Thread: [\[SPECIALISTS\] IE <-11 Exploit Public+Method for Refud](#)

Bull™ - December 22, 2014, 4:33 am

[img]http://#/O3BFIB.png[/img]

This exploit can be used on some old version of IE 11 but not on the latest, this basically work on all version of IE under 11.

This exploit is downloading and executing any .exe file when someone load your infected web page.

Exploit Source Code : <http://pastebin.com/NGdnibwc>

How to refud the exploit :

Replace : "http://yourlink.com/file.exe" with your file link, and copy the whole code on <http://htmlobfuscator.com>.

Follow this image :

Enjoy using this.

Note : Not doing any kind of sales bashing but I hate when ppl try to rip other with public methods , staff please pm me before the junk this thread and i will prove it was a public product .some HF cunts are trying to sell it here and rip to others.

Credit to my cat [W?????](#);))

OneWorldOrder - December 22, 2014, 4:43 am

Thanks for the alert bro, the scammers need to be dealt with.

Shanks - December 22, 2014, 4:49 am

Bull is teasing the noobs as usual.

Hope people will find use

?????? ????? - December 22, 2014, 4:51 am

lol. how long ago was this released? i think i have a modified version on my desktop from an old project

found it: <http://www.exploit-db.com/exploits/35308/>

alphabres - December 22, 2014, 5:00 am

Thank you Bull , But where I put the code

I do not have Exploit Can you Upload them to me

?????? ???? - December 22, 2014, 5:02 am

<http://blog.trendmicro.com/trendlabs-security-intelligence/a-killer-combo-critical-vulnerability-and-god-mode-exploitation-on-cve-2014-6332/>

There is an exploit from this year for IE. With code.

(sorry not trying to hijack thread/ i agree with bull, people selling public exploits is bullshit)

HIGH PAID FELLA - December 22, 2014, 5:09 am

Good job Bull, HF skids selling public exploits. Obivious.

Bull™ - December 22, 2014, 5:10 am

(Dec 22, 2014 06:00 AM)alphabres Wrote: [\[CITE\]](#) Thank you Bull , But where I put the code

I do not have Exploit Can you Upload them to me

1- Put your direct link here

2- File name will be here .

Paste all text in a notepad after editing all and save file as .html extension .

Example : noobs.html

just host this html file and send traffic on it .

Schnitzel - December 22, 2014, 5:10 am

Thank you Bull for sharing this method, I'm probably not gonna use it but I think others will.

cacat - December 22, 2014, 5:24 am

Thanks Bull, great share. I would +rep you but I can't :D

Qcsmoker - December 22, 2014, 12:03 pm

This exploit is public and has many different version, I think there is a metasploit module with this one also !

Anyway thanks for sharing so others members don't get ripped !

tldr - December 22, 2014, 12:20 pm

cant get this working, not even with IE 9 -.- just nothin happens

conmon62101 - December 22, 2014, 1:26 pm

Thanks man! This is awesome! I've been looking for an exploit, but couldn't seem to find one!

TerminatorHD - December 22, 2014, 2:52 pm

Is all the code suposed to become one line, or is it just me fucking it up somehow ? ?

tldr - December 22, 2014, 6:27 pm

(Dec 22, 2014 03:52 PM)TerminatorHD Wrote: [\[CITE\]](#) Is all the code suposed to become one line, or is it just me fucking it up somehow ? ?

as for obfuscation, thats how it should be^^

does it work for anyone? :(

topLevel - December 22, 2014, 6:37 pm

Good job Bull, quality contribution!

This exploit will go down as the easiest exploit to use with great effectiveness! (other then shellshock :P)

Johny.s - December 22, 2014, 10:59 pm

its sad how people are trying to sell shit here on HF, scamming less knowledgeable members.. All browser EP Codes are public, using one dont need some special skills just some common sence.

DarkN3ss61 - December 22, 2014, 11:10 pm

This is an awesome exploit, its just a shame its for the old versions of IE, but either way, this is pretty cool!

Johny.s - December 22, 2014, 11:12 pm

(Dec 23, 2014 12:10 AM)DarkN3ss61 Wrote: [\[CITE\]](#) This is an awesome exploit, its just a shame its for the old versions of IE, but either way, this is pretty cool!

You have public sources for newer exploits.. just need to know how to implement them, and you can use more than 1 exploit in a script.

[img]http://s16.postimg.org/xdn0k2ob9/loong.png[/img]

is this is how its suposed to look?, one very loong line ?

tryed with ie 9 and 10 and still not working for me

tldr - December 23, 2014, 9:33 am

yea didnt work for me aswell on an unprotected machine. even unobfuscated, nothing happened

Sopalin06 - December 23, 2014, 11:39 pm

All is working fine ! Thanks for sharing mate !

Kristofferson - December 25, 2014, 10:57 pm

While the exploit is well known about the difference from simply just using it and using it well is a massive difference.

People don't understand, this exploit only hits hard with IE versions that don't have protection mode, which is little to none.

This is a free exploit but I do suggest, if you are directly skidding it, an IE 8 exploit, much more infection rates.

The Death - December 30, 2014, 5:18 am

thanks a lot Mr Bull , i just received a PM from an UPGRADED user trying to sell me that exploit ^^

Zappos - December 30, 2014, 10:39 am

I don't get how this works, it's not working on IE 8 unprotected..

Kristofferson - December 30, 2014, 3:36 pm

Yeah little to no people actually make it into a proper exploit worthy of a ek. They just copy this.

Tuna - December 30, 2014, 3:45 pm

Was it PoisonKnife? He is PMing a shitload of people.

d3vil.ron - January 7, 2015, 7:57 am

Works with silent java drive too ??

Plz Pm me :)

Thanks in advance
