Thread: [\[TuT\]Spy-Net 2.7 Complete Tutorial\[TuT\]](#)

CATMAN - June 4, 2010, 3:15 pm

[\[img\]http://i.minus.com/iOXdXE9apJJLF.png\[/img\]](#)

Hello HackForums.

Today I will show you how to setup, crypt and spread your Spy-Net server.

RAT-is Remote Administration Tool that gives unallowed access to remote computer. That can be legal or illegal. Legal are using parents to control their kids. Illegal are using for stealing passwords, make computer user angry by Fake Errors...

1. Download:

Spy-Net 2.6 - http://www.4shared.com/file/141956665/99a1fc2/Spt-Net_RAT_v26.html Password Spy-Net

No-IP DUC- <http://www.mediafire.com/?znzygzmztyi>

Spy-Net 2.7 Beta 02 (Credits to flamingw0rm)- <http://www.#!/?d=YRX5ST7U> Password flAmingw0rm

I am using Spy-Net Beta 02 and works perfectly.

2. No-IP setting up:

<https://www.no-ip.com/newUser.php>

And Register. Then go Add Host.

Then chose your hostname and free domain and then click Create host.

[\[img\]http://img717.imageshack.us/img717/4315/noip2.png\[/img\]](#)

Next install No-IP DUC and login with your e-mail address and password from registration. Mark your host and you will see next.

[\[img\]http://img16.imageshack.us/img16/8171/noip3.png\[/img\]](#)

3. Port Forwarding:

Open START. Type in cmd.

Open Command Prompt and type:

ipconfig/all

[\[img\]http://img535.imageshack.us/img535/7326/cmdj.png\[/img\]](#)

Default gateway is your Router Ip Address.

Basic logins: username-admin password-admin

username-admin password-(blank)

[\[img\]http://img248.imageshack.us/img248/4058/pf2p.png\[/img\]](#)

Then go to Redirect.

[\[img\]http://img375.imageshack.us/img375/1359/pf3.png\[/img\]](#)

Local address is what you got as IP Address from Command Prompt.

Destination Port From-81

Destination Port To-81

And Submit. Use TCP and UPD.

Then go to : <http://canyouseeme.org/> and write 81.

If you see this you have successfully PF your port.

[\[img\]http://img708.imageshack.us/img708/4810/pf4.png\[/img\]](#)

More info:

<http://portforward.com>

4.Spy-Net setting up

Disable your AV and extract Spy-Net(I recomend 2.7 Beta 02 by flamingw0rm).You will see this window.

[img]http://img64.imageshack.us/img64/6052/spynet1.png[/img]

Click START and Options and Select listening ports.

We will use port 81.Delete all other ports.Connections limit is 10.000 and Connection Password is 123456.Dont change it!!!

Click Save.Click File-Create Server and make a New User.

Press Forward.Delete the 127.0.0.1 DNS server and type yours.

[img]http://img191.imageshack.us/img191/9131/63649181.png[/img]

Dont change the Indentificaitaion and Password!!!

Next tab is Instalation.Mark Install server to save server in System.

Do all as I have done.

[img]http://img3.imageshack.us/img3/5378/spynet6.png[/img]

In Next tab is Fake Message.If you want to bind I dont suggest this.

Next tab is Keylogger.Mark Install Keylogger and Delete(Backspace).

This is if you victim make an error.If you have FTP use it,if not forget it.

Anti-Debug:All checked.

Create server:Use as you want.Click Create server and save you server.

4.Crypting:

-Crypters

-Free Cryping service

-HEX Editing

For free Crypting service,look in Service Offerings.

[Service Offerings](#)

5.Spreading:

1.YouTube

YouTube is best spreading method.You will need a fake program and bind it with your Spy-Net server.When you upload your fake video with fake program go to Most Viewed,All Times and in every video post your link.

2.Torrents

Here you will need a # account,

Fake program,crypter,binder because they have moderators that checks torrents.If is not FUD it will be deleted.

3.JavaDrive by Applet

<https://hackforums.net/showthread.php?tid=321377>

4.Chat Rooms:

java chat room- <http://www.javachatrooms.net/chatrooms/teen.html>

teen chat- <http://www.teenchat.com/>
yahoo chat - <http://messenger.yahoo.com/features/chatrooms>
omegle- <http://omegle.com/>
321 teen chat - <http://www.321teenchat.com/>
321 gay teen chat [LOL]- <http://www.321gayteenchat.com/>
oohya(thats really the name :D) - <http://www.oohya.net/>
meebo- <http://www.meebo.com/rooms/>
Kids chat net <http://www.kidschat.net/chat.php>
Talk city- <http://www.talkcity.com/>
Google chat (still pretty good)- <http://www.google.com/talk/>

Just take name SexyChristina or something similar to that.
Write in room:Im showing free my naked pics!!! PM me.
BOOM! Loads of guys and lesbians want your pictures.Give them your Java Drive by Applet or direct link to virus.

5.Forums:

Go to any cheat forums and post AiO CrossFire hack.
You will get computer kids age 10-19.

And this is a good method.
Go to <http://warez-bb.org> and make a account.
Download some Anti Virus and bind it with your server.
Make a topic about that.

FULL SUPPORT IN THREAD!!! ?

Clear - June 4, 2010, 3:46 pm

This looks good with extra stuff (spreading, crypting) but is your IP in the canyouseeme.org picture

CATMAN - June 4, 2010, 3:53 pm

Thanks Echo :) This is my first tutorial about RATs.

-Trae

Thanks for alert i fixed it!!! ?

iStealth - June 4, 2010, 4:25 pm

I swear I've seen the exact same tutorial for cybergate a while ago, except this one has some added features like where to spread. But I see the pictures are yours, so you did actually put time into it.
Thanks for sharing :)

Suicidal Thoughts - June 5, 2010, 2:58 am

Nice tutorial.

And how can it be the same tut for cybergate when this is spy-net.

CATMAN - June 5, 2010, 3:07 am

Thanks ?

Guys and girls I writed this tutorial about a 3 hours from my bed on laptop.
I would never steal someones work! And yes pictures are mine ,just CTRL+Print Screen + Paste in Paint then crop.

And my rep : I got -1 because I asked Merakitx1029 for a vulnerable MySQL site,he didnt answer me and give me a -1 rep.

Fool.

Sage Mode - June 5, 2010, 4:35 am

Good tutorial man, will be helpful to newcomers.

hacker300 - June 5, 2010, 4:42 am

thanks , really needed this

Reputation - June 5, 2010, 4:47 am

It's a nice detailed thread. It's good for the beginners who are just starting to use RATs. Nice work.

CATMAN - June 5, 2010, 5:13 am

Guys and girls I writed this tutorial about a 3 hours from my bed on laptop.

Fool.

i know how that feels except i was laying down for two hours afew minutes ago making a tut with laptop sitting on my bed on top of stuff so fan would not get blocked. and i had to type quietly, didn't want to wake parents.

i think this tut deserves +rep, but i think a leet or uber are the only ones who can.

CATMAN - June 5, 2010, 5:29 am

Neon666 - June 5, 2010, 5:39 am

Nice man, i knew how to, because i got experience.

But this is pretty nice if someone cant do it or have to look for a part of that, because he forgot something.

Well done, screenshots are pretty nice and nicely done.

Neon

CATMAN - June 5, 2010, 7:08 am

I will upload a video if you request.

CATMAN - June 7, 2010, 8:44 am

Bump.

Too short :D are you short?

GhOsT-BoY - June 30, 2010, 4:13 am

Good Tut m8.

I like it (:

Legoz - June 30, 2010, 11:47 pm

Great tutorial Catman you never dissapoint me :)

CATMAN - July 11, 2010, 3:59 pm

Bumping

Up

My

Post!!!!

Message too short -.-'

ISTRKEYI - September 3, 2010, 1:12 pm

Catman good tutorial :) but i followed every step yeh but i cant get the server to work on my own pc. Im also with TALKTALK and i have the DLINK DSL-2740R router. Please can you help me? this is my msn silent_troopa@hotmail.co.uk

icebreaker07 - September 3, 2010, 1:26 pm

nice tut lol :)) ?

Loka~ - September 3, 2010, 1:32 pm

There has already been a lot of threads about this, why make another? -_-

ISTRKEYI - September 3, 2010, 1:54 pm

Quote:1.Download:

Spy-Net 2.6 - http://www.4shared.com/file/141956665/99...T_v26.html Password Spy-Net

You giving us the download of spy.net v2.6 instead of v2.7??

Quote:[TuT]Spy-Net 2.7 Complete Tutorial[TuT]

and the tut is for v2.7 ... :|

Fix the link,however great tut! Very detailed. Thanks :)

HaxOr? - September 4, 2010, 12:46 pm

Can i use other port? :)

Msg toooo shortt

iUndead - September 4, 2010, 1:19 pm

good tutorial... i needed to make sure i was setting up Spy Net correctly.

ch0c4nto - September 10, 2010, 7:57 am

Good tutorial, like most spy-net tut.

Have you find a good crypter for the spy-net RAT ? If you would you can communicate with me in PM ;)

Anonymous.7654 - September 10, 2010, 9:18 am

True ... nice tutorial,thanks

killerciao - September 10, 2010, 2:13 pm

wow nice man really nice !

ariton - September 11, 2010, 12:52 pm

Tutorialot ti e stvarno OK!

Cr4zy Kr0n1x - September 16, 2010, 11:16 am

bro all it's oke and great tut...

i make this all and WORKING !!!

and i rung server and come this on my destkop

[IMG]http://i53.[censored].com/34rd2bm.jpg[/IMG]

What is this problem ??? " is this BUG " or what

znaci dali je to problem brate neki ili ucemu je stvar pa se to pokazuje please help me... ako ti nije frka ty mate !!! PeaCe

CATMAN - September 16, 2010, 12:05 pm

What OS and what Service Pack are you using?

Brigade - September 16, 2010, 12:50 pm

Good tutorial, helped me out pretty good, thanks dude

Cr4zy Kr0n1x - September 17, 2010, 6:32 am

(Sep 16, 2010 12:05 PM)CATMAN Wrote: [\[CITE\]](#) What OS and what Service Pack are you using?
service pack 3 Windows XP?

i prije sam koristio pa je islo normalno a sada to odkud ?

noid - September 17, 2010, 10:46 pm

swear I've seen the exact same tutorial for cybergate a while ago. People are allways copying

others shit.

CATMAN - September 18, 2010, 12:20 pm

(Sep 17, 2010 10:46 PM)Nessy Wrote: [\[CITE\]](#) swear I've seen the exact same tutorial for cybergate a while ago. People are allways copying others shit.

Well,I wrote this alone long time.

CarbOn F1ber - September 25, 2010, 12:40 am

Does anyone know the change log between Spy-Net 2.6 and 2.7 ??? Everything seems to be just the same ..

KLDM - September 26, 2010, 4:00 am

I wanna write 80 but he reply this: Error: I could not see your service on "My IP Adress" on port (81)
Reason: Connection timed out

WTF ?

CATMAN - October 11, 2010, 2:31 am

(Sep 26, 2010 04:00 AM)KLDM Wrote: [\[CITE\]](#) I wanna write 80 but he reply this: Error: I could not see your service on "My IP Adress" on port (81)

Reason: Connection timed out

WTF ?

Port 80 is used for HTTP.Use another port.

CATMAN - December 5, 2010, 4:07 am

LOL,people atleast leave a reply '.'

eddyIambart - December 5, 2010, 4:53 am

thanks for the great tutorial i'll try it surely..

- 121 - - December 6, 2010, 8:37 am

bro plzz explain the method of MT882 with sites
thnxx plxx

ado11 - December 6, 2010, 9:15 am

Very nice tutorial CATMAN

hamid2458 - March 19, 2011, 9:07 pm

what happens when i spread this trojan and if some one runs it on his or her pc.... how do i know or how i'll get access on his pc

HaxinHax - March 19, 2011, 11:09 pm

Very nice tutorial. I agree. It is good for people learning, like me, (xD) about RATS (What /B/00B4N3T said)

Kendama - March 19, 2011, 11:12 pm

Thanks alot this worked very well!!!

crimezy - March 22, 2011, 2:36 pm

Nice tutorial, thank you.

Usually RAT's get caught by anti-virus anyway and it's not easy to use them..

Dominance - March 22, 2011, 3:47 pm

I use blackshades, but might use this on my other computer. Thanks.

imlegend56 - March 25, 2011, 3:27 am

wth... I created server i did everything so to test it I put that file in my another laptop , and as I open it everything started to show error , all drivers removed... everything crashed wireless off ... so how I ill spy ?

B4M - March 25, 2011, 3:57 am

Great tutorial. Will try this out later

imlegend56 - March 26, 2011, 8:01 am

AWESOME.. That was fabulous I have done it 100% lol... thanku so much !!! anyway I aint gona use it for illegal purposes...

imlegend56 - April 4, 2011, 3:03 am

Does anyone know that why Victims PC gets error on each startup " explorer.exe DONT SEND / SEND ERROR REPORT . "
or firefox DONT SEND / SEND ERROR REPORT and that could be suspicious...

vagatron - April 4, 2011, 7:20 am

spy net 2.7 wonrking only to 80,81,82 ports??

thnx!nice sharing and TUT!

Black.Dragon - June 18, 2011, 9:33 pm

Thanks for the Tut bro . Keep it up Bro . Will like to learn more .

CATMAN - July 17, 2011, 2:23 am

You better use Beta 02 because link for 2.6 is dead. :(

tomcatapache - July 17, 2011, 2:40 am

thanx really nice tutorial. I was waiting for this. GOOD

christiano - July 17, 2011, 3:31 am

Awesome Tut mate

Good for begineers!

The Unknown - July 19, 2011, 4:25 pm

Thanks a lot for sharing this man, I see Spy-Net has been the best rat for me ! lol
