31, 2010, 9:45 am

[img]<http://www.swiftpic.net/photos/albums/500-599/5864c54533ddcd59.jpg>[/img]

It's still going.

magret - July 31, 2010, 10:04 am

I'm not online in your screen

for all hf member the new project is a new keylogger advanced

Samuell - July 31, 2010, 7:24 pm

Everyone few days I'm gonna come out with a work log that summarizes what I've accomplished since I last checked in with you guys.

Work Log (7-31-2010):

- + Created Basic GUI.
- + Transferred over all major functions from the Hidden Iye Keylogger that worked well.
- + Put some of the more important functions on separate threads.
- + Improved Keylogging Function, added exceptions.
- + Added timestamps to the active window when keylogging.
- + Added custom infection directory. (You can now choose where you want the virus to copy itself to, or pick one of the pre-made locations.)
- + Enhanced Open-On-Startup.
- + Added Dynamic File Hiding.
- + Added Task Persistence.
- + Added Hidden Process Toggle.
- + Improved disable CMD/Registry/Taskmanager options.
- + Added Firefox Stealer.
- + Added MSN Stealer.
- + Added Data.db (Rsbots.net) Stealer.
- + Added No-IP Stealer.
- + Added option to use custom SMTP Server/Port.
- + Added Fake Error Message Function.
- + The Vaccine is now coded into the builder, to prevent it from getting leaked by White Hats.

Viraavy - August 1, 2010, 6:22 am

- Sound very interesting..?

Now my anxiety is increasing day by day.?

My suggestion:

(1) Stealer should send log in custom time interval set by us.
Because in old version, I didnot get activated log many times.

(2) Set screenshot time interval in two step.
For example:
It take victim screenshot in every 30 second and send screenshot log after 10 Minutes after clubbing of all screenshot in one log file.

(3) Server should hide in Task Manager as well as Startup Manager.
We can inject server in default browser for hidden.

(limposhare)

Samuell - August 1, 2010, 6:54 am
