I like everything you put out, i like most of the controls they look nice ,but the form container is throwing me off, other than that nice work!

Aristocles - December 23, 2014, 6:14 am

Yeah same as Nettro, I like everything but the FormContainer. You should made it more or less like the Groupbox, with the red shape at the left

You could've just converted it into a .dll & used it. No need to convert it.
