Thread: [NEW TO HACKING? NOT ANYMORE...](#)

Obimoto - December 24, 2014, 4:27 pm

If you found this information helpful, please comment to keep the thread alive!

Too many people come here asking where to start, and even more tell them to google it...

I want to help just end the whole "where to start" thing, however I'm not gonna hold your hand...

This is not a tutorial, and does not cover everything to do with hacking. This is not a guide to 1337...

This is just a list of things to do. This list is beginner friendly, and most of it can be done on Windows. By the time you have studied everything in this list, you will have a good understanding on how hacking works, and probably learned a shit-ton more just from links and related topics...

*** Shows where tutorial list starts...

Let me just say the tutorials are suggestions for good tutorials...

Some may be repetitive, but all have good information...

If there are any problems with the tutorials, please tell me and I will edit... Virus scanning was done with

<https://www.virustotal.com/en/>

If you do not trust this site's results, I apologize and urge you to check with something else

Programming to look into:

I highly suggest going to [Code Academy](#)

I know there are a lot more things to be added, so if you think of any feel free to tell me!

HAPPY HACKING XD

Korosensei - December 24, 2014, 4:35 pm

Really nice thread, will definitely be helpful for those who are just starting out ?.

D1Ve - December 24, 2014, 4:38 pm

A really nice thread OP with some usefull links for new hackers. ^^

Dr. Fritz - December 24, 2014, 4:40 pm

I'm also interested in hacking but don't know how to start. Thanks

allnet - December 24, 2014, 4:41 pm

Very well written thread OP, this will help many people.

AUTISMUS MAXIMUS - December 24, 2014, 5:05 pm

I should totally start learning the HTTP language

Obimoto - December 24, 2014, 5:11 pm

(Dec 24, 2014 06:05 PM)AUTISMUS MAXIMUS Wrote: [\[CITE\]](#) I should totally start learning the HTTP language

Thank you so much bro! Edited...

I meant HTML XP

Mr. Lahey - December 24, 2014, 5:12 pm

Nice detailed thread op. Should help some people out! :)

Obimoto - December 24, 2014, 5:15 pm

Thank you all for your positive feedback! XD

deadcurry - December 24, 2014, 5:24 pm

Hey man im new to this this all looks really cool and is clear but I have just one question.

With the different types of programming languages, would you say there is any order that I should learn each of these?

Aeowulf - December 24, 2014, 5:31 pm

Great thread. Wonder how hard it would be to get this stickied? I think it would be years too late to have a 'beginners' thread pinned. Nice work Obimoto!

Nasyr - December 24, 2014, 5:33 pm

This is a really good thread with some interesting information for people who want to learn.

Obimoto - December 24, 2014, 5:33 pm

(Dec 24, 2014 06:31 PM)Sawedoff Wrote: [\[CITE\]](#) Great thread. Wonder how hard it would be to get this stickied? I think it would be years too late to have a 'beginners' thread pinned. Nice work Obimoto!

Thank you very much! None of the good threads here get stickied :(

(Dec 24, 2014 06:24 PM)deadcurry Wrote: [\[CITE\]](#) Hey man im new to this this all looks really cool and is clear but I have just one question.

With the different types of programming languages, would you say there is any order that I should learn each of these?

Nah no order. I suggest checking out python, as it is a very beginner-friendly programming language...

Many languages are similar, just with different syntax...

Tigermeet - December 24, 2014, 5:40 pm

Thank you very much for the nice list of information. This will definitely help some people out. (Including me)

AnonRobot - December 24, 2014, 8:33 pm

this is really good for people who are interested and want to learn.

now any one that comes here and posts about wanting to learn i will just refer them to this post <3 thanks.

amit007 - December 24, 2014, 9:53 pm

nice one for BEGNNERS.

keep posting.

Cammy - December 25, 2014, 3:57 am

This is good, will help alot of members here who joined for 'hacking'.

Nice work OP.

Boss201 - December 25, 2014, 4:13 am

Good job it will really help a newbie like me

P.I.M.P. - December 25, 2014, 10:38 am

nice thread, I'll get working on checking of this list now :D

Obimoto - December 25, 2014, 8:25 pm

Thank you all for the feedback! It's good to see my thread helping people...

I will be updating it every now and then, and suggestions are welcomed!

HAPPY HACKING XD

Noodica - December 25, 2014, 8:44 pm

Thanks for this high quality post! Helped me out a lot :)

Evil Corp - December 26, 2014, 1:05 am

I just got "new" laptop that my uncle gave, imma install linux on it and start hacking and become l337 h4x0r. Lmao But really Op thanks for the links, helped me to get some few pointers. I'm currently learning python, I'm going to read those subjects now.

Maxiim - December 26, 2014, 2:25 am

This thread is of my interests, thank you very much :)

Obimoto - December 26, 2014, 3:20 am

JUST EDITED THREAD

Added links to tutorials, not done yet...

Any errors please tell me, I am quite tired :/

Thank you and...

HAPPY HACKING XD

Bucked - December 26, 2014, 4:35 am

This is a lot of stuff to learn, but this is basically everything you need to learn for the basics x)

JohnyDoejohn - December 26, 2014, 4:40 am

nice for me thank you! and good work!!!

Kraziness - December 26, 2014, 6:01 am

This is a really comprehensive post. Covers most of what I was told I should start looking into and then some. Thank you very much, this is extremely helpful.

NoneStar - December 26, 2014, 8:39 am

For Web Dev people could learn from TheNewBoston.

Nice Post BTW :)

Obimoto - December 26, 2014, 12:27 pm

(Dec 26, 2014 09:39 AM)NoneStar Wrote: [\[CITE\]](#) For Web Dev people could learn from TheNewBoston.

Nice Post BTW :)

Ah! I have him under the python tutorials! Didn't notice he did other programming! Appreciate the feedback...

Thank You all for commenting as well XD Glad it's helping

R8 H4K5 - December 26, 2014, 3:47 pm

Nothing ever gets stickied in the beginner section! I've seen a lot of good tuts go down the list...

I did add that link to the forum though XD It's good to support the communities work...

Maybe I'll see if my thread could get put up, probably after I'm done with my tutorial lists...

brycemonroec - December 28, 2014, 4:37 am

The list looks daunting..guess you want it to be easy.But if it was, it wouldn't be worth doing I guess

Obimoto - December 28, 2014, 7:10 pm

(Dec 28, 2014 05:37 AM)brycemonroec Wrote: [\[CITE\]](#) The list looks daunting..guess you want it to be easy.But if it was, it wouldn't be worth doing I guess

I want people to research and learn, without having to google forever. I see people say "google it" all the time in this section, and sometimes it's not that easy. Many times you have to search through many articles to find the desired content. I want beginners to skip this phase and get right down to understanding how hacking works...

This way they can save time, and get enough understanding to start asking the right questions...

You still gotta learn yourself though XP

f1xurownemail - January 2, 2015, 3:26 pm

Wow this a great set of links thank you for the post.

hastalapolla - January 2, 2015, 5:06 pm

Nice information mate i going to take a better look soon.

Dr. Gonzo - January 2, 2015, 9:27 pm

(Dec 28, 2014 08:10 PM)Obimoto Wrote: [\[CITE\]](#) I want people to research and learn, without having to google forever. I see people say "google it" all the time in this section, and sometimes it's not that

You still gotta learn yourself though XPI do understand. I am willing to learn, even if its just to become a script kiddie..but i feel overwhelmed. im currently readin threw a hacker tutorial i got as an app...I couldnt even handle creating a USB password stealer, and its easy. i have no one to turn to ask what im doing wrong. I would love to find a mentor, or like an informal "course", where your lessons and a path is laid out. my interest are not in crashing systems, but gaining remote access to phones, systems, with keyloggers and RAT...only thing i do know is i dont know much, bu i know more that i knew yesterday...any suggestions on a course or mentoring program?

SIM-2270048 - January 9, 2015, 8:27 pm

Best place for a newbie to start
Thanks OP ?

vi9i - January 9, 2015, 10:58 pm

wow its very good guide

Kalizorah - January 9, 2015, 11:22 pm

I wouldn't recommend any hacking courses until you've got at least basic knowledge of IT.

A lot of those courses are pretty intense. For now just keep reading and trying stuff. We were all at that point once.

Obimoto - January 10, 2015, 11:41 am

Thanks for the support guys! XD

Goods - January 10, 2015, 8:36 pm

Just bookmarked this thread I really feel like this could help anyone trying to learn about hacking!!!

georgeziozas - January 11, 2015, 2:25 am

I have read a lot of things about how to start on hacking etc.

And after a lot of threads and opinions i found out that the only way is to start learning a lot of programming languages and also learn to "read" them only.. because you can't learn like 10

languages.

So you need to make a good training about 2 years at least before you get started with some real shit.

Nice thread really good job.
I am a bigginer too as you see.

DipDuo™ - January 11, 2015, 8:44 am

Bumping because more people need to see this..
on a side note, OP are you from Austin?

Obimoto - January 11, 2015, 10:54 am

(Jan 10, 2015 09:36 PM)Goods Wrote: [\[CITE\]](#) Just bookmarked this thread I really feel like this could help anyone trying to learn about hacking!!!Thank you! Happy it helped XD

I am a bigginer too as you see.Thanks for the support. I wouldn't say you NEED to hardcore learn programming to get into hacking though...

There is so much to learn, it doesn't heart to get an understanding of how things work. Also, there are many things you can learn that you do not need programming knowledge to get into...

(Jan 11, 2015 09:44 AM)Xgamer224™ Wrote: [\[CITE\]](#) Bumping because more people need to see this..

thank you very much

Honestly, I would start out with the READ ABOUT section (yes, all of it). After you get through that, pick out a programming language to learn (I'd suggest Python), and start messing with some of the programs while you're at it...

If you need any help, feel free to shoot me a pm when you can XD

That's a lot of tutorials lol...

Can't with my bum computer...

The purpose of this was to get you started, while providing enough info to not look around bullshitting for hours, trying to find real information...

Disable. - February 14, 2015, 4:28 pm

Ooh, thanks Moto!

This'll really help motivate me to keep up on my learning and practicing of C++ programming (and maybe even try out further projects)!

Much appreciated, from a hope-to-be-Hacker in the future!
?

AycerdEdits1 - February 14, 2015, 8:58 pm

(Dec 24, 2014 06:24 PM)deadcurry Wrote: [\[CITE\]](#) Hey man im new to this this all looks really cool and is clear but I have just one question.

With the different types of programming languages, would you say there is any order that I should learn each of these?

I'm interested in this as well.

Also, is there anything that would be more useful to learn than others? Or are they all pretty much equal in importance?

Obimoto - February 14, 2015, 9:12 pm

(Feb 14, 2015 09:58 PM)AycerdEdits1 Wrote: [\[CITE\]](#) I'm interested in this as well.

Also, is there anything that would be more useful to learn than others? Or are they all pretty much equal in importance?

I'm sorry, I forgot to answer this...

I would recommend starting off with Python and some C-C++...

Get familiar with SQL as well...

I feel Python is a very good programming language to start out with...

Anyway, Ruby and Perl are also cool, but it's really up to you after you get familiar with coding...

(Feb 14, 2015 05:28 PM)Reisen Udongein Inaba Wrote: [\[CITE\]](#) Ooh, thanks Moto!

I would actually suggest starting off with Windows. You would be surprised with what you can get done...

However, Linux is the industry standard, and with that being said, I would suggest switching to Linux eventually...

Linux just isn't very beginner friendly...

What you suggested will work, as well as using a VM...

Also, to everyone else who commented, I want to thank you for your support...

I'm on my phone right now, so it is difficult to quote everyone...

badbitch - February 16, 2015, 7:06 pm

Y'all are some straight up G's...

And yes, php is great XD

SIM-1965363 - March 14, 2015, 2:44 pm

Start with java, then php, then c++, then whatever other order you want to go in.

Rokushi - March 14, 2015, 2:47 pm

I really like suggesting Code Academy to complete beginners... but once they start to understand coding.. Code Academy doesnt really help to that well IMO.. they should invest in book like Learn the hard way!

Felnuts - March 18, 2015, 12:59 pm

Appreciate you doing this. Lots of people will need it.

Good Job OP!

Obimoto - March 29, 2015, 1:07 pm

(Mar 14, 2015 02:47 PM)Force Phobia Wrote: [\[CITE\]](#) I really like suggesting Code Academy to complete beginners... but once they start to understand coding.. Code Academy doesnt really help to that well IMO.. they should invest in book like Learn the hard way!

I can agree...

Code Academy is great place for beginners to learn, but there are better resources for advanced users...

(Mar 18, 2015 12:59 PM)runnin through the 6 Wrote: [\[CITE\]](#) Appreciate you doing this. Lots of people will need it.

Good Job OP!

Thanks for the appreciation!

Glad you see value in the thread...

Hopefully it'll stay afloat and keep helping out beginners...

Etherion - March 29, 2015, 1:12 pm

Some of this information will be useful for me, I'm so thankful.

beastrsbots - March 29, 2015, 1:16 pm

Thank you very much OP very helpful

z8sr2dx024 - March 29, 2015, 1:29 pm

oh yeah, i hate when people say ggogle it.... if thats the case might a well ditched the site.. lol

Ooze - April 1, 2015, 10:37 pm

Saving this thread.

Thanks for posting this has some great information!

Luciferum - April 1, 2015, 11:57 pm

Damn this is a nice detailed thread, thank you for the share man, this will be helpful.

k1tone - April 2, 2015, 5:46 am

Really nice thread, will definitely be helpful for some beginners.

System32 - April 2, 2015, 7:06 pm

thanks man this is gonna help me alot coming up

Obimoto - April 16, 2015, 4:32 pm

Good stuff!! Very helpful links. Thank you!

TheBitcoinExchanger - May 10, 2015, 12:14 pm

Thanks so much, really needed something like this!

candyman82 - May 10, 2015, 12:20 pm

its nice but video tutor would have been better

ankitkhosya - May 11, 2015, 4:04 am

Awesome Thread, Should be bookmarked.--Done

Bulgarin - May 11, 2015, 4:30 am

Oh thanks a lot, I just asked for this ?

I will take my time to read all of this.

Lazixo - May 11, 2015, 6:15 am

thenewboston, ahh thats where i learnd python :D

Nuclear3mbargo - May 11, 2015, 8:08 am

After reading about those topics, you still will be beginner. Those skills aren't even for entry level in the industry, if you want to hack into something you must be at least above the average IT security.

Mcbride - May 11, 2015, 8:25 am

Thanks OP, very helpful links. Posting so I can find this later.

HolyChild - May 11, 2015, 11:32 am

Hey man im new to this this all looks really cool and is clear but I have just one question.

With the different types of programming languages, would you say there is any order that I should learn each of these?

Obimoto - May 11, 2015, 12:34 pm

(May 10, 2015 11:26 AM)vedasamsara Wrote: [\[CITE\]](#) Good stuff!! Very helpful links. Thank you!
No problem, thanks for the support!!!

(May 10, 2015 12:14 PM)TheBitcoinExchanger Wrote: [\[CITE\]](#) Thanks so much, really needed something like this!

Glad to hear I came to the rescue...

(May 10, 2015 12:20 PM)candyman82 Wrote: [\[CITE\]](#) its nice but video tutor would have been better
Sorry...

I'm not one for videos...

Hope it helped anyway...

(May 11, 2015 04:04 AM)ankitkhosya Wrote: [\[CITE\]](#) Awesome Thread, Should be bookmarked.--Done

Appreciate it, and glad to hear it get bookmarked by users...

(May 11, 2015 04:30 AM)Bulgarin Wrote: [\[CITE\]](#) Oh thanks a lot, I just asked for this ?
I will take my time to read all of this.

Haha no problem, it's a long list so chill and learn...

(May 11, 2015 06:15 AM)Lazixo Wrote: [\[CITE\]](#) thenewboston, ahh thats where i learnd python :D
He's a straight up G and I would recommend him to any beginner...

(May 11, 2015 08:08 AM)Nuclear3mbargo Wrote: [\[CITE\]](#) After reading about those topics, you still will be beginner. Those skills aren't even for entry level in the industry, if you want to hack into something you must be at least above the average IT security.
I don't think you read the first few paragraphs...

I am well aware of this...

This thread is designed to take someone with no knowledge, and allow them to self teach to the point where they understand enough about the subject to ask the right questions and learn further...

It is very difficult to teach yourself when you don't know where to begin...

With your knowledge in this field, you should make a more detailed hacking tutorial that satisfies you!!!

?

(May 11, 2015 08:25 AM)weshamilton563 Wrote: [\[CITE\]](#) Thanks OP, very helpful links. Posting so I can find this later.
No problem bud, keep on learning...

(May 11, 2015 11:32 AM)HolyChild Wrote: [\[CITE\]](#) Hey man im new to this this all looks really cool and is clear but I have just one question.
With the different types of programming languages, would you say there is any order that I should learn each of these?
There's no order, although I would suggest starting with Python or C++...

It depends on what you wanna do...

I would suggest researching them or ask around the [coding section](#) of this forum for a more detailed answer...

Quickscooper - May 11, 2015, 12:58 pm
Very nice thread, thank you! ?

damzRR - May 17, 2015, 4:11 am
Thanks for this thread, i recently joined the community and this helped me a lot! :P

Indus - May 17, 2015, 7:29 pm
hey man this is really good listing i like it

SiNdicate - May 17, 2015, 10:20 pm
Thanks for this! You really helped me find out where to start.

iNk. - May 17, 2015, 10:26 pm
This is such a great thread.

Great job buddy

NukeShield - May 18, 2015, 1:19 am
Nice thread. will help alot of people

Fiddle?™ - May 18, 2015, 1:25 am

Very nice thread. Cain and Abel! That's what I've wanted to get for the longest time! God damn this memory loss. Now I'm going to forget to get it again tomorrow unless I check back here. Irregardless, nice thread.

nepHaXOr - May 18, 2015, 9:06 pm

Nice thread. Hope it helps me. Thanks

Caliban - May 25, 2015, 4:30 pm

Im a total noob when it comes to understanding hacking, and i was close to giving up on finding useful tutorials on how to get into it on this forum. But i finally found this thread! Great work, you rock OP! Gonna start learning :)

pyrotheseus - May 25, 2015, 9:32 pm

I really appreciate the work that you put into compiling all of this. I've been unable to find a really general list of things to study like this, and now that I have a general idea of what to do I feel like I'll make some actual progress. Can't wait to get started, thanks a bunch :D

NuhNelson - May 25, 2015, 11:32 pm

I really appreciate this man! I have been looking for good links to different styles of coding. Much appreciated! Thank you! ^_^

Obimoto - June 1, 2015, 2:35 pm

Thank you all so much for the support!

I'm glad to see my thread still being of use after all this time...

(May 25, 2015 04:30 PM)NihilistBrother Wrote: [\[CITE\]](#) Im a total noob when it comes to understanding hacking, and i was close to giving up on finding useful tutorials on how to get into it on this forum. Thanks for the appreciation...

I'm glad to help ya out...

Zman0x0 - June 1, 2015, 8:26 pm

nice thread man you've done a great job

Nomad.Null - June 2, 2015, 9:02 am

Well structured and well written, Obi. Here's a suggestion for something to add.

www.cybrary.it is a website filled with tutorials and learning material on security, general IT, networking, Ethical hacking, and pentesting. It's all free and definitely deserves a spot on this list.

I've also written an Ebook on the subject that I've made free for anyone who wants to give it a read. (Link in signature)

I'm not asking you to add it to your list, but feel free if you find it suitable. If you like it's content, you have my written consent to distribute it.

N0c7urn - June 2, 2015, 9:03 am

Nice dude good to see someone being genuinely helpful for once :)

bZ_N - June 2, 2015, 10:14 am

Hacking is a mentality, and computer hacking is a mentality and partly a skillset.

There, that is the actual fucking definition.

Nomad.Null - June 2, 2015, 11:44 am

(Jun 2, 2015 10:14 AM)bZ_N Wrote: [\[CITE\]](#) Hacking is a mentality, and computer hacking is a mentality and partly a skillset.

There, that is the actual fucking definition.

Why the rage?

Actually, This is the actual "fucking" definition.

Spoiler ([Click to View](#))

hack·er 1 (hak´?r)

n. Informal

1.

a. One who is proficient at using or programming a computer; a computer buff.

b. One who uses programming skills to gain illegal access to a computer network or file.

2. One who demonstrates poor or mediocre ability, especially in a sport: a weekend tennis hacker.

Rage? Sir, I don't think so!

Also, you are wrong. Did you really get the definition from thefreedefinition, let me further explain to fulfill your need.

Hacking is a mentality. It's about self improvement, tinkering and discovery in unconventional ways, computing or not. It's efficiency and finding logical outcomes to problems.

For security "hacking", It's both the mindset and partly the skillset. It does not matter how curious or smart you are, if you don't understand how a particular system works, you can't actually hack it yourself.

sumirart - June 2, 2015, 9:46 pm

waaw great list of usefull information broo, thanks :)

farux - June 5, 2015, 11:30 am

Awesome thread Obimoto! Another good website is professors-messier. People new to the field can watch his A+ videos (teaches you the fundamentals) and experienced people can still watch his network +, security + and windows 7 videos. Most everything is free but there are things like study guides and getting pdf versions that you can pay for. This is a good option for people who like to see what they are learning and take notes at the same time (visual learning)

ramos1337 - June 5, 2015, 11:51 am

Nice, thanks for sharing all this information.

Vaporr - June 5, 2015, 12:23 pm

Great post, really helping me out

Thank's ?

mitu - June 5, 2015, 1:14 pm

Really a icebreaking thread. totally loved it. Thanks for the share

Life Goes On - June 6, 2015, 12:19 am

Thank you man, i appreciate it, very helpful.

robbie56 - June 6, 2015, 5:47 am

This is awesome , and very helpfull for guys like me who are new to this.

Katie Stevens - June 6, 2015, 5:54 am

That is a really nice tutorial m8. ?

3lcodigo - June 6, 2015, 10:45 am

great starting point ,much appreciated

sixfootturkey - July 4, 2015, 12:11 pm

Thanks for this thread. That RAT tutorial was just what I was looking for.

Kokomikta152 - July 4, 2015, 12:26 pm

nice thread, thanks for your hard work bro.

Tokyox - July 4, 2015, 12:27 pm

OBIMOTOO HIROSHIMAAAAA SAN

NoMemes - July 4, 2015, 1:18 pm

Wow this is actually a really HQ thread here. Thanks man. It even helped me.

Cheeb - July 4, 2015, 1:20 pm

God I remember when I was learning python, I watched all of Bucky's videos. Those videos were so helpful and funny.

TheMispastedNose - July 16, 2015, 1:48 pm

This is fantastic! Thanks.

SIM-1185085 - July 16, 2015, 1:51 pm

this is a quality post thank you for this

1985 - July 30, 2015, 8:10 pm

Thanks !! Really nice sharing with usefull links for new guys

FoundingFather - July 30, 2015, 9:50 pm

Gonna read through this. Thanks for putting in the time w/ all the links lol.

SuppeKonge - August 16, 2015, 9:12 am

Thank you for taking your time ro write this. By the time i write this, i'm on my way to a birthday, but this qill help me out big time

Cairo666 - December 28, 2015, 3:12 am

Really nice, Thanks man!

scintillating - December 28, 2015, 9:00 pm

Sigh. In my opinion, this thread is a terrible commencement for people. No offense of course. Only good resource on your thread I could see good for people is Programming. Anyone looking into the Hacking field should first get some experience with computers (A+ is good for that). I could go on. Feel free to PM me.

P.S, I'm contrite if I seem akin to a dick at this point. I'm just blunt & veracious.

N3verGiveuP - December 28, 2015, 11:21 pm

Thank for sharing brother. Your suggestions will be very helpful for me.I ma just a starter in hacking.

ataturk - December 30, 2019, 12:33 pm

Very useful post, thank you.

Shad123 - December 31, 2019, 6:29 am

This is really good to begin.
