Hello, i think you dont want run a good service..you using free domain + free hosting and you got 8

resolver servers?

first you dont have 8 servers, why buy servers and no buy a domain + hosting?

second you dont need 8 servers...you can do easily 10k resolves/day with only one..

anyway, i hope you invest on your project for improve.. good luck

**SIM-2223238** - December 27, 2014, 6:43 am

I have 10 api's, like I stated in the resolver webpage,

And I am using a other host now, idiot.

I own more than one domain.

Well, I can remove your api, and set it to the last one, If you want.

All 10 api's work, I have api's from mostwanted betaresolver, skresolver , etc etc.

Domain isnt important, I already got my own server, but I like the other api's as extra.

I am already using a purchased hosting with ddos protection,
