Oh my god, thank you! I always wanted to know how to make one of these bad boys! ?

PS. Use [code] tags.

Ninja - December 22, 2014, 5:57 am

Judging from your other thread regarding the login system, I can tell you that you did not make this.

Rhez - December 22, 2014, 6:21 am

I don't know what he thinks about this forum ??

Neither do I. It's nothing but a shame that this guy is literally spamming this section with his horrible, probably leeched 'snippets'.

Ooglies - December 22, 2014, 6:25 am

Look man, i appreciate you contributing towards the forum but you can't just use other people's stuff, i can tell you have been on YouTube and then used that on here... Next time try and be more creative and make something even bigger like a Skype bot or something idk xD ?

Fallen21 - February 9, 2015, 10:18 am

thank you for share

i will make my skype spammer now

PATIENTZERO - February 10, 2015, 11:40 am

Wow this is simple as fuck,

Thanks for the share!

Hiiro - February 11, 2015, 7:05 am

Doesn't SendMessage send off the message making using SendKeys to press Enter pointless?

iTeDDy - February 14, 2015, 7:13 am

This is too simple to be true! Will take a look! :D

IISP33DII - February 23, 2015, 6:09 am

Very big THANKS for sharing this, very interested in it! :)

S?Nk - February 23, 2015, 12:44 pm

This has been released sooo many times it's unreal. Also it won't work properly without allowing the program to work in Skype by manually clicking 'Allow'. Not only that skype only allows x amount of messages from each user per x amount of time so it won't even be that effective.
