Thread: [I can't change my avatar \(but i've used the search button\)](#)

McJefferson - December 23, 2014, 10:04 am

First of all, I'm sorry about opening a new "I can't change my avatar" thread. ? I see there are already a lot. Very very sorry about that...

I'm not a dumb, I know it can't upload an avatar until upgraded ecc, I saw the restrictions, 120x150, 70kb, external link only ecc...

However, it says the URL is invalid. No matter the image hosting service I choose.... Tried to select "remove avatar" before entering a new one, tried log out/in, tried a 90x90 avatar, cleared cache, changed browser, pc, smartphone, ip address, nothing, URL is not valid... Any help?

Are you getting a direct link to the image? Does the link end in .jpeg or .png or something of the sort?

McJefferson - December 23, 2014, 10:13 am

Yes, it is direct. Tried both jpg and PNG, no luck...

In my own website, but i've tried imgur also, as much more avatars from more image hosting services... I get always the same message, even with the avatar I had before.

Does the url contains the extension of the pic (i.e:- .png , .jpg)?

I mean that the url "imgur.com/xxxx" would NOT work ,it should be "imgur.com/xxxx.png"

It doesn't work right now for everyone. You can't even change a picture in your signature right now for some reason.
