Thread: [How change all the information from exe ??? \(version, name, icon...\)](#)

cheeseburgers - December 24, 2014, 4:56 pm

Do you know any way how i can change all the information like version, name, icon and all the rest from my .exe file??? maybe a software where you can edit all these????

invisibleghost - December 24, 2014, 5:06 pm

You can't change the exe structure, an exe will always be a exe, but you can change a lot of things to make the exe more like a different file like as jpeg, doc, pdf, mp3, avi etc and ...

Name - Rename
Icon - Icon Changer
Extension - Extension File
Size - Pump File
File properties - Assembly Changer or File Cloner
Join with file - Binder

Most crypters on the forum has these functions.

[Cryptography, Encryption, and Decryption](#)

There must be a programm cause i remember i used one a while ago and this way like you said is too annoying, also for every function one programm :D

Aeowulf - December 24, 2014, 5:32 pm

There is one, I used one that did this a few years back. I can't remember what it is though. Posting here to save so if I remember it later I will come back and post it. Good luck finding it.
